The Geography Of Aids:

The Geography of AIDS Gary William Shannon, Gerald F. Pyle, Rashid Bashshur, 1991 Provides information on the AIDS virus and the geographic origin of HIV discusses the impact of AIDS and shows how ill prepared the current health care system is to deal with this disease

An Introduction to the Geography of Health Helen Hazen, Peter Anthamatten, 2019-11-26 In the second edition of An Introduction to the Geography of Health Helen Hazen and Peter Anthamatten explore the ways in which geographic ideas and approaches can inform our understanding of health The book s focus on a broad range of physical and social factors that drive health in places and spaces offers students and scholars an important holistic perspective on the study of health in the modern era In this edition the authors have restructured the book to emphasize the theoretical significance of ecological and social approaches to health Spatial methods are now reinforced throughout the book and other qualitative and quantitative methods are discussed in greater depth Data and examples are used extensively to illustrate key points and have been updated throughout including several new extended case studies such as water contamination in Flint Michigan microplastics pollution West Africa s Ebola crisis and the Zika epidemic The book contains more than one hundred figures including new and updated maps data graphics and photos The book is designed to be used as the core text for a health geography course for undergraduate and lower level graduate students and is relevant to students of biology medicine entomology social science urban planning and public health

The Geography of AIDS in North Carolina Cynthia A. Dy, 1991

The Slow Plague Peter R. Gould, 1993-10-08 Based on research by a leading geographer and specialist in diffusion theory The Slow Plague discloses the geographic dimension of the AIDS pandemic It provides a lucid description of the HIV its origins and the extent to which it has now permeated our lives The author shows how the virus jumps from city to city creating regional epicenters from which it spreads into surrounding areas Four case studies at different geographic scales demonstrate the devastating effects of the disease In Africa the situation is catastrophic in Thailand it is rapidly becoming so In the US there are over 300 000 people with AIDS and more than one million infected by the HIV The relationships between poverty drugs and HIV infection are brought out poignantly in a chapter about the Bronx The author argues that a real understanding of AIDS has been hampered by conscious or unconscious beliefs that those affected are and will continue to be confined to specific minority groups and to parts of the Third World He shows that such views have led to fundamental misconceptions about the pattern of the spread of the disease and about those who will be most at risk now and in the immediate future

A Companion to Health and Medical Geography Tim Brown, Sara McLafferty, Graham Moon, 2009-12-21 A COMPANION TO HEALTH AND MEDICAL GEOGRAPHY A Companion to Health and Medical Geography provides an essential starting point for anyone interested in studying the role of geography and of geographers both past and present in promoting an understanding of issues relating to health and illness Whilst thoroughly mapping out the territory covered by the sub discipline and examining changes in focus and terminology

this book offers a discussion of the major themes from differing methodological and theoretical perspectives Questions of class ethnicity gender age and sexuality are covered throughout the text and case studies within chapters draw upon scholarship from around the globe in order to illuminate key points Organized to promote dialogue and encourage health and medical geographers to rethink sub disciplinary boundaries this Companion provides a unique account of the history of the field and its future potential and possibilities

Plagues in World History John Aberth, 2011-01-16 Plagues in World History provides a concise comparative world history of catastrophic infectious diseases including plague smallpox tuberculosis cholera influenza and AIDS Geographically these diseases have

spread across the entire globe temporally they stretch from the sixth century to the present John Aberth considers not only the varied impact that disease has had upon human history but also the many ways in which people have been able to influence diseases simply through their cultural attitudes toward them The author argues that the ability of humans to alter disease even without the modern wonders of antibiotic drugs and other medical treatments is an even more crucial lesson to learn now that AIDS swine flu multidrug resistant tuberculosis and other seemingly incurable illnesses have raged worldwide Aberth's comparative analysis of how different societies have responded in the past to disease illuminates what cultural approaches have been and may continue to be most effective in combating the plagues of today *The Human Mosaic* Terry G. Jordan-Bychkov, 2005-08-19 Carrying forward the legacy of original author Terry Jordan Bychkov Mona Domosh and new coauthors Roderick Neumann and Patricia Price offer this thoroughly updated new edition of the acclaimed introduction to the cultural geography of the world today The result is a text that maintains its original distinctive style while addressing contemporary issues and situations that students care about most importantly the continuing phenomenon of globalization The Thematic Approach of *The Human Mosaic* The *Human Mosaic* introduces five themes in the opening chapter culture region cultural diffusion cultural ecology cultural interaction and cultural landscape then uses those themes as a framework for the topical chapters that follow Each theme is applied to a variety of geographical topics demography agriculture the city religion language ethnicity politics industry folk and popular culture Through this organization students are able to relate to the most important aspects of cultural geography at every point in the text *Human Immunodeficiency Virus Infections in the United States* ,1987 *Morbidity and Mortality Weekly Report* ,1987-07 **Geography and Drug Addiction** Yonette F. Thomas, Douglas Richardson, Ivan Cheung, 2008-09-24 Making Connections Geography and Drug Addiction Geography involves making connections connections in our world among people and places cultures human activities and natural processes It involves understanding the relationships and connections between seemingly disparate or unrelated ideas and between what is and what might be Geography also involves connecting with people When I first encountered an extraordinarily vibrant intelligent and socially engaged scientist at a private dinner several years ago I was immediately captivated by the intensity of her passion to understand how and why people become addicted to drugs and what could be done to treat or prevent drug addiction Fortunately she was willing to think beyond the bounds of her own discipline in her search for answers Our conversation that evening which began with her research on fundamental biochemical processes of drug addiction in the human body evolved inevitably to an exploration of the ways in which research on the geographical context of drug addiction might contribute to the better understanding of etiology of addiction its diffusion its interaction with geographically variable environmental social and economic factors and the strategies for its treatment and prevention This fascinating woman I soon learned was Nora Volkow the Director of the National Institute on Drug Abuse as well as the granddaughter of Leon Trotsky
