The Genetic Basis of Abnormal Human Behavior Charles David Mellon, 1997 *Methods and Morals in the Life Sciences* Wim J. van der Steen, Vincent K.Y. Ho, 2001-04-30 Most researchers would be amazed to discover that opinions they have about cherished themes in biology and medicine are biased Van der Steen and Ho contend that logic and methodology are not well applied in biology and medicine arguing that the impact of social and moral factors on claims within these two disciplines is underestimated In response to this situation Van der Steen and Ho present tools from logic and ethics for assessing existing literature These tools will help to create sound articles and materials in the life sciences After reviewing logic and methodological approaches broad guidelines are used to place science in a social context Examples from life sciences illustrate the implementation of logic methodology and guidelines in forty five brief case studies Each study includes comments on quoted and paraphrased passages from a single article or book Cross references facilitate the assimilation of lessons from the text Students researchers and scholars in biology biomedicine philosophy and ethics as applied to the life sciences will find this guide useful in improving their research and writing skills Crimes of Violence, Vol. 11 United States.
