Religion and the Inculturation of Human Rights in Ghana Abamfo Ofori Atiemo, 2013-04-11 It has been maintained that the secular nature of modern human rights makes them incompatible with the religious orientation of African and non Western societies However in view of the resilience of religion in the global and local public sphere it is important to explore how religion can contribute to the promotion and enjoyment of human rights Based on fieldwork conducted in Ghana Abamfo Ofori Atiemo here establishes a convergence between human rights and

local religious and cultural values in African societies He argues that human rights represent universal dream values This allows for a cultural embedding of human rights in Ghana and other non Western societies He argues that dream values are usually presented in religious language and proclaimed for example by prophets and seers or expressed in certain forms of taboo proverbs or legal norms He employs the concept of inculturation adaptation of the way Church teachings are presented to non Christian cultures as a hermeneutical tool for developing a model to understand the encounter between universal human rights and local cultures Offering a new model for explaining the relation between religion and human rights Religion and the Inculturation of Human Rights in Ghana offers a novel perspective on the links between global trends and local cultures underpinned by strong currents of religious ideas **Human Rights Or Religious Rules?** J. A. van der Ven,2010

Drawing on historical insights systematic reflections and empirical data this book offers a substantive understanding of the complex relationship between religion and human rights and of the empirical impact of Christianity and Islam on the attitudes toward human rights i e a human rights culture *Theology and Religious Studies in Higher Education* D.L. Bird,Simon G. Smith,2009-01-22 Theology and religious studies co exist in the majority of departments in higher education institutions within the UK yet there has been very little debate or discussion on how these two disciplines relate to one another in this context and on a more general level This new collection of essays aims to redress the balance and to add to fruitful discussion in this area Including essays by some of today s leading academics on the sometimes contentious relationship between religious studies or the study of religions and theology this volume is international in scope with contributions from scholars from the UK USA South Africa Netherlands Sweden and Iran Many of the essays offer a contextualised account of the evolving relationship between the disciplines The contributors address such issues as the place of theology within today s universities the problem of clashing methodologies in theology and religious studies the possibility for a theological religious studies approaching the study of religions without theology interdisciplinary approaches for bridging the theology religious studies divide and the place of biblical studies in the theology religious studies debate

Worlds of Power Stephen Ellis,Gerrie ter Haar,2004 With Christian revivals including Evangelicals in the White House Islamic radicalism and the revitalisation of traditional religions it is clear that the world is not heading towards a community of secular states Nowhere are religious thought and political practice more closely intertwined than in Africa African migrants in Europe and America who send home money to build churches and mosques African politicians who consult diviners guerrilla fighters who believe that amulets can protect them from bullets and ordinary people who seek ritual healing all of these are applying religious ideas to everyday problems of existence at every level of society Far from falling off the map of the world Africa is today a leading centre of Christianity and a growing field of Islamic activism while African traditional religions are gaining converts in the West One cannot understand the politics of the present without taking religious thought seriously Stories about witches miracles or people returning from the dead incite political action In Africa

religious belief has a huge impact on politics from the top of society to the bottom Religious ideas show what people actually think about the world and how to deal with it Ellis and Ter Haar maintain that the specific content of religious thought has to be mastered if we are to grasp the political significance of religion in Africa today but their book also informs our understanding of the relationship between religion and political practice in general

Modern Societies & the Science of Religions Gerard Wiegers, 2018-11-13 This book brings together studies by seventeen specialists in the science of religions in which they relate the changes in their discipline to the changes which have occurred in a select number of modernising societies worldwide It attempts to study these developments in their relation to and as conditioned and constrained by cultural change changes in educational systems technology population for example migration economic patterns politics and last but not least religious systems The essays focus on resp France Germany the Netherlands Spain the USA Turkey Israel Morocco Saudi Arabia South Africa Indonesia Japan and China Written in honour of Dr Lammert Leertouwer professor of History of Religions and the Comparative Study of Religions at Leiden University from 1979 until his retirement in 1997 the book is particularly important for all those who are interested in the religious social and political contexts of the academic Study of Religions in general and in the various countries dealt with in particular

Ancient Mediterranean Religions John C. Stephens, 2016-06-22 This book offers a clear and concise historical overview of the major religious movements of the ancient Mediterranean world existing from the time of the second millennium BCE up until the fourth century CE including both the Judeo Christian and pagan religious traditions Recognizing the significant role of religious institutions in human history and acknowledging the diversity of religious ideas and practices in the ancient Mediterranean world religion is defined as a collection of myths beliefs rituals ethical practices social institutions and experiences related to the realm of the sacred cosmos Without focusing too much attention on technicalities and complex vocabulary the book provides an introductory road map for exploring the vast array of religious data permeating the ancient Mediterranean world Through an examination of literary and archeological evidence the book summarizes the fundamental religious beliefs and practices of the ancient Near Eastern world including the religious traditions of ancient Mesopotamia Egypt and Israel Turning westward the fascinating world of ancient Greek and Roman religion is considered next The discussion begins with a description of Minoan Mycenaean religion followed by a consideration of classical Roman and Greek religion Next the numerous religious movements that blossomed during Hellenistic Roman times are discussed In addition the fundamental theological contributions of various Greco Roman philosophical schools of thought including Orphism Stoicism Pythagoreanism Platonism and Neo Platonism are described Greco Roman philosophy functioned as a quasi religious outlook for many and played a decisive role in the evolution of religion in the classical and Hellenistic period The theological speculations of the philosophers regarding the nature of God and the soul made a huge impact in religious circles during the classical and Hellenistic era Moving forward in history from archaic and classical times to the later Hellenistic Roman period the old

religious order of the past falls by the wayside and a new updated religious paradigm begins to develop throughout the Mediterranean world with a greater emphasis being placed upon the religious individual and the expression of personal religious feelings There are several important social and historical reasons for this shift in perspective and these factors are explained in the chapter focusing upon personal religion in Hellenistic times Since the entire religious topography of the ancient Mediterranean world is rarely outlined in a single volume this book will be a welcome addition to anyone s library
