The Geography Of Defence:

The Geography of Defence Michael Bateman, Raymond Riley, 2015-12-22 Defence against military attack has had a considerable geographical impact Urban morphology frequently owes more to the defence function than to any other whilst local regional and national economies are often intricately dependent on defence expenditure It is also clear that the social geography of cities both recently and in the past has been affected by the presence of the military Despite its importance defence as a major government function has not been the focus of geographical analysis in the same way as housing transport health or education This volume redresses this imbalance by demonstrating the geographical importance of defence in these vital areas

Military Geographies Rachel Woodward, 2004-07-02 Military Geographies is about how local space place environment and landscape are shaped by military presence and about how wider geographies are touched by militarism A book about how local space place environment and landscape are shaped by military presence and about how wider geographies are touched by militarism Sets a new agenda for the study of military geography with its critical analysis of the ways in which military control over space is legitimized Explores the ways in which militarism and military activities control development the use of space and our understanding of place Focuses on military lands establishments and personnel in contemporary peacetime settings Uses examples from Europe North America and Australasia Draws on original research into the mechanisms by which the British government manages the defence estate Illustrated with maps plans and other figures

The Biogeography of Host-Parasite Interactions Serge Morand, Boris R. Krasnov, 2010-07 This edited volume demonstrates how the latest developments in biogeography for example in phylogenetics macroecology and geographic information systems can be applied to studies in the evolutionary ecology of host parasite interactions in order to integrate spatial patterns with ecological theory

Geographical Teacher, 1910 Includes section Reviews and other bibliographical material

A Research Agenda for Military Geographies Rachel Woodward, A Research Agenda for Military Geographies explores how military activities and phenomena are shaped by geography and how geographies are in turn shaped by military practices A variety of future research agendas are mapped out examining the questions faced by geographers when studying the military and its effects

Militarism and Israeli Society Gabriel Sheffer, Oren Barak, 2010-03-12 Challenging the established view that the civilian sector in Israel has been predominant over its security sector since the state's independence in 1948 this volume critically and systematically reexamines the relationship between these sectors and provides a deeper more nuanced view of their interactions Individual chapters cast light on the formal and informal arrangements connections and dynamic relations that closely tie Israel's security sector to the country's culture civil society political system economy educational system gender relations and the media Among the issues and events discussed are Israel's separation barrier the impact of Israel's military confrontations with the Palestinians and other Middle Eastern

states especially Lebanon and the impact of the wars in Iraq and Afghanistan The Israeli case offers insights about the role of the military and security in democratic nations in contemporary times **Routledge Revivals: Defence Industries (1988)** Daniel Todd, 2018-02-01 Originally published in 1989 Defence Industries presents a worldwide survey of defence industries It argues that modern weapon systems and electronic warfare have led to the transition of the military industrial enterprise into a multifaceted entity where electronics production is the key It analyses the extent of defence industries showing that large portions of the aerospace shipbuilding motor vehicle and electronics industries are devoted to defence and discusses where the defence industries are located It examines the differences in government policies contrasting the superpowers with newly industrialised countries *National Missile Defence and the politics of US identity* Natalie Bormann, 2013-07-19 Why adopt a poststructural lens for the reading of the military strategy of national missile defence NMD No doubt when contemplating an attack on US territory by intercontinental ballistic missiles consulting Michel Foucault and critical international relations theory scholars may not seem the obvious route to take The answer to this lies in another question why has there been so much interest and continuous investment in NMD deployment when there is such ambiguity surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost Posed in this manner the question cannot be answered on its own terms the terms given in official accounts of NMD that justify the system's significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios Instead this book argues that the preferences leading to NMD deployment must be understood as satisfying requirements beyond strategic approaches and issues In turning towards the interpretative modes of inquiry provided by critical social theory and poststructuralism this book contests the conventional wisdom about NMD and suggests reading the strategy in terms of US identity Presented as an analysis of discourses on threats to national security around which the need for NMD deployment is predominantly framed this book is an effort to let the two fields of critical international relations theory and US foreign policy speak directly to each other It seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice *War and the City* Gregory J. Ashworth, 2002-09-26 Cities have evolved from small urban systems designed to withstand attack to the modern demands of internal violence This book analyses the role of the cities in war and the effects of war on cities **The Journal of the Manchester Geographical Society** Manchester Geographical Society, 1919 **Strategy And Defense Policy For Small States: Problems And Prospects** Bernard F W Loo, 2021-11-08 For students of Strategic Studies in small countries with limited financial human and military resources the available literature on Strategic Studies in particular texts that seek to explain the key concepts and components of Strategic Studies can be very alien in its focus to the strategic conditions and issues that these countries face This book contains a collection of essays that seeks to discuss key concepts in Strategic Studies as well as contemporary challenges in strategy and defence policy from the perspective of small states It is based on

