The Gene Knockout FactsBook Tak W. Mak, 1998 The Gene Knockout Factsbook , 1998 **The Gene Knockout Factsbook, Two-Volume Set** , 1998-10-26 The FactsBooks Series has established itself as the best source of easily accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available Using an easy to follow format and drawing from meticulous research the Factsbooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity The Gene Knockout FactsBook contains entries grouped into subject disciplines covering immunology neurobiology development cancer and other knockouts It describes more than 600 gene knockouts described and listed in alphabetical order for easy reference Key Features Entries provide information on general description of the protein and its function gene symbol and database accession number knockout construct mouse phenotype key references **The Immunoglobulin FactsBook** Marie-Paule Lefranc, Gerard Lefranc, 2001-05-29 The FactsBook series has established itself as the best source of easily accessible and accurate facts about protein groups Books in the series use an easy to follow format and are meticulously researched and compiled by experts in the field The Immunoglobulin FactsBook is the first published reference for all 203 human functional and ORF immunoglobulin genes It is complete and standardized and employs nomenclature approved by the HUGO Nomenclature Committee The Gene Knockout Tak W. Mak, 1998 The FactsBooks Series has established itself as the best source of easily accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available Using an easy to follow format and drawing from meticulous research the Factsbooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity The Gene Knockout FactsBook contains entries grouped into subject disciplines covering immunology neurobiology development cancer and other knockouts It describes more than 600 gene knockouts described and listed in alphabetical order for easy reference Key Features Entries provide information on general description of the protein and its function gene symbol and database accession number knockout construct mouse phenotype key references **The HLA FactsBook** Steven G.E. Marsh, Peter Parham, Linda D. Barber, 1999-12-13 The HLA FactsBook presents up to date and comprehensive information on the HLA genes in a manner that is accessible to both beginner and expert alike The focus of the book is on the polymorphic HLA genes HLA A B C DP DQ and DR that are typed for in clinical HLA laboratories Each gene has a dedicated section in which individual entries describe the structure functions and population distribution of groups of related allotypes Fourteen introductory chapters provide a beginner s guide to the basic structure function and genetics of the HLA genes as well as to the nomenclature and methods

used for HLA typing This book will be an invaluable reference for researchers studying the human immune response for clinicians and laboratory personnel involved in clinical and forensic HLA typing and for human geneticists population biologists and evolutionary biologists interested in HLA genes as markers of human diversity Introductory chapters provide good general overview of HLA field for novice immunologists and geneticists Up to date complete listing of HLA alleles Invaluable reference resource for immunologists geneticists and cell biologists Combines both structural and functional information which has never been compiled in a single reference book previously Serological specificity of allotypes Identity of material sequenced including ethnic origin Database accession numbers Population distribution Peptide binding specificities T cell epitopes Amino acid sequences of allotypes Key references [The Nuclear Receptor FactsBook](#) Vincent Laudet,Hinrich Gronemeyer,2002 The FactsBook Series has established itself as the best source of easily accessible and accurate facts about protein groups They use an easy to follow format and are researched and compiled by experts in the field This Factsbook is devoted to nuclear receptors The first section presents an introduction and describes the mode of action of the receptors in general The second section of the book contains detailed entries covering each type of receptor Entries provide information on Nomenclature and structure Isolation DNA binding properties Ligands Expression Target genes Knockouts Disease association Gene structure promoter and isoforms Chromosomal location Amino acid sequences Key references *The T Cell Receptor FactsBook* Marie-Paule Lefranc, Gerard Lefranc,2001-07-13 The T Cell Receptor FactsBook contains entries on all the 176 functional variable diversity joining and constant regions of the human T cell receptor including alpha beta gamma and delta loci Introductory chapters summarize information of T cell receptor chain synthesis chromosomal location and an overview of the human T cell receptor loci **The Cytokine Factsbook and Webfacts** Katherine A. Fitzgerald,Luke A.J. O'Neill,Andy J.H. Gearing,Robin E. Callard,2001-09-03 Completely revised and expanded this second edition of The Cytokine FactsBook is the most up to date reference manual available for all current well characterized interleukins cytokines and their receptors An additional 52 cytokines are included doubling the number of entries from the previous edition The key properties of each cytokine are described and presented in a very accessible format with diagrams for each of the receptors The Cytokine FactsBook includes free online access to the regularly updated Cytokine Webfacts Cytokine Webfacts is a web based comprehensive compendium of facts about cytokines and their receptors that includes a variety of data representations such as text signal pathway diagrams and 3D images This exciting resource is integrated into other databases via hypertext links to provide a unique network and contains a web enabled version of RasMol for viewing structures **The Complement FactsBook** Scott R. Barnum,1999-10-28 The Complement FactsBook contains entries on all components of the Complement System including C1q and Lectins C3 Family Serine Proteases Serum Regulators of Complement Activation Cell Surface Proteins and Terminal Pathway Proteins Domain Structure diagrams are incorporated to clearly illustrate the relationships between all the complement proteins both within

