The Geomorphology Of North West England:

The Geomorphology of North-west England Richard Hugh Johnson, 1985 Landscapes and Landforms of England and Wales Andrew Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales. These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay. The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area. In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed. These include the famous coastal cliffs and landslides, granite tors of Dartmoor, formerly glaciated mountains of Snowdonia and the Lake District, karst of Yorkshire and many others. The geomorphology of London and the Thames is also included. Providing a unique reference guide to the geomorphology of England and Wales, the book is lavishly illustrated with diagrams, colour maps and photos and written in an easy to read style. The contributing authors are distinguished geomorphologists with extensive experience in research, writing and communicating science to the public. The book will not only be of interest to geoscientists but will also benefit specialists in landscape research, geoconservation, tourism and environmental protection. *The Limestones and Caves of Northwest England* Tony Waltham, 1974 Geomorphological Processes and Landscape Change David L. Higgitt, E. Mark Lee, 2011-07-15 The expert contributors to this cutting edge volume provide an overview of geomorphological process activity and landscape change in Britain over the past 1000 years. The range of the book is unusually broad encompassing hillslope, valley floor and floodplain, fluvial, estuarine and coastal processes. Provides an overview of geomorphological process activity and landscape change in Britain over the past 1000 years. The range of the book is unusually broad encompassing hillslope, valley floor and floodplain, fluvial, estuarine and coastal processes. Considers the relevance of technological and conceptual approaches to understanding landscape dynamics. Examines key process environments highlighting significant trends and the influence of human activity and incorporating examples and modelling. Encourages geographers to look forward to the challenges that geomorphology faces in the new millennium. The story of the island's colonisation by plants and animals sets the scene for the later volumes which deal with the impact of man's arrival. A key element of the volume is an in depth

examination of the contemporary landscape with an appraisal of how the environment has affected man and how man has affected the environment *Geomorphological Techniques* Andrew Goudie,2003-09-02 The specialist contributors to *Geomorphological Techniques* have thoroughly augmented and updated their original authoritative coverage with critical evaluations of major recent developments in this field A new chapter on neotectonics reflects the impact of developments in tectonic theory and heavily revised sections deal with advances in remote sensing image analysis radiometric dating geomorphometry data loggers radioactive tracers and the determination of pore water pressure and the rates of denudation

British Regional Geology N. Aitkenhead,2002 Regional Geology Guides provide a broad view and interpretation of the geology of a region **Limestones and Caves of Wales** Trevor D. Ford,2011-06-02 This 1989 book covers the geology and geomorphology of the Carboniferous Limestone areas of Wales and summarises the state of knowledge of the main cave systems including the longest and deepest in Britain It sets out to assess the morphological evolution of the cave systems and the associated landscape features particularly in light of the effects of successive glaciations The book also covers related subjects including the biology of the cave faunas important archaeological discoveries in Welsh caves and the hydrology of the limestone masses On its publication this was the first book to give a general survey of the subject It will continue to provide a valuable reference for cavers and also for geologists geographers biologists and archaeologists with special interests in the area *The Origins of Lancashire* Denise Kenyon,1991 *The Geology of England and Wales* P. J.

Brenchley,Peter Franklin Rawson,2006 This second edition of *The Geology of England and Wales* is considerably expanded from its predecessor reflecting the increase in our knowledge of the region and particularly of the offshore areas Forty specialists have contributed to 18 chapters which cover a time range from 700 million years ago to 200 million years into the future A new format places all the chapters in approximately temporal order Both offshore and economic geology now form an integral part of appropriate chapters **Handbook of the Marine Fauna of North-West Europe** Peter J.

Hayward,John S. Ryland,2017-02-23 This authoritative guide enables accurate identification of the common components of the inshore benthic invertebrates of the British Isles and adjacent European coasts as well as a substantial proportion of fish species This new edition builds upon the strengths of the earlier work and is thoroughly revised throughout to incorporate advances in both the taxonomy and ecology of the organisms concerned *England's Coastal Heritage* Michael

Fulford,Timothy Champion,Antony Long,2013-04-15 England's coastal zone contains an important legacy of historic assets including a complex array of fragile and irreplaceable archaeological remains This report documents the recorded coastal archaeological resource and identifies future themes for survey and investigation **Pleistocene Environments in the**

British Isles R.L. Jones,D.H.
