The Geography Of Nationalism In Russia And The Ussr:

The Geography of Nationalism in Russia and the USSR Robert J. Kaiser, 2017-03-14 The Geography of Nationalism in Russia and the USSR is an important addition to the small library of essential works on the collapse of the Soviet empire. The first attempt to construct and test broad theoretical propositions about place and territoriality in the making of nations, it examines the critical social processes underlying the formation of nations and homelands in Russia and the USSR during the nineteenth and twentieth centuries. Robert Kaiser finds that for the most part, national self-consciousness was only beginning to supplant a localist mentality by the time of World War I. The national problem faced by Lenin was fundamentally different from the more difficult nationalist challenge that confronted Gorbachev. In Kaiser's place-based theory, the homeland once created in the imaginations of the indigenous masses powerfully structured national processes and international relations. Indigenization from below became an active competitor with nationality policies that promoted Russification, resulting in the restructuring of ethnic stratification to favor indigenes in their own respective home republics and to challenge Russian dominance outside Russia. The revolutionary changes occurring since 1989, Kaiser argues, should therefore be seen as part of a longer process of indigenization. From Socialist to Post-Socialist Cities Alexander C. Diener,Joshua Hagen,2016-04-14 The development of post socialist cities has become a major field of study among critical theorists from across the social sciences and humanities Originally constructed under the dictates of central planners and designed to serve the demands of command economies post socialist urban centers currently develop at the nexus of varied and often competing economic cultural and political forces Among these nationalist aspirations previously simmering beneath the official rhetoric of communist fraternity and veneer of architectural conformity have emerged as dominant factors shaping the urban landscape This book explores this burgeoning field of research through detailed cases studies relating to the cultural politics of architecture urban planning and identity in the post socialist cities of Eurasia This book was published as a special issue of Nationalities Papers *Kazakhstan in the Making* Marlene Laruelle,2016-11-21 Kazakhstan is one of the best known success stories of Central Asia perhaps even of the entire Eurasian space It boasts a fast growing economy at least until the 2014 crisis a strategic location between Russia China and the rest of Central Asia and a regime with far reaching branding strategies But the country also faces weak institutionalization patronage authoritarianism and regional gaps in socioeconomic standards that challenge the stability and prosperity narrative advanced by the aging President Nursultan Nazarbayev This policy oriented analysis does not tell us a

lot about the Kazakhstani society itself and its transformations This edited volume returns Kazakhstan to the scholarly spotlight offering new multidisciplinary insights into the country's recent evolution drawing from political science anthropology and sociology It looks at the regime's sophisticated legitimacy mechanisms and ongoing quest for popular support It analyzes the country's fast changing national identity and the delicate balance between the Kazakh majority and the Russian speaking minorities It explores how the society negotiates deep social transformations and generates new hybrid local and global cultural references

The Decline of Regionalism in Putin's Russia J. Paul Goode, 2011-05-11 This book reassesses Putin's attempt to reverse the decentralization of power that characterised centre regional relations in the 1990s focusing on regional responses to Putin's federal reforms It explains the decline of regionalism after 2000 in terms of the dynamics of regional boundaries understood as the juridical boundaries which demarcate a region's territorial extent and its resources institutional boundaries that sustain regional differences and cultural boundaries that define the ethnic or technocratic principles on which a region could claim legitimate existence The book questions the conventional wisdom regarding the success of Putin's regime It shows how regional governors responded not by attempting to deflect the reforms with outright resistance but by mimicking Putin's centralisation of power at the regional level In turn this facilitated the homogenisation of regional political regimes and regional mergers The book demonstrates how the reordering of regions advanced sporadically how pockets of resistance persist and how the potential for the revival of regionalism continues

The International Politics of Eurasia: v. 9: The End of Empire? Comparative Perspectives on the Soviet Collapse S. Frederick Starr, Karen Dawisha, 2016-09-16 First Published in 1997 This book is the ninth in a series of ten volumes produced by the Russian Littoral Project The project shares the conviction that the transformation of the former Soviet republics into independent states demands systematic analysis of the determinants of the domestic and foreign policies of the new countries The series of volumes is intended to provide a basis for comprehensive scholarly study of these issues This volume was shaped by the author's view that future scholarship about the post Soviet world requires both specialized research and broad gauge studies that carefully juxtapose the breakup of the Soviet empire with the transformation of other multinational empires

The Struggle against Imperialism Edward H. Judge, John W. Langdon, 2018-06-15 This concise and engaging book argues that the Cold War and anti colonial movements should properly be studied and taught together not as distinct developments but rather as interwoven aspects of a complex global transformation The authors provide a cogent and concise description of the post World War II era and reveal connective dimensions of that era that remain hidden in books that focus primarily on either the Cold War or the struggles against imperial rule It not only deals with anti colonialism and Cold War together but also portrays the Cold War as a contest between anti imperialist empires capped by the collapse of one of them the multicultural trans regional Soviet realm in a work that is engaging and accessible to both students and general readers

Russian Nationalism Since 1856 Astrid S. Tuminez, 2000 This thoughtful book describes the range of nationalist ideas that have taken root in Russia since 1856 Drawing on a wide range of archival documents and unparalleled interview material from the post Soviet period Tuminez analyzes two cases_ Russian panslavism in 1856 1878 and great power nationalism in 1905 1914_ when aggressive nationalist ideas clearly influenced Russian foreign policy and contributed to decisions to go to war Yet not all forms of nationalism have been malevolent and the author assesses competing nationalist ideologies in the post Soviet period to clarify the conditions under which a particularly belligerent nationalism could flourish and influence Russian international behavior **The End of Empire?** Karen Dawisha, Bruce Parrott, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an Informa company **Rulers and Victims** Geoffrey Hosking, 2006-01-01 Many westerners used to call the Soviet Union Russia Russians too regarded it as their country but that did not mean they were entirely happy with it In the end in fact Russia actually destroyed the Soviet Union How did this happen and what kind of Russia emerged In this illuminating book Geoffrey Hosking explores what the Soviet experience meant for Russians One of the keys lies in messianism the idea rooted in Russian Orthodoxy that the Russians were a chosen people The communists

reshaped this notion into messianic socialism in which the Soviet order would lead the world in a new direction Neither vision however fit the community spirit of the Russian people and the resulting clash defined the Soviet world Hosking analyzes how the Soviet state molded Russian identity beginning with the impact of the Bolshevik Revolution and civil war He discusses the severe dislocations resulting from collectivization and industrialization the relationship between ethnic Russians and other Soviet peoples the dramatic effects of World War II on ideas of homeland and patriotism the separation of Russian and Soviet culture leadership and the cult of personality and the importance of technology in the Soviet world view At the heart of this penetrating work is the fundamental question of what happens to a people who place their nationhood at the service of empire There is no surer guide than Geoffrey Hosking to reveal the historical forces forging Russian identity in the post communist world World Terrorism: An Encyclopedia of Political Violence from Ancient Times to the Post-9/11 Era James Ciment,2015-03-10 First Published in 2015 This collection holds three volumes Terrorism is a term that defies easy definition and its meaning has also changed over the course of history Because this encyclopedia aims at comprehensiveness across time geography and the conceptual landscape it applies the broadest definition of terrorism the use of violence or the threat of violence to effect political change through fear in which the victims of the violence The encyclopedia is divided into six parts **Central Asia and the Caucasus** Touraj Atabaki,Sanjyot Mehendale,2004-11-10 This book focuses on the dynamics among transnational forces within and beyond Central Asia and explores the roles played by diaspora communities in Central Asia and the Caucasus