families and between families The FactsBook also includes the cDNA sequences marked with intron exon boundaries which will facilitate genetic studies Includes the cDNA sequences marked with intron exon boundaries facilitating genetic studies Presents detailed structural information including cDNA and gene structure for all proteins Introduces complement function simply described for each function Data is as up to date as possible including unpublished work from many contributors Incorporates domain structures diagrams which beautifully illustrate the relationship between all the complement proteins both within and between families Each chapter has been written by an expert in the field Data is as up to date as possible including unpublished work from many contributors Entries provide information on Alternative nomenclature Physiochemical properties Structure and function Tissue distribution and regulation expression Protein sequence modules Chromosomal location Genomic structure Database accession numbers Deficiency and polymorphic variants Key references

The Adhesion Molecule FactsBook, 2000-08-24 This updated and expanded Second Edition of The Adhesion Molecule FactsBook has nearly double the number of entries of the First Edition and provides a compendium of the major cell surface adhesion molecules The introductory chapters detail the organization of the data in the entries section provide a background to the main adhesion molecule families and inform the reader how to access information on adhesion molecules on the Internet The entries have been designed to allow the reader to quickly establish the main structure and functional features of each molecule and where to find information Alternative nomenclature Tissue distribution and regulation of expression Ligands Gene organization and chromosomal location Protein structure and molecular weights Amino acid sequence of the most commonly studied organisms PIR SWISSPROT and EMBL GenBank accession numbers Biological function Key references

The Leukemia-Lymphoma Cell Line Factsbook Hans G. Drexler, 2000-09-04 The Leukemia Lymphoma Cell Line Factsbook represents an essential reference manual for all of the well characterized leukemia lymphoma cell lines currently available It provides the most important facts using the succinct and user friendly format that has made the FactsBooks so popular with scientists and clinical researchers Introductory chapters provide background and perspective for culturing malignant hematopoietic blood forming cell lines These chapters are followed by over 400 comprehensive individual entries Each cell line entry highlights essential clinical immunological genetic and functional features and includes a comprehensive listing of references The full spectrum of malignant cell lines from all hematopoietic cell lineages Sister cell lines and relevant subclones Clinical data patient diagnosis treatment status and specimen source Authentication of derivation and availability Immunophenotype Cytogenetic karyotype Translocations and fusion genes Receptor gene rearrangements and genetic alterations Cell cultures aspects establishment medium doubling time growth Cytochemical profile Cytokine production and response to cytokines Proto oncogene and transcription factor expression alteration Functional features differentiation induction heterotransplantability Special unique features Key references

The Gene Knockout Factsbook Josef Penninger, Tak W. Mak, John Roder, 2014-05-14 The FactsBooks Series has established itself as the best source of easily

accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available Using an easy to follow format and drawing from meticulous research the Factsbooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity The Gene Knockout FactsBook contains entries grouped into subject disciplines covering immunology neurobiology development cancer and other knockouts It describes more than 600 gene knockouts described and listed in alphabetical order for easy reference Key Features Entries provide information on general description of the protein and its function gene symbol and database accession number knockout construct mouse phenotype key references [Ion Channel Factsbook](#) William J. Brammar,1998-10-16 The Academic Press FactsBooks series has established itself as the best source of easily accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available As they are meticulously researched and use an easy to follow format the FactsBooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity In a set of four interrelated volumes The Ion Channel FactsBook provides a comprehensive framework of facts about channel molecules central to electrical signaling phenomena in living cells The fourth volume is devoted to Voltage gated Channel Families including those molecular complexes activated or modulated by calcium potassium and chloride Nomenclature Expression Sequence Analyses Structure and function Electrophysiology Pharmacology Information retrieval **Ion Channel Factsbook**, 1995-11-16 How do you keep track of basic information on the proteins you work with Where do you find details of their physicochemical properties sequence information gene organization Are you tired of scanning review articles primary papers and databases to locate that elusive fact The Academic Press FactsBook series will satisfy scientists and clinical researchers suffering from information overload Each volume provides a catalogue of the essential properties of families of molecules Gene organization sequence information physicochemical properties and biological activity are presented using a common easy to follow format Taken together they compile everything you wanted to know about proteins but were too busy to look for In a set of four inter related volumes The Ion Channel FactsBook provides a comprehensive framework of facts about channel molecules central to electrical signalling phenomena in living cells The first volume is devoted to Extracellular Ligand Gated Integral Receptor Channel Families including those molecular complexes activated by 5 Hydroxytryptamine ATP Glutamate Acetylcholine GABA Glycine Nomenclature Expression Sequence analyses Structure and function Electrophysiology Pharmacology Information retrieval **The Extracellular Matrix Factsbook** Shirley Ayad,Ray Boot-Handford,Martin Humphries,Karl Kadler,Adrian Shuttleworth,1998-03-27 The Second Edition of The Extracellular Matrix FactsBook has been completely revised updated and expanded by over 50 percent

It contains over 85 entries on the diverse group of macromolecules that assemble to form the extracellular matrix. Entries provide information on molecular structure, isolation, primary structure, structural and functional sites, gene structure, database accession numbers and key references. Key Features: Compiled by members of one of the foremost centers of matrix biochemistry in the world. Contains over 30 new entries with all previous entries being revised and updated. Includes new entries on proteinases involved in the deposition of the extracellular matrix. Presents 3D ribbon diagrams in cases where the protein structure is now known.

Gene Knockout Protocols Martin J. Tymms, Ismail Kola, 2008-02-03 As the major task of sequencing the human genome is near completion and full complement of human genes are catalogued, attention will be focused on the ultimate goal to understand the normal biological functions of these genes and how alterations lead to disease states. In this task, there is a severe limitation in working with human material, but the mouse has been adopted as the favored animal model because of the available genetic resources and the highly conserved gene conservation linkage organization. In just of ten years since the first gene targeting experiments were performed in embryonic stem (ES) cells and mutations transmitted through the mouse germline, more than a thousand mouse strains have been created. These achievements have been made possible by pioneering work that showed that ES cells derived from preimplantation mouse embryos could be cultured for prolonged periods without differentiation in culture and that homologous recombination between targeting constructs and endogenous DNA occurred at a frequency sufficient for recombinants to be isolated. In the next few years, the mouse genome will be systematically altered and the techniques for achieving manipulations are constantly being streamlined and improved.

Ion Channel Factsbook Edward Conley, William J. Brammar, 1996-04-18 This volume covers extracellular ligand-gated ion channels. It catalogues current research on this group of molecules central to the phenomenon of cell signalling. Entries cover four main groups of characterized ion channels including ELG, CAT 5, HT3, ELT, CAT, GLU, NMDA and ELG, CI, GABA.

Encyclopedia of Genetics, Genomics, Proteomics, and Informatics George P. Rédei, 2008-04-25 This new third edition updates a best-selling encyclopedia. It includes about 56% more words than the 1,392-page second edition of 2003. The number of illustrations increased to almost 2,000 and their quality has improved by design and four colors. It includes approximately 1,800 current databases and web servers. This encyclopedia covers the basics and the latest in genomics, proteomics, genetic engineering, small RNAs, transcription factories, chromosome territories, stem cells, genetic networks, epigenetics, prions, hereditary diseases and patents. Similar integrated information is not available in textbooks or on the Internet.

The Laboratory Mouse Hans Hedrich, 2004-08-21 Among animals used in research, teaching and testing, mice are now widely recognized as the most important model for human diseases and disorders. They comprise the majority of all experimental mammals and tend to be the model of choice used for research into many diseases and disorders, including cancer, heart disease, asthma, Alzheimer's, Down syndrome, deafness, osteoporosis, obesity, diabetes and even mental health research. Additionally, the laboratory mouse continues to play a widely publicized vital role in the human genome project. One

of the most time consuming activities in research laboratories is looking up information specific to the species or strain of animal being used This book part of the highly successful Handbook of Experimental Animals series allows the user quick access to any point of interest on the mouse as an experimental model Edited by Hans Hedrich Hannover Medical School Comprehensive reference source written by international experts Well illustrated with high quality detailed images Two color user friendly format combined with color plate sections
