Neophytou,2020-07-12 Burial sites have long been recognized as a way to understand past civilizations Yet the meanings of our present day cemeteries have been virtually ignored even though they reveal much about our cultures Exploring an extraordinarily diverse range of memorial practice Greek Orthodox Muslim Jewish Roman Catholic and Anglican as well as the unchurched **The Secret Cemetery** is an intriguing study of what these places of death mean to the living Most of us experience cemeteries at a ritualized moment of loss What we forget is that these are often places to which we return either as a general space in which to contemplate or as a specific site to be tended These are also places where different communities can reinforce boundaries and even recreate a sense of homeland Over time ritual artefact and place shape an intensely personal landscape of memory and mourning a landscape more alive more actively engaged with than many of the other places we inhabit *The City as Power* Alexander C. Diener, Joshua Hagen,2018-09-18 This interdisciplinary book

considers national identity through the lens of urban spaces By bringing together scholars from a range of disciplines *The City as Power* provides broad comparative perspectives about the critical importance of urban landscapes as forums for creating maintaining and contesting identity and belonging Rather than serving as passive backdrops urban spaces and places are active mediums for defining categories of inclusion and exclusion With an international scope and ready appeal to visual learners the book offers a compelling survey of historical and contemporary efforts to enact state ideals express counter narratives and negotiate global trends in cities The contributors show how successive regimes reshape cityscapes to mirror their respective socio political agendas perspectives on history and assumptions of power Yet they must do so within the legal ethnic religious social economic and cultural geographies inherited from previous regimes Exploring the rich diversity of urban space place and national identity the book compares core elements of identity projects in a range of political cultural and socioeconomic settings By focusing on the built form and urban settings for social movements protest and even organized violence this timely book demonstrates that cities are not simply lived in but also lived through

Key to the Garden Habib Ahmad Mashhur al-Haddad, It is now forty years since this book was written twenty since it was translated into English and twelve since the translation was first published The issues that had caused the author so much concern at the time have become without exception all the more pressing today The need to convey the Islamic concept of Tawhid to the world at large in clear unequivocal terms has been and shall remain a Muslim s first duty Now that there is renewed worldwide attention towards Islam it has become even more urgent to convey its core concept without which there is no religion The Oneness of God Key to the Garden is an elaborate exposition of Prophet Muhammad s teaching that the inner life must pass through three stages affirmation of faith with the tongue then the mind and finally the heart The Muslim Testimony of Faith that there is no deity save God is at once the essence and the highest principle of Islam This book is a demonstration by one of the greatest recipients of the Prophet s heritage of knowledge of how the whole spectrum of Islamic thought and worship unfolds naturally from these few words

Persian Gardens Everett Sinclair, AI, 2025-03-29 Persian Gardens explores the rich history and profound influence of these meticulously designed landscapes revealing them as earthly representations of paradise Persian Gardens originating in ancient Persia are more than just beautiful spaces they are cultural statements reflecting power faith and identity Intriguingly these gardens often incorporate the charbagh layout a four part design symbolizing the Zoroastrian elements of water earth fire and air demonstrating a deep connection to ancient beliefs The book progresses from the core design principles to specific examples across historical periods examining their evolution and adaptation It then delves into the symbolism and cultural significance of these gardens drawing from textual and archaeological evidence Ultimately Persian Gardens traces their impact on global garden design particularly in Islamic and European traditions By combining architectural analysis with cultural history the book offers a unique perspective on these historical landscapes

Heathorn,Michael Gauvreau,2013-03-07 In the decades following the Second World War North America and Western Europe experienced widespread secularization and dechristianization many scholars have pinpointed the 1960s as a pivotally important period in this decline The Sixties and Beyond examines the scope and significance of dechristianization in the western world between 1945 and 2000 A thematically wide ranging and interdisciplinary collection

The Sixties and Beyond uses a framework that compares the social and cultural experiences of North America and Western Europe during this period. The internationally based contributors examine the dynamic place of Christianity in both private lives and public discourses and practices by assessing issues such as gender relations, family life, religious education, the changing relationship of church and state, and the internal dynamics of religious organizations. The Sixties and Beyond is an excellent contribution to the burgeoning scholarship on the 1960s as well as to the history of Christianity in the western world.
