The Genesis Rock:

The Genesis Rock Edwin Corley, 1980 Moonflaw Steve Godsoe, For more years than he can remember astronomer Ernie Cowarth has been sworn to secrecy on behalf of the United States government regarding an incomprehensible lunar event later known as the moonflaw that occurred in late October 1953 Due to negligent actions of the Apollo 15 crew who succumbed to their deeper curiosities during what was designed to be a restricted investigation some eighteen years later cosmic radiation from the event was inadvertently conveyed back to Earth where it eventually brings about a strange phenomenon a series of disorienting and disturbing dreams that link together the minds of perfect strangers Bizarre events ultimately coalesce in the city of Hartford Connecticut where a demonic entity has seized opportunity from the fallout escalating the emissions into a dual threat From reanimated beings known as Deceivers who furtively project into the living realm to a subterranean lair that snakes below the city like a flooded catacomb unholy horrors await a cast of dream plagued fate bound individuals who must face unfathomable darkness in order to restore humanity as it once was before the Moonflaw

Understanding Scientific Theories of Origins Robert C. Bishop, Larry L. Funck, Raymond J. Lewis, Stephen O. Moshier, John H. Walton, 2018-12-04 From five authors with over two decades of experience teaching origins together in the classroom this is the first textbook to offer a full fledged discussion of the scientific narrative of origins from the Big Bang through humankind from biblical and theological perspectives This work gives the reader a detailed picture of mainstream scientific theories of origins along with how they fit into the story of God's creative and redemptive action

The Genesis Flood Revisited Andrew Snelling, 2022-10-25 Modeled after the 1961 ground breaking book The Genesis Flood by Drs Whitcomb and Morris this detailed work builds on that classic volume with new insights from decades of work by the author Dr Andrew Snelling and numerous colleagues This recent revolution in geology and the explosion in geological research have established an even firmer basis for understanding the biblical Flood with a God honoring foundation the absolute authority and inerrancy of God's Word Examine details of the Creation Week as it builds a solid scriptural case for the Flood's catastrophic nature and global extent Find decisive answers to many questions about the Flood and Noah's Ark its construction and the animals taken onboard Delve deeply into astonishing geological details that unfold from the early chapters of Genesis including the Creation Week and the pre Flood world Explore detailed evidence and a concise informative 30 page color section with diagrams maps and more Dr Snelling jettisons the faulty evolutionary uniformitarian assumptions used by most geologists and instead interprets compelling new geological and observed field data within the biblical framework for the earth's history He also demonstrates that fossils were catastrophically buried in sedimentary layers being deposited rapidly on a global scale on the continental plates derived from the violent rifting apart of the original supercontinent His work demolishes radiometric dating the icon of the millions of years dogma and builds a thoroughly powerful case for a young earth that explains many geological features such as varves evaporites coal oil chalk granites and

more that biblical skeptics sadly have used to scoff at God's Word Discover the powerful truth behind the earth's most enduring mysteries

Tracking Apollo to the Moon Hamish Lindsay, 2013-11-11 One of the wonderful aspects of the US Manned Spaceflight Program was the opportunity for people around the entire globe to participate in one of man's greatest adventures As we laid out the plans for flying the first manned spaceflight program it was obvious that we would require extensive operations around the earth One of the most challenging features of this plan was to build a world wide network of tracking stations to provide communications with the orbiting spacecraft At the time about 1958 and 59 the construction of these facilities in what turned out to be some very interesting pieces of geography was a tremendous task Christopher C Kroft Jr Australia is located roughly 180 degrees longitude from the launch site Cape Canaveral and so occupied not only a unique position but a very critical one Determining the position of the spacecraft as it traversed the Australian continent was critical to the orbit determination This set of parameters was necessary to properly manage the entire operation Such things as the time of retrofire paramount to recovery of the crew and the information required for signal acquisition at each of the tracking sites around the world are but two examples Also because the status of the astronaut and the spaceship were

extremely critical to the decision making process the stations down under provided vital data to evaluate the progress and to allow the flight control team to manage the problems that inevitably developed

APOLLO: A Decade of Achievement Paul I. Casey, 2013-10-25 The race for space begins on October 4 1957 as the Soviet Union stuns the world and launches the first man made satellite a feat until then only read about in science fiction America is caught unprepared for 1957 and must answer this embarrassment to the world by proving its superiority however each time America tries to launch a satellite let alone test a new rocket it fails How could America have taken a back seat in the missile race How did America take the lead and win the race to the moon in as little as ten years How did America gain the necessary technology and ingenuity to not only launch men into outer space but also land them on the moon and safely return Why did man even go to the moon How has the space program affected our lives today Casey spent his life researching the space program and interviewing many people involved in it from scientists to astronauts to find answers to these questions Casey an accomplished technical writer astronomy columnist and artist began to write this book after he was inspired as a young child when he witnessed along with the rest of the world Apollo 11 land three men on the moon in 1969 Casey enjoyed educating students about the space program and wrote this book to share an enthusiasm about science especially for those never thought about looking up at the night sky and wondering about the stars Casey wanted students to ask questions and to gain a perspective on how incredible science is But mostly he wanted to inspire students to pursue a career in science to continue the peaceful exploration of space for generations to come

The Serpent's Promise Steve Jones, 2014-06-15 In The Serpent's Promise Steve Jones retells many of the Biblical tales in the light of modern science Are we all descended from a real life Adam and Eve Are some or all of us marked with the molecular equivalent of original sin and if so what can we do about it Was the Bible's great flood a memory of the

end of the Ice Age And what can science tell us of the mystical experiences reported by the faithful or of the origin of faith itself Some people deny the power of religious belief others the findings of science In this groundbreaking work from one of our great science writers Steve Jones explores how these mysteries often overlap He steps aside from the noisy debate between believers and non believers to show how the questions that preoccupy us today are those of biblical times and that science offers many of the answers At once brilliantly erudite and highly readable *The Serpent s Promise* is a witty and thoughtful account of the greatest scientific story ever told *Scientific American Biology for a Changing World* Michele Shuster,Janet Vigna,Gunjan Sinha,Matthew Tontono,2011-02-25 To view sample chapters and more information visit www.whfreeman.com/SABiologyPreview All of us involved in science education understand the importance of scientific literacy How do we get the attention of a nonscientist And if we can get it how do we keep it not only for the duration of the course or the chapter in a textbook but beyond How do we convey in our courses and our textbooks not just what we know but also how science is done These are the challenges we hope to address with our new series of textbooks specifically for the nonscientist With this series W H Freeman and Scientific American join forces not just to engage nonscientists but to equip them critical life tools **Are We Being Watched?: The Search for Life in the Cosmos** Paul Murdin,2013-04-01 An engaging exploration with renowned astronomer Paul Murdin of how life emerged on Earth and the possibilities that it exists elsewhere There is no more fascinating question than whether or not we are alone in a vast universe Here Paul Murdin applies the latest scientific discoveries and theories to inquire whether life exists on other planets and if so what forms it might take Could there be somewhere life as advanced as here on Earth or are we more likely to find primitive life forms Or are we the sole living organisms in a desolate and boundless cosmos Professor Murdin invites us to join him in exploring an extraordinary array of evidence to determine if there is life elsewhere in the cosmos He examines the case for life on Mars and Europa and asks whether on Enceladus or Titan we might find the warm little pond that Darwin speculated was where life began here on Earth Describing the cosmic habitats that produce the alien worlds of our solar system and others he examines the chances of finding life and the prospects for successful communication with an extraterrestrial intelligence