the idea derived from the German philosopher of war Carl von Clausewitz that there is a distinction between logic and grammar while the field of Strategic Studies contains a number of key concepts such as geopolitics and geostrategy strategic culture arms dynamics and the phenomenon of military modernization that are universal in logic the grammar that is the specific manifestations of these concepts in the contexts of small states is necessarily different from larger more materially endowed states Related Link s **Peace, Defence and Economic Analysis** Frank Blackaby,Christain Schmidt,1987-10-27

Education in Nazi Germany Lisa Pine,2010-12-01 Shaping the minds of the future generation was pivotal to the Nazi regime in order to ensure the continuing success of the Third Reich Through the curriculum the elite schools and youth groups the Third Reich waged a war for the minds of the young Hitler understood the importance of education in creating self identity inculcating national pride promoting racial purity and building loyalty The author examines how Nazism took shape in the classroom via school textbook policy physical education and lessons on Nationalist Socialist heroes and anti Semitism Offering a compelling new analysis of Nazi educational policy this book brings to the forefront an often overlooked aspect of the Third Reich **Kursk 1943** Anders Frankson,Niklas Zetterling,2016-12-05 The battle at Kursk in 1943 is often referred to as the greatest tank battle in the history of warfare This volume makes extensive use of German archival documents as well as various Russian books and articles As well as an account of the battle it addresses methodological issues

Military Geographies Rachel Woodward,2011-07-15 Military Geographies is about how local space place environment and landscape are shaped by military presence and about how wider geographies are touched by militarism A book about how local space place environment and landscape are shaped by military presence and about how wider geographies are touched by militarism Sets a new agenda for the study of military geography with its critical analysis of the ways in which military control over space is legitimized Explores the ways in which militarism and military activities control development the use of space and our understanding of place Focuses on military lands establishments and personnel in contemporary peacetime settings Uses examples from Europe North America and Australasia Draws on original research into the mechanisms by which the British government manages the defence estate Illustrated with maps plans and other figures

Wavell in the Middle East, 1939-1941 Harold E. Raugh,2013-03-18 This masterly study of generalship covers two years of intense operational activity during which Field Marshal Wavell as Commander in Chief Middle East was at one point conducting no fewer than five campaigns simultaneously Two of those campaigns will stand in history as truly great victories and one the campaign in Greece in 1941 as a source of endless controversy Harold E Raugh Jr has drawn upon previously unavailable official documents and interviewed or corresponded with a wide range of soldiers who served under Wavell Raugh shows how Wavell s early experience as a soldier and budding commander were reflected in his later decision making and shrewd military vision Although Wavell s charismatic personality endeared him to all who served under him and earned him the profound respect of his fellows and even of the enemy his natural taciturnity brought him into conflict with his

political masters In spite of his enormous military achievements at one of the most critical periods in his country's history Wavell has been undeservedly relegated to obscurity a historical oversight that Raugh corrects with this richly detailed book

Hub Cities in the Knowledge Economy Ben Derudder, Frank Witlox, 2016-05-13 The overarching research topic addressed in this book is the complex and multifaceted interaction between infrastructural accessibility connectivity of city regions on the one hand and knowledge generation in these city regions on the other hand To this end the book brings together chapters analysing how infrastructural accessibility is related to changing patterns of business location of knowledge intensive industries in city regions The chapters in this book specifically dwell on recent manifestations of and developments in the accessibility knowledge nexus with a particular metageographical focus on how this materializes in major city regions In the different chapters this shifting relation is broached from different perspectives seaports airports brainports at different scales ranging from global scale analyses to case studies and by adopting a variety of methodologies straddling the wide variety of methodological approaches currently adopted in human geography research Researchers contributing to this edited volume come from different scholarly backgrounds sociology human geography regional planning which allows for a varied treatise of this research topic
