Great Powers and Geopolitical Change Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena

Influences Mary Quinlan-McGrath,2013-02-20 Today few would think of astronomy and astrology as fields related to

theology Fewer still would know that physically absorbing planetary rays was once considered to have medical and psychological effects But this was the understanding of light radiation held by certain natural philosophers of early modern Europe and that argues Mary Quinlan McGrath was why educated people of the Renaissance commissioned artworks centered on astrological themes and practices Influences is the first book to reveal how important Renaissance artworks were designed to be not only beautiful but also perhaps even primarily functional From the fresco cycles at Caprarola to the Vatican's Sala dei Pontefici to the Villa Farnesina these great works were commissioned to selectively capture and then transmit celestial radiation influencing the bodies and minds of their audiences Quinlan McGrath examines the sophisticated logic behind these theories and practices and along the way sheds light on early creation theory the relationship between astrology and natural theology and the protochemistry physics and mathematics of rays An original and intellectually stimulating study Influences adds a new dimension to the understanding of aesthetics among Renaissance patrons and a new meaning to the seductive powers of art
