The Global Brain Awakens Our Next Evolutionary Leap:

The Global Brain Awakens Peter Russell, 2000 Not too many philosophers have taken a serious crack at explaining what the advent of the Internet means to the future of human society While technology takes a back seat to spirituality in *The Global Brain Awakens* author Peter Russell takes all the recent hype about global interconnectivity to a fascinating extreme The Internet as the central nervous system to a newly evolved global organism Russell draws parallels between the development of the central nervous system in living organisms and creation of Web communications here on Earth which he argues is the biggest living organism of them all Unfortunately this intriguing line of thought is undermined by the book's conclusion which collapses into a mire of hokey higher consciousness that lacks the same critical reasoning *getAbstract* recommends this book to anyone interested in an alternative vision of a Web enhanced future provided you are not turned off by its new age clichés [The Biosphere and Noosphere Reader](#) David Pitt, Paul R. Samson, 2012-10-02 Foreword written by Mikhail S Gorbachev Reproduction of work previously unpublished in English Combines new writing with traditional classics alongside **Chaos Point 2012 and Beyond** Ervin Laszlo, 2025-09-12 According to Ervin Laszlo we are at a critical juncture in history a decision window where we face the danger of global collapse or the opportunity for global renewal He presents a concise overview of the current crises we face environmental social economic and institutional persuasively arguing that if something is not done quickly we face disaster We have the opportunity right now to head off trends that could lead to a critical tipping point Laszlo's solution is a global consciousness shift that entails a new universal morality a new ecological awareness and a reverence and caring for the earth Included here are concrete suggestions of what the reader can do to promote this shift in evolutionary consciousness **Law in the Time of Oxymora** Rostam J. Neuwirth, 2018-05-16 What do different concepts like true lie bad luck honest thief old news spacetime glocalization symplecity sustainable development constant change soft law substantive due process pure law bureaucratic efficiency and global justice have in common What connections do they share with innumerable paradoxes like the ones of happiness time globalization sex and of free will and fate *Law in the Time of Oxymora* provides answers to these conundrums by critically comparing the apparent rise in recent years of the use of rhetorical figures called essentially oxymoronic concepts i.e. oxymoron enantiosis and paradoxes in the areas of art science and law Albeit to varying degrees these concepts share the quality of giving expression to apparent contradictions Through this quality they also challenge the scientific paradigm rooted in the dualistic thinking and binary logic that is traditionally used in the West as opposed to the East where a paradoxical mode of thinking and fuzzy logic is said to have been cultivated Following a review of oxymora and paradoxes in art and various scientific writings hundreds of hard cases featuring oxymora and a comprehensive review of the legal literature are discussed revealing evidence suggesting that the present scientific paradigm of dualism alone will no longer be able to tackle the challenges arising from increasing diversity and complexity coupled with an apparent acceleration of

change Law in the Time of Oxymora reaches the surprising conclusion that essentially oxymoronic concepts may inaugurate a new era of cognition involving the ways the senses interact and how we reason think and make decisions in law and in life

Gaia Luminous Kiara Windrider,2023-08-19 his is the most comprehensive book on planetary shift I have ever read The physical realities cosmic perspectives and dynamics involved are all addressed Rapid climate changes galactic and solar cycles volcanism ice ages and magnetic reversals are touched upon in a rich and concise way Gaia Luminous goes to the very heights and depths of what this great change is all about Barry Martin Snyder Birthing the Luminous Self This remarkable book showcases Kiara s extraordinary ability to integrate summarize and structure a vast range of topics from deeply spiritual teachings to the latest discoveries in science Kiara brilliantly and eloquently connects the dots and presents clear and practical solutions for these complex and precarious times Yves Nager Find your Life Purpose For those who are consciously aware of the challenging implications of these times and seek both cosmic perspectives and spiritual guidance Gaia Luminous is an invaluable resource of scholarly and balanced investigation combined with profound personal experience Simon Peter Fuller Rising out of Chaos Kiara Windrider serves up a full course of scientific inquiry evolutionary thinking and sacred insights from a wide variety of traditions This thrilling read feeds our sense of the possible and activates our commitment to a bold new vision for humanity James O Dea The Conscious Activist

Tantalisingly Close Imar Vries, 2025-10-01 While studies of mobile wireless communication devices usually focus on their social implications De Vries proposes to venture into a more historical and comparative direction to shed light on our preoccupation with them in the first place He constructs an archaeological view of the development of communication technologies over the past 200 years providing a comprehensive account of how persistent hopes and beliefs have come to give mobile wireless media such a prominent position today Our expectations and uses of them are surprisingly similar to those of older media consequently they reconfirm the idea that living in an anytime anywhere world is both a blessing and a curse and that the desire for sublime communication is a tragic yet highly powerful regulative principle in our media evolution

The Miracle of Death Betty J. Kovács, 2003 The Miracle of Death comes to us at a time when transformation is necessary for our survival Every page of this testament to life loosens our grip on the imagination and opens us to dimensions of the mind that speak in images metaphors and symbols We emerge from these experiences surrounding death with an expanded view of life a path more illuminated and the courage to live by the wisdom of our visions We adjust our senses to experience new ways of hearing seeing and knowing what is real We go inward on our own journeys to confront the mysteries of our existence the mysteries of life and death and we return knowing how to live our lives Foreword by Anne Baring Includes Index Further Reading Intelligent Information and Database Systems Ngoc Thanh Nguyen, Satoshi Tojo, Le Minh Nguyen, Bogdan Trawiński, 2017-03-23 The two volume set LNAI 10191 and 10192 constitutes the refereed proceedings of the 9th Asian Conference on Intelligent Information and Database Systems ACIIDS 2017 held in Kanazawa Japan in April 2017 The total of 152 full papers accepted for publication in these proceedings was carefully reviewed and selected from 420 submissions They were organized in topical sections named Knowledge Engineering and Semantic Web Social Networks and Recommender Systems Text Processing and Information Retrieval Intelligent Database Systems Intelligent Information Systems Decision Support and Control Systems Machine Learning and Data Mining Computer Vision Techniques Advanced Data Mining Techniques and Applications Intelligent and Context Systems Multiple Model Approach to Machine Learning Applications of Data Science Artificial Intelligence Applications for E services Automated Reasoning and Proving Techniques with Applications in Intelligent Systems Collective Intelligence for Service Innovation Technology Opportunity E Learning and Fuzzy Intelligent Systems Intelligent Computer Vision Systems and Applications Intelligent Data Analysis Applications and Technologies for Internet of Things Intelligent Algorithms and Brain Functions Intelligent Systems and Algorithms in Information Sciences IT in Biomedicine Intelligent Technologies in the Smart Cities in the 21st Century Analysis of Image Video and Motion Data in Life Sciences Modern Applications of Machine Learning for Actionable Knowledge Extraction Mathematics of Decision Sciences and Information Science Scalable Data Analysis in Bioinformatics and Biomedical Informatics and Technological Perspective of Agile Transformation in IT organizations Getting to the Better Future John E. Renesch, 2001 Renesch puts forth a vision for historic transformation for all humankind as he pictures a global future full of possibilities a much better future than the one that appears most likely if we rely upon forecasts based on existing trends Not only that the author points directly to the business community as the segment of our society that can best lead the rest of the world in such an incredible transition for all humanity **Beyond Change Management** Dean Anderson, Linda Ackerman Anderson, 2002-02-28 Transform your organization To truly transform your organization you must learn to transform your own mindset Beyond Change Management the only book specifically about the interaction of leadership style mindset and the change process revolutionizes leaders approach to transformational change Shattering the myth that

transformation can be managed this book part of the Practicing OD Series offers you new directions and ways of thinking and behaving that are essential for successful change Its unique approach brings organization development OD into the mainstream of leaders approaches to change expanding and integrating the fields of OD leadership change management and consciousness You ll also get ready to use worksheets questionnaires guidelines Powerful business solutions to the current chaos facing many organizations today Dean Anderson and Linda Ackerman Anderson get to the heart of change the human touch by using timeless techniques and tools Ken Blanchard coauthor The One Minute Manager and Gung Ho The authors combine their keen observations sharp insights and open hearts to produce towering works that will stand as lasting contributions to leadership and organization development t hey guide us along a path of personal discovery so that we may have the strength of spirit to risk the creation of more meaningful organizations Jim Kouzes coauthor The Leadership Challenge and Encouraging the Hear *Rave Culture and Religion* Graham St John,2004-06 Vast numbers of western youth have attached primary significance to raving and post rave experiences This collection of essays explores the socio cultural and religious dimensions of the rave raving and rave derived phenomena *The Sustainability Mindset Principles* Isabel Rimanoczy,2020-11-29 As we increase our awareness of the planetary challenges and how they intersect with the discipline or profession we choose to focus on we have put our attention on the external forces and impacts What remains untouched however is the set of beliefs values assumptions mental processes and paradigms that we hold and share our mindset But how do we change a mindset This book is the first to introduce the 12 Principles for a Sustainability Mindset presenting educators with a framework that makes it easy to include them into teaching plans and lessons of any discipline Written in a very clear and practical way the book provides examples checklists tips and tools for professionals and educators It transforms the development of a much needed mindset for sustainability into an accessible fun and intuitive task The book is written with educators from a variety of disciplines in mind including but not limited to management educators coaches and trainers No other book comes close to providing such a well organized and solid way of starting to shift our mindsets in the direction of sustainability **Beyond Words** Marta Williams,2010-10-14 In this powerful follow up to her groundbreaking book Learning Their Language Marta Williams presents fascinating stories that explore the connections among humans nature and animals and demonstrates the effective and life enhancing techniques of intuitive communication *The New Business of Business* Willis W. Harman,Maya Porter,1997-04 Articles examine the responsibility and opportunity of businesses to make significant contributions to the future of humanity **Big Bang Being** Isabel Rimanoczy,Ervin Laszlo,2017-09-08 When asked for the definition of mental health and fulfilment Sigmund Freud had two words lieben und arbeiten love and work In this book we will find how 16 business leaders brought together their compassion their caring for others and the world with their work True only on rare occasions are we able to meet the person behind initiatives that made a positive impact on the world even less have an in depth view into their feelings concerns hesitations doubts and most

intimate thoughts What is seen publicly is the initiative the impact on the bottom line and the community or sometimes on the environment Yet it is their personal stories that can be most inspirational since they draw our attention to the fact that amazing achievements start in simple ways with just the thinking of one individual And when we find out that the exemplary individuals have many very human aspects that we identify with and find in ourselves it brings us closer and particularly it may even trigger in us the question If she could do it I wonder what could I do The interviews however were only the beginning of the journey The lessons of the interviews made it possible to identify how we can all develop a sustainability mindset in other words the thinking and the being that can take us from breakdown to breakthrough on this planet Each one of us can play a part in leading the change in fact we are already playing a part we are just not necessarily aware if that is the part we would like to play or aware that we choose the change we are contributing to unfold Part I presents the 16 leaders including a summary of their story and their initiatives Part II goes a little deeper as you will find two dimensions that were not obvious but which underlie the way these business leaders championed the initiatives the Thinking and the Being Part III explores why sustainability change is so slow and addresses the elephant in the room the values and beliefs that anchor our Western Weltanschauung or worldview Part IV addresses the alternatives that we have to convert the unsustainable values into opportunities that will permit humanity to thrive and to break through the obstructions that prevent us from stasis Finally Part V takes us beyond the tipping point and presents us with an opportunity to evolve as humans developing a new way of thinking and being on this planet This transformation is so radical and significant that the author calls it the Big Bang Being
