Archaeologia Cantiana, 1968

Tudor England Lucy E. C. Wooding, 2022-01-01 A compelling authoritative account of the brilliant conflicted visionary world of Tudor England When Henry VII landed in a secluded bay in a far corner of Wales it seemed inconceivable that this outsider could ever be king of England Yet he and his descendants became some of England's most unforgettable rulers and gave their name to an age The story of the Tudor monarchs is as astounding as it was unexpected but it was not the only one unfolding between 1485 and 1603 In cities towns and villages families and communities lived their lives through times of great upheaval In this comprehensive new history Lucy Wooding lets their voices speak exploring not just how monarchs ruled but also how men and women thought wrote lived and died We see a monarchy under strain religion in crisis a population contending with war rebellion plague and poverty Remarkable in its range and depth *Tudor England* explores the many tensions of these turbulent years and presents a markedly different picture from the one we thought we knew

**Eighteenth-Century Britain, 1688-1783** Jeremy Black, 2008-09-10 Jeremy Black sets the politics of eighteenth century Britain into the fascinating context of social economic cultural religious and scientific developments The second edition of this successful text by a leading authority in the field has now been updated and expanded to incorporate the latest research and scholarship

**Henry VIII's Coastal Artillery Fort at Camber Castle, Rye, East Sussex** Martin Biddle, Jonathan Hillier, Ian Scott, 2014-02-15 Camber Castle is located on the south coast of England a short distance to the south of the town of and Cinque Port of Rye Largely constructed between 1539 and 1543 it was an elaborate artillery fortification that represented an important element of Henry VIII's Device or coastal defence network put in place from 1539 as a response to the threat of invasion following England's breach with Rome The castle was

operational for 100 years By the 1630s the steady advance of the coastline had left it stranded well inland from the sea This combined with changes in the concept of artillery fortification resulted in its decommissioning in 1637 Unusually Camber Castle was not adapted for continued use through the 18th and 19th centuries and survives as an example of a largely unmodified Henrician artillery fort It displays several clear and discrete phases of construction which reflect changes in thinking about the design of fortifications The construction phase of 1539-40 under the direction of Stephen von Haschenperg is of particular interest since it represents the first attempt to build in England an artillery fortress of ultimately Italian inspiration Doubts about the effectiveness of von Haschenperg's design led however to a complete remodelling of the castle's defences along more conservative lines undertaken in 1542-3 The castle which is in the guardianship of English Heritage has seen numerous campaigns of research survey and excavation This volume draws together all the available evidence to provide a full and synthesised account of the current state of knowledge regarding this monument It includes a revised and expanded version of Martin Biddle's authoritative study originally published in *The History of the King's Works* Full reports are also included on the artefact and animal bone assemblages which are of considerable importance for the early post medieval period These include the extensive 16th and early 17th century assemblage of English and imported pottery a German ceramic tile stove a wide range of 16th and 17th century military artefacts and a significant collection of vessel glass including facon de Venise cristallo The animal bone collection is a useful benchmark for the zoo archaeology of post medieval England and provides evidence for early livestock improvements There is also a detailed review of the surviving building account for von Haschenperg's fortifications

**The Agrarian History of England and Wales: Volume 2, 1042-1350** H. E. Hallam, H. P. R. Finberg, Joan Thirsk, 1967 This 1988 volume examines the agrarian history of England and Wales from Edward the Confessor to the outbreak of the Black Death in 1348

London's Industrial Heritage Geoff Marshall, 2013-03-01 Did you know that apart from Lancashire the greatest concentration of Boulton the world's first plastic material was synthesised in the East End there was even a gasworks opposite the Palace of Westminster Clerkenwell was a centre for watch and clock makers the River Thames used to be full of colliers bringing coal from Newcastle Joseph Bramah invented his water closet and hydraulic pump here and Henry Maudslay made machines to make machines Many household names began in London Schweppes Crosse Blackwell and Vauxhall motor cars The list of fascinating facts goes on In this the first book of its kind on the subject Geoff Marshall provides an enthralling overview of London's industrial face through history

*Locating The Industrial Revolution: Inducement And Response* Eric L Jones, 2010-05-27 The familiar industrialisation of northern England and less familiar de industrialisation of the south are shown to have depended on a common process Neither rise nor decline resulted from differences in natural resource endowments since they began before the use of coal and steam in manufacturing Instead political certainty competitive ideology and Enlightenment optimism encouraged investment in transport and communications This integrated the national

market intensifying competition between regions and altering economic distributions Despite a dysfunctional landed system agricultural innovation meant that the south's comparative advantage shifted towards the farm sector Meanwhile its manufactures slowly declined Once industry clustered in the less benign northern environment technological changes in manufacturing accumulated there This book portrays the Industrial Revolution as deriving from economic competition within unique political arrangements

**Huguenot Heritage** Robin D. Gwynn, 2000-01-01 Director of the 1985 Huguenot Heritage tercentenary commemoration Gwynn surveys the contributions to Britain and Ireland by the French speaking Calvinist refugees who crossed the Channel between the 16th and 18th centuries Among the topics are the situation in France settlements in England government reaction crafts and trades churches opposition the impact of Louis XIV's defeat and assimilation The first edition was published by Routledge in 1985 the second incorporates literature published and artefacts discovered since then and is more comprehensively footnoted All referencing material has been updated in the light of new findings And the plate section has been expanded to take into account recently available pictures of Huguenot artefacts and scenes

**A Passion For Trees** Maggie Campbell-Culver, 2014-03-27 Given the extent of his influence on 17th century life and his lasting impact on the British landscape it is remarkable that no book has been written before about John Evelyn He was a longstanding friend of Samuel Pepys who wrote of him A most excellent person he is and must be allowed a little for conceitedness but he may well be so being a man so much above others a founder member of the Royal Society and a prolific writer and diarist He was an early advocate of the garden city but his most important work was *Sylva* a Discourse of Forest Trees *Sylva* was presented to the Royal Society to promote the planting of timber trees for the supply of the Navy the employment and advantage of the poor as well as the ornamenting of the nation He was responsible for the first great raft of tree planting and for a great influx of tree introductions to Britain Maggie Campbell Culver's book like *Sylva* has at its core a section detailing the characteristics history and uses of 33 trees incorporating the advice Evelyn gave and demonstrating its relevance still in the 20th century Not only was Evelyn probably the first horticultural writer to show an appreciation of the aesthetic benefits of trees in our landscape he is shown to be a founder father of the modern conservation movement
