The Politics Of Recession:

The Politics of Recession Maurice Mullard, 2011-01-01 This timely book utilizes the tools of political economics and public policy to explore the causes of the recent global financial crisis which the author argues can be explained as the absence of a public interest perspective in policy making. Maurice Mullard points out that recessions are not collective shared experiences. Recessions create winners and losers. Furthermore, recessions are not an external event but reflect the outcomes of the policy process. The author looks beyond economic explanations for the economic crisis and instead points towards a structural explanation. He explores the concept of social structures, the effects of the relationships between power and influence, and the role of ideology and income inequalities as contributory factors. The commitment to deregulated financial markets created an over-the-counter derivatives market worth some 640 trillion dollars compared to a global GDP worth 65 trillion dollars. The growth of derivatives markets, the role of credit rating agencies, major shifts in policy making, and growing income inequalities are described as major factors explaining the present economic recession. The absence of a public interest perspective, the breakdown of trust in institutions, policy makers' dependence on financial contributions, the housing bubble, and the increased concentration of income have distorted the democratic process. Thought provoking and stimulating, this book will provide a fascinating study for students and academics with an interest in political economics, political economy, and public policy.

The Politics of Recession R. W. Johnson, Richard William Johnson, 1985 *The Politics of Recession* Richard William Johnson, 1985 *Politics in the New Hard Times* Miles Kahler, David A. Lake, 2013-04-02 The Great Recession and its aftershocks, including the Eurozone banking and debt crisis, add up to the worst global economic crisis since the Great Depression of the 1930s. Although economic explanations for the Great Recession have proliferated, the political causes and consequences of the crisis have received less systematic attention. *Politics in the New Hard Times* is the first book to focus on the Great Recession as a political crisis, one with both political sources and political consequences. The authors examine variation in crises over time and across countries rather than treating these events as undifferentiated shocks. Chapters also explore how crisis has forced the redefinition and reinforcement of interests at the level of individual attitudes and in national political coalitions. Throughout, the authors stress that the Great Recession is only the latest in a long history of international economic crises with significant political effects and that it is unlikely to be the last.
