Copyright Office,1979      Mexican Crafts and Craftspeople Marian Harvey,1987      *The Weaver's Craft* Adrienne D. Hood,2011-01-01 Cloth was one of the most important commodities in the early modern world and colonial North Americans had to develop creative strategies to acquire it Although early European settlers came from societies in which hand textile production was central to the economy local conditions in North America interacted with traditional craft structures to create new patterns of production and consumption *The Weaver s Craft* examines the development of cloth manufacture in early Pennsylvania from its roots in seventeenth century Europe to the beginning of industrialization Adrienne D Hood s focus on Pennsylvania and the long sweep of history yields a new understanding of the complexities of early American fabric production and the regional variations that led to distinct experiences of industrialization Drawing on an extensive array of primary sources combined with a quantitative approach the author argues that in contrast to New England rural Pennsylvania women spun the yarn that a small group of trained male artisans wove into cloth on a commercial basis throughout the eighteenth century Their production was considerably augmented by consumers purchasing cheap cloth from Europe and Asia making them active participants in a global marketplace Hood s painstaking research and numerous illustrations of textile equipment swatch books and consumer goods will be of interest to both scholars and craftspeople      **The Publishers Weekly** ,1921      *The Golden Age of Brazil 1695* C. jewellers but it has been a family tradition extending across generations Gold jewellery makers sunars swarnakars are the spine of the jewellery industry They acquired the skill of making jewellery from the experienced and learned gold smithery karigars either from their ancestors who were engaged in this business or from the craftsmen cum petty traders The co relations of castes religion culture economy and class are intertwined with each other in such a way that made the gold jewellery industry sustainable Surprisingly there is an absence of literature on understanding the structural and functional aspects of the gold jewellery industry in India This book explores the roles of sunars swarnakars goldsmith or jewellery makers consumers trade and the policies that bring a change in the gold jewellery industry in India and India s position in the global market scenario By focusing on their way of life the book brings unique insights into the social and economic experience of the unorganised gold jewellery sector and the role of consumers in production *The Craft of the Cocktail* Dale DeGroff,2010-07-14 The first real cookbook for cocktails featuring 500 recipes from the world s premier mixologist Dale DeGroff Covering the entire breadth of this rich subject The Craft of the Cocktail provides much more than merely the same old recipes it delves into history personalities and anecdotes it shows you how to set up a bar master important techniques and use tools correctly and it delivers unique concoctions many featuring DeGroff s signature use of fresh juices as well as all the classics It begins with the history of spirits how they re made but without too much boring science the development of the mixed drink and the culture it created all drawn from DeGroff s vast library of vintage cocktail books Then on to stocking the essential bar choosing the right tools and ingredients and mastering key techniques the same information that DeGroff shares with the bartenders he trains in seminars and through his videos And then the meat of the matter 500 recipes including everything from tried and true classics to of the moment originals Throughout are rich stories vintage recipes fast facts and other entertaining asides Beautiful color photographs and a striking design round out the cookbook approach to this subject highlighting the difference between an under the bar handbook and a stylish full blown treatment The Craft of the Cocktail is that treatment destined to become the bible of the bar **The Cumulative Book Index** ,1908 A world list of books in the English language **Selling Tradition** Jane S. Becker,2000-11-09 The first half of the twentieth century witnessed a growing interest in America s folk heritage as Americans began to enthusiastically collect present market and consume the nation s folk traditions Examining one of this century s most prominent folk revivals the reemergence of Southern Appalachian handicraft traditions in the 1930s Jane Becker unravels the cultural politics that bound together a complex network of producers reformers government officials industries museums urban markets and consumers all of whom helped to redefine Appalachian craft production in the context of a national cultural identity Becker uses this craft revival as a way of exploring the construction of the cultural categories folk and tradition She also addresses the consequences such labels have had on the people to whom they have been assigned Though the revival of domestic arts in the Southern Appalachians reflected an attempt to aid the people of an impoverished region she says as well as a desire to recapture an

important part of the nation's folk heritage in reality the new craft production owed less to tradition than to middle class tastes and consumer culture forces that obscured the techniques used by mountain laborers and the conditions in which they worked     **A Visit to Australia and Its Gold Regions** Society for Promoting Christian Knowledge (Great Britain),1853

**Making History in Banda** Ann Brower Stahl,2001-08-02 Drawing on evidence from several disciplines Ann Brower Stahl reconstructs the daily lives of Banda villagers of west central Ghana from the time that they were drawn into the Niger trade around AD 1300 until British overrule was established early in the twentieth century The case study aims to closely integrate perspectives drawn from archaeology history and anthropology in African studies     The Tentacles of Progress Daniel R. Headrick,1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment     A Bibliography of Books, Pamphlets, and Films Listed in the Living Historical Farms Bulletin, from December 1970 Through January 1986 Robert G.
