**Rethinking Serial Murder, Spree Killing, and Atrocities** Robert Shanafelt, Nathan W. Pino, 2014-11-20 Multiple killings by serial or spree killers and the mass violence seen in war crimes and other atrocities have typically been understood as discrete category types which can foster the view that there are fundamentally different kinds of human beings including deviants who are born evil and innately given to sadism or a callous lack of empathy In contrast this book considers the violence of these deviants in terms of larger questions about human violence Therefore in addition to describing the life histories of a sample of individual serial and spree murderers the book includes analysis of macro level phenomena such as genocide mass rape and killing and torture occurring under conditions of war state authorization or political upheaval The chief claim of the book is that given the right combination of factors occurring at different levels of analysis virtually anyone can emerge as a killer or perpetrator of atrocities While it is crucial to understand individual killers in terms of the details of their biographies it is equally crucial to understand political atrocities in terms of the details of their histories and to see that persons and groups are always the product of complexly interacting assemblage processes

*Violence, Society and Radical Theory* William Pawlett, 2016-02-17 Shedding light on the relationship between violence and contemporary society this volume explores the distinctive but little known theories of violence in the work of Georges Bataille and Jean Baudrillard applying these to a range of violent events events often labelled inexplicable in order to show how even the most extreme of acts can be seen as socially meaningful The book offers an understanding of violence as fundamental to social relations and social organisation departing from studies that focus on individual offenders and their psychological states to concentrate instead on the symbolic relations or exchanges between agents and between agents and the structures they find themselves inhabiting Developing the notion of symbolic economies of violence to emphasise the volatility and ambivalence of social exchanges Violence Society and Radical Theory reveals the importance to our understanding of violence of the relationship between the structural or systemic violence of consumer capitalist society and forms of counter violence which attack this system A theoretically rich yet grounded expansion of that which can be considered meaningful or

thinkable within sociological theory this ground breaking book will appeal to scholars and students of social and political theory and contemporary philosophy      The Certified Criminal Investigator Body of Knowledge 0 American College of Forensic Examiners Institute,2017-07-27 Criminal investigators have a long list of duties They must identify and secure a crime scene conduct interviews of witnesses and victims interrogate suspects identify and properly collect evidence and establish and maintain a chain of custody Once an investigation is underway the criminal investigator must demonstrate thorough knowledge of      **Mediating Madness** S. violence beyond the domain of physical harm By employing concepts such as coalition enforcement moral bubbles cognitive niches overmoralization military intelligence and so on the book aims to spell out how perpetrators and victims of violence systematically disagree about the very nature of violence The author s original claim is that disagreement can be understood naturalistically described by an account of morality informed by evolutionary perspectives as well This book might help us come to terms with the fact that we are intrinsically violent beings To acknowledge this condition and our stupefying capacity to inflict harm is a responsibility we must face up to such understanding could ultimately be of help in order to achieve a safer ownership of our destinies by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing
