The Generic Speaker:

The Generic Speaker Gail Shadwell,Brigitte T. Breitenbucher,Aaron Vessup,1985-01-01   *Sound Systems: Design and Optimization* Bob McCarthy,2016-02-26 Sound Systems Design and Optimization provides an accessible and unique perspective on the behavior of sound systems in the practical world The third edition reflects current trends in the audio field thereby providing readers with the newest methodologies and techniques In this greatly expanded new edition you ll find clearer explanations a more streamlined organization increased coverage of current technologies and comprehensive case studies of the author s award winning work in the field As the only book devoted exclusively to modern tools and techniques in this emerging field Sound Systems Design and Optimization provides the specialized guidance needed to perfect your design skills This book helps you Improve your design and optimization decisions by understanding how audiences perceive reinforced sound Use modern analyzers and prediction programs to select speaker placement equalization delay and level settings based on how loudspeakers interact in the space Define speaker array configurations and design strategies that maximize the potential for spatial uniformity Gain a comprehensive understanding of the tools and techniques required to generate a design that will create a successful transmission reception model   **The ^AEssential Child** Susan A. Gelman,2005-04-21 Numerous fields stake claims about essentialism but this is the first book to address the issues surrounding essentialism from the perspective of developmental psychology Gelman synthesizes 15 years of empirical research on essentialism into a coherent framework examining children s thinking and ways in which language influences thought She argues that young children s use of concepts such as dog man or intelligence reflects their deep commitment to the presence of these categories properties that extends beyond the observable information about objects The presence of this commitment in children also means that they do not come into the world as passive recipients of data but rather have an organizational scheme that supports categories This volume will be of interest to developmental cognitive and social psychologists as well as to scholars in cognitive science and philosophy   **Expressing the Self** Minyao Huang,Katarzyna Jaszczolt,2018 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume s focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead

stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science   *Biometric Systems* James L. Wayman,Anil K. Jain,Davide Maltoni,Dario Maio,2005-09-20 Biometric Systems provides practitioners with an overview of the principles and methods needed to build reliable biometric systems It covers three main topics key biometric technologies design and management issues and the performance evaluation of biometric systems for personal verification identification The four most widely used technologies are focused on speech fingerprint iris and face recognition Key features include in depth coverage of the technical and practical obstacles which are often neglected by application developers and system integrators and which result in shortfalls between expected and actual performance and protocols and benchmarks which will allow developers to compare performance and track system improvements   **Information Security** Dieter Gollmann,Felix C. Freiling,2012-09-07 This book constitutes the refereed proceedings of the 15th International Conference on Information Security ISC 2015 held in Passau Germany in September 2012 The 23 revised full papers presented together with one invited paper were carefully reviewed and selected from 72 submissions The papers are organized in topical sections on cryptography and cryptanalysis mobility cards and sensors software security processing encrypted data authentication and identification new directions in access control GPU for security and models for risk and revocation   *Nominal and Pronominal Address in Jamaica and Trinidad* Matthias Klumm,2021-09-15 This book examines the various patterns of nominal and pronominal address used in Jamaica and Trinidad the two most populous islands of the English speaking Caribbean Given that the Anglo Caribbean context has so far been largely neglected in address research this study aims to provide an in depth analysis of the linguistic means Jamaicans and Trinidadians have at their disposal and make use of to address each other A particular focus will be on variation in the speakers address behaviour with regard to their sex age social class ethnicity and regional background The study draws both on data from a self compiled corpus of postcolonial Jamaican and Trinidadian literary works and on questionnaire and interview data collected during fieldwork This book contributes to the ever growing body of research in the field of nominal and pronominal address and will be relevant to researchers interested in the fields of sociolinguistics pragmatics and World Englishes   **Deconstructing Creole** Umberto Ansaldo,Stephen Matthews,Lisa Lim,2007-06-22 Deconstructing Creole is a collection of studies aimed at critically assessing the idea of creole languages as a homogeneous

structural type with shared and peculiar patterns of genesis Following up on the critical discussion of notions of creole exceptionalism as historical and ideological constructs this volume tests the basic assumptions that underlie current attempts to present creole structure as a special type from typological as well as sociohistorical perspectives The sum of the findings presented here suggests that careful empirical investigation of input varieties and contact environments can explain the structural output without recourse to an exceptional genesis scenario Echoing calls to dissolve the notion of creolization as a special diachronic process this volume proposes that theoretically grounded approaches to the notions of simplicity complexity transmission etc do not warrant considering so called creole languages as a special synchronic type *Wonder* Frank C. Keil,2022-03-01 How we can all be lifelong wonderers restoring the sense of joy in discovery we felt as children From an early age children pepper adults with questions that ask why and how Why do balloons float How do plants grow from seeds Why do birds have feathers Young children have a powerful drive to learn about their world wanting to know not just what something is but also how it got to be that way and how it works Most adults on the other hand have little curiosity about whys and hows we might unlock a door for example or boil an egg with no idea of what happens to make such a thing possible How can grown ups recapture a child s sense of wonder at the world In this book Frank Keil describes the cognitive dispositions that set children on their paths of discovery and explains how we can all become lifelong wonderers Keil describes recent research on children s minds that reveals an extraordinary set of emerging abilities that underpin their joy of discovery their need to learn not just the facts but the underlying causal patterns at the very heart of science This glorious sense of wonder however is stifled beginning in elementary school Later with little interest in causal mechanisms and motivated by intellectual blind spots as adults we become vulnerable to misinformation and manipulation ready to believe things that aren t true Of course the polymaths among us have retained their sense of wonder and Keil explains the habits of mind and ways of wondering that allow them and can enable us to experience the joy of asking why and how **Biometrics** Anil K. Jain,Ruud Bolle,Sharath Pankanti,2006-04-18 Biometrics Personal Identification in Networked Society is a comprehensive and accessible source of state of the art information on all existing and emerging biometrics the science of automatically identifying individuals based on their physiological or behavior characteristics In particular the book covers General principles and ideas of designing biometric based systems and their underlying tradeoffs Identification of important issues in the evaluation of biometrics based systems Integration of biometric cues and the integration of biometrics with other existing technologies Assessment of the capabilities and limitations of different biometrics The comprehensive examination of biometric methods in commercial use and in research development Exploration of some of the numerous privacy and security implications of biometrics Also included are chapters on face and eye identification speaker recognition networking and other timely technology related issues All chapters are written by leading internationally recognized experts from academia and industry Biometrics Personal Identification in Networked Society is an invaluable work for scientists

engineers application developers systems integrators and others working in biometrics **Audio Source Separation and Speech Enhancement** Emmanuel Vincent,Tuomas Virtanen,Sharon Gannot,2018-10-22 Learn the technology behind hearing aids Siri and Echo Audio source separation and speech enhancement aim to extract one or more source signals of interest from an audio recording involving several sound sources These technologies are among the most studied in audio signal processing today and bear a critical role in the success of hearing aids hands free phones voice command and other noise robust audio analysis systems and music post production software Research on this topic has followed three convergent paths starting with sensor array processing computational auditory scene analysis and machine learning based approaches such as independent component analysis respectively This book is the first one to provide a comprehensive overview by presenting the common foundations and the differences between these techniques in a unified setting Key features Consolidated perspective on audio source separation and speech enhancement Both historical perspective and latest advances in the field e g deep neural networks Diverse disciplines array processing machine learning and statistical signal processing Covers the most important techniques for both single channel and multichannel processing This book provides both introductory and advanced material suitable for people with basic knowledge of signal processing and machine learning Thanks to its comprehensiveness it will help students select a promising research track researchers leverage the acquired cross domain knowledge to design improved techniques and engineers and developers choose the right technology for their target application scenario It will also be useful for practitioners from other fields e g acoustics multimedia phonetics and musicology willing to exploit audio source separation or speech enhancement as pre processing tools for their own needs

Biometrics Jucheng Yang,2011-06-20 Biometrics uses methods for unique recognition of humans based upon one or more intrinsic physical or behavioral traits In computer science particularly biometrics is used as a form of identity access management and access control It is also used to identify individuals in groups that are under surveillance The book consists of 13 chapters each focusing on a certain aspect of the problem The book chapters are divided into three sections physical biometrics behavioral biometrics and medical biometrics The key objective of the book is to provide comprehensive reference and text on human authentication and people identity verification from both physiological behavioural and other points of view It aims to publish new insights into current innovations in computer systems and technology for biometrics development and its applications The book was reviewed by the editor Dr Jucheng Yang and many of the guest editors such as Dr Girija Chetty Dr Norman Poh Dr Loris Nanni Dr Jianjiang Feng Dr Dongsun Park Dr Sook Yoon and so on who also made a significant contribution to the book *Bridges Between Psychology and Linguistics* Donna Jo Napoli,Judy Anne Kegl,Judy Kegl,2013-03-07 Written as a tribute to Lila Gleitman an influential pioneer in first language acquisition and reading studies this significant book clearly establishes the relationships between psychology and linguistics It begins with a thorough examination of issues in developmental psychology continues with questions on perception and cognition studies the realm of

Kaufer,Brian S. Butler,2013-11-26 The design arts from the design of buildings and machines to software and interfaces are associated with types of knowledge and performance thought to be structured modular and systematic Such arts have become increasingly prestigious in our technocratic society Since Aristotle the art of rhetoric was conceived as a loosely structured practical art thought to be limited in the extent to which it could mimic more precise subject matters The art of rhetoric has been controversial since classical times but its status has sunk even lower since the industrial revolution a point when civic cultures began to cede

authority and control to the cultures of specialized experts Many sympathizers of rhetoric have resisted its decline by calling for a civic art of public discourse to stand in opposition to a technocratic specialized discourse that has come increasingly to disenfranchise the ordinary citizen This is the first book to question the rhetoric technical knowledge split from a more fundamental perspective To get some perspective on what is at stake in rhetoric s traditional classification as a practical art the authors explore the distinction between practical and design arts enumerate the various criteria cited in the literature for qualifying a cluster of knowledge and performative skills to count as an art of design show how the knowledge and performative skills associated with the art of rhetoric meet the major requirements of design knowledge propose a general architecture of rhetorical design one descriptive both of civic address and specialized academic argument turn to the Lincoln Douglas debates to embody and provide some empirical support and illustration for their architecture demonstrate how Lincoln and Douglas can be thought of as expert designers whose rhetoric is highly structured and modular and explain how the rhetoric of both rhetorical agents can be represented in the layers and modules that one needs to display plans for buildings software or other design artifacts These layers and modules are not just post hoc annotations of the debates they also illuminate new and systematic ways for viewing the debates and by implication other specimens of rhetoric in terms of strategies of artistic production Kaufer and Butler conclude their presentation by citing some of the research and educational implications that follow from housing rhetoric within the family of design arts **Ugly Feelings** Sianne Ngai,2009-07-01 Ngai mobilizes the aesthetics of unprestigious negative affects such as irritation envy and disgust to investigate not only ideological and representational dilemmas in literature with a particular focus on those inflected by gender and race but also blind spots in contemporary literary and cultural criticism **Didactic Literature in the Roman World** T. H. M. Gellar-Goad,Christopher B. Polt,2023-08-21 This book collects new work on Latin didactic poetry and prose in the late Republic and early Empire and it evaluates the varied shifting roles that literature of teaching and learning played during this period Instruction was of special interest in the culture and literature of the late Roman Republic and the Age of Augustus as attitudes towards education found complex fluid and multivalent expressions The era saw a didactic boom a cottage industry whose surviving authors include Vergil Lucretius Ovid Horace Cicero Varro Germanicus and Grattius who are all reexamined here The contributors to this volume bring fresh approaches to the study of educational literature from the end of the Roman Republic and early Empire and their essays discover unexpected connections between familiar authors Chapters explore interrogate and revise some aspect of our understanding of these generic and modal boundaries while considering understudied points of contact between art and education poetry and prose and literature and philosophy among others Altogether the volume shows how lively experimental and intertextual the didactic ethos of this period is and how deeply it engages with social political and philosophical questions that are of critical importance to contemporary Rome and of enduring interest into the modern world Didactic Literature in the Roman World is of interest to students and scholars of

Latin literature particularly the late Republic and early Empire and of Classics more broadly In addition the volume s focus on didactic poetry and prose appeals to those working on literature outside of Classics and on intellectual history   <u>A Speaker's Guidebook with The Essential Guide to Rhetoric</u> Dan O'Hair,Rob Stewart,Hannah Rubenstein,2011-10-26 A Speaker s Guidebook is the best resource in the classroom on the job and in the community Praised for connecting with students who use and keep it year after year this tabbed comb bound text covers all the topics typically taught in the introductory course and is the easiest to use public speaking text available In every edition hundreds of instructors have helped us focus on the fundamental challenges of the public speaking classroom Improving on this tradition the fifth edition does even more to address these challenges with stronger coverage of overcoming speech anxiety organizing and outlining and more And as the realties of public speaking change so does A Speaker s Guidebook the new edition also focuses on presentational speaking in a digital world from finding credible sources online to delivering presentations in a variety of mediated formats From product description   <u>Remains of the Past in Old English Literature</u> Jan-Peer Hartmann,2025-02-11 Argues for a new understanding of Old English responses to materiality and historical change Human communities have interacted with the material remains of earlier periods for millennia Such archaeological objects including bones coins weapons building materials and architectural landmarks were physically handled reused transformed and reinterpreted they were also depicted in literature This book examines how Old English texts imagine such human encounters with the remnants of the past It explores Elene s perspective on the discovery of the True Cross as a narrative of political spiritual and epistemic translatio and the multiple ways in which The Wanderer and The Ruin use images of ruins and the poetic formula work of giants to construct an unknown and unrecoverable past it also considers the engagements with untimely objects in Beowulf and the Anonymous Old English Legend of the Seven Sleepers and how the Ruthwell Cross Poem and The Dream of the Rood play off figural against literal history As this study demonstrates Old English texts combined and creatively adapted a broad variety of ways of conceptualizing not merely history but indeed the very processes by which historical thought operates Its careful readings show that these texts not only display a deep and conflicted understanding of the philosophical implications of viewing history and temporality through the prism of material objects but also exhibit a powerful capacity for expressing such an understanding through aesthetic strategies   *The Dynamics of Focus Structure* Nomi Erteschik-Shir,1997 In this book Nomi Erteschik Shir develops a new theory of focus structure integrating insights from syntax semantics phonology and pragmatics She explores the role of focus structure in grammar examining the interface between focus structure and syntax the semantics of focus structure and the intonation associated with it Dr Shir defines a grammatical level of f structure focus structure which is an annotated s structure in which topic and focus constituents are marked F structure feeds both PF Phonological Form and semantics and is sensitive to lexical information Dr Shir argues that f structure and not LF Logical Form is the input to a semantic rule of predication One of the major results of Dr Shir s

analysis is that wh movement turns out to be subject to the same constraint which accounts for anaphora and other subject object asymmetries
