Smith, Dirk Syndram, 2019-11-25

Featuring more than 150 treasures from several of the world's most prestigious collections *Making Marvels* explores the vital intersection of art technology and political power at the courts of early modern Europe. It was there from the sixteenth through eighteenth centuries that a remarkable outpouring of creativity and learning gave rise to exquisite objects that were at once beautiful works of art and technological wonders. By amassing vast glittering collections of these ingeniously crafted objects, princes flaunted their wealth and competed for mastery over the known world. More than mere status symbols, however, many of these marvels ushered in significant advancements that have had a lasting influence on astronomy, engineering, and even international politics. Incisive texts by leading scholars situate these works within the rich, complex symbolism of life at court where science and splendor were pursued with equal vigor and together contributed to a culture of magnificence.

The Rough Guide to Germany Gordon McLachlan, 2004 Comprehensive and authoritative, this guide to Germany offers up to the minute details of the ongoing changes caused by reunification as well as providing information and advice on accommodation, restaurants, and sightseeing.

Enlightened Animals in Eighteenth-Century Art Sarah Cohen, 2021-02-11 How do our senses help us to understand the world? This question, which preoccupied Enlightenment thinkers, also emerged as a key theme in depictions of animals in eighteenth-century art. This book examines the ways in which painters such as Chardin as well as sculptors, porcelain modelers, and other decorative designers portrayed animals as sensing subjects who physically confirmed the value of material experience. The sensual style known today as the Rococo encouraged the proliferation of animals as exemplars of empirical inquiry, ranging from the popular subject of the monkey artist to the alchemical wonders of the life-sized porcelain animals created for the Saxon court. Examining writings on sensory knowledge by La Mettrie, Condillac, Diderot, and other philosophers side by side with depictions of the animal in art, Cohen argues that artists promoted the animal as a sensory subject while also validating the material basis of their own professional practice.
