Geographical Indications Between the *Old World* and the *New World*, and the Impact of Migration

The article focuses on the use of European geographical names in certain countries of the so-called ‘New World’ (i.e. nations reached in the past by waves of European migration) and the impact of such migration on the debate around the protection of geographical indications (GIs). Specifically, the article analyses four GI case studies – ‘Prosecco’, ‘Budweiser’, ‘Rioja’ and ‘Parmesan’ – which highlight the role of migration in this context and how countries of the New World (e.g. US, Canada, Australia, etc.) emphasise this role to argue that several European geographical names of food and wine products are just the generic terms for the products themselves. The ‘migration’ factor however is downplayed by the EU (i.e. the Old World), which stresses that European GIs still have a distinctive function linked to the geographical origin of the underlying product and should be protected in Europe and beyond.

I. Introduction

This article¹ focuses on the use of European geographical names in certain countries of the ‘New World’ (i.e. nations reached in the past by waves of European migration) and the impact of such migration on the debate around the protection of geographical indications (GIs). Specifically, the paper analyses four GIs case studies which highlight the role of migration in this context and how countries of the New World (e.g. US, Canada, Australia) emphasise this role to argue that several European geographical names of food and wine products are just the generic terms of the products themselves. Those states are in fact nations built by immigrants who brought their culture to the New World. When Europeans emigrated to other countries – it is noted – some of them continued to produce the cheese, wine, and spirits they had traditionally made in Europe. They essentially ‘brought’ with them both the methods of making the products and their geographical names to their new homes and used them in good faith. The ‘migration’ factor is, however, downplayed by the EU, which stresses that European GIs still have a distinctive function linked to the geographical origin of the underlying product and should be protected in Europe and beyond.

1. This article presents a revised version of the paper that was originally presented at the 14th Annual Workshop of the International Society for the History and Theory of Intellectual Property (ISHETIP), held at Tel Aviv University on 20–21 June 2023 (Israel). We are grateful to the workshop participants for their valuable comments and engaging discussions during the conference. Special thanks go to Doran Olsin for serving as the paper’s commentator and providing helpful insights. This article represents the collaborative efforts of all authors, who are listed in alphabetical order. Each author contributed equally to this work, and the order of authorship does not imply any differences in their individual contributions.

The article is structured as follows. Section II briefly highlights the GIs protection regime within the EU (which here represents the Old World) and beyond. Section III explores the differences between such regimes and how geographical names are protected in countries such as the US, Canada, Australia, and Chile (New World). It also mentions how the EU is trying to use free trade agreements to export its (notoriously strong) regime of GI protection to other areas of the planet. Section IV constitutes the heart of the article as it analyses the four case studies in question which highlight the tension between the systems of GIs protection in the Old World and those in the New World: ‘Prosecco’, ‘Budweiser’, ‘Rioja’ and ‘Parmesan’. Section V concludes.

II. GI Protection within the EU and Beyond

The agricultural and food product quality policy was developed in what is now the EU¹ with the intention of being one of the instruments of the Common Agricultural Policy (CAP) and helping reduce overproduction, increase farmers’ incomes and preserve rural communities.² There is no doubt that GIs protection, primarily focused on the concept of *terroir* (which can be defined as an ecosystem characterised by several factors including local climatic conditions, geography and topography), is one of the most important titles in the variegated mosaic of EU laws which promote

The Geographical Impact of Migration Paul White (D. Phil.), Robert Woods, 1980 **The Cambridge History of Global Migrations: Volume 2, Migrations, 1800-Present** Marcelo J. Borges, Madeline Y. Hsu, 2023-06-01 Volume II presents an authoritative overview of the various continuities and changes in migration and globalization from the 1800s to the present day. Despite revolutionary changes in communication technologies, the growing accessibility of long distance travel and globalization across major economies, the rise of nation states empowered immigration regulation and bureaucratic capacities for enforcement that curtailed migration. One major theme worldwide across the post 1800 centuries was the differentiation between skilled and unskilled workers, often considered through a racialized lens. It emerged as the primary divide between greater rights of immigration and citizenship for the former and confinement to temporary or unauthorized migrant status for the latter. Through thirty-one chapters, this volume further evaluates the long global history of migration and it shows that despite the increased disciplinary systems, the primacy of migration remains and continues to shape political, economic and social landscapes around the world. *Migration And Mobility In Britain Since The Eighteenth Century* Colin Pooley, Jean Turnbull, 2005-10-05 Chapter 1 Introduction why study migration chapter 2 How to study migration in the past chapter 3 Where people moved the spatial and temporal pattern of internal migration in Britain chapter 4 The role of towns in the migration process chapter 5 Migration employment and the labour market chapter 6 Migration family structures and the life course chapter 7 Migration and the housing market chapter 8 Migration as a response to crisis and disruption chapter 9 Overseas migration emigration and return migration chapter 10 The role of migration in social economic and cultural change chapter 11 Conclusion a broader perspective on migration and mobility in Britain Progress in Rural Geography (Routledge Revivals) Michael Pacione, 2014-06-03 This wide ranging volume first published in 1983 reflects the increasing scope of the field of rural geography in the second half of the twentieth century. Although traditional areas of study such as agriculture and the land use patterns of the countryside remained important, scholars also began to consider rural transport, employment, housing and policy as well as to develop new theories and methodologies for application to study. The chapters included here addressed the need for a review of the changes that had taken place within the field of rural geography and as such provide an essential background to students with an interest in rural demography, planning and agriculture. *Population Geography: Progress & Prospect (Routledge Revivals)* Michael Pacione, 2013-10-14 First published in 1986, this book presents a comprehensive overview of the contemporary state of knowledge in the field of population geography. It discusses the contemporary state of the art and surveys new research developments and new thinking in the major branches of the subject. It thereby provides an introductory guide to contemporary trends and forms a reference point for future development in the subject. **A Social Geography of England and Wales** Richard Dennis, Hugh Clout, 2013-10-22 A Social Geography of England and Wales considers the theoretical concepts of the social geography of

England and Wales This book is composed of 11 chapters that discuss the theories of industrialization and urbanization The opening chapters deal with the origins and settlement of English people as well as the workings of feudal society with its hierarchy of groups of different legal status ranging from the king through the base of the system The succeeding chapters examine the vital formative phase in British social history Other chapters explore the strengths and weaknesses of several ecological and economic models of urban structure that are transported from North America to Great Britain A chapter looks into the variations in housing type and quality form intriguing reflections of fundamental differences in British Society based on a theory of housing classes This text also surveys residents of the inner areas of many British cities now experience substantial social problems which are compounded in areas of multiple deprivation The final chapters cover the dispersion of urbanism into the countryside where it has provoked fundamental social and spatial changes related to commuting retirement migration and tourism This book is of value to historians sociologists researchers and undergraduate students
