Theokas,2004-01-01 In recent decades suburban growth and the decline of industry have left cities throughout Europe and America searching for creative and effective ways to revitalize blighted areas and reclaim underused land In *Grounds for Review* Andrew Theokas examines one particularly exciting tool for reinvigorating urban areas the garden festival These festivals which began in post war Europe have been popular throughout the Continent for decades but are just beginning to gain currency in the United States A garden festival temporarily transforms a previously derelict area such as an abandoned factory lot into a festival of horticulture combining luxurious landscapes with exhibits and carnival rides Most garden festivals last about six months during which time they draw millions of visitors but the success of the fair itself is only the initial step in a detailed plan for urban improvement At the conclusion of the festival funds from its operation are used to transform the grounds once again this time with an eye toward the long term use of the land The enduring result of a successful garden festival is thus the transformation of derelict land into a community asset such as a new urban park or an affordable housing project Theokas considers here fifteen garden festivals in Europe England and the United States in all their dimensions He examines the role they play in stimulating urban redevelopment their effects on the practice of landscape architecture and the contentious debates over their financing purposes and future prospects This highly illustrated volume will serve as a useful introduction to garden festivals for all those interested in urban planning horticulture and the future of cities      *Catalogue of the Library of the Royal Geographical Society* Royal Geographical Society (Great Britain).
