The German Campaign In Poland 1939:

The German Campaign in Poland, 1939 Robert M. Kennedy, 1956 *German Campaign in Poland (1939)* Robert M. Kennedy, 2003-02 This volume is one of a series produced by the American intelligence services after the Second World War and written by captive German officers who had detailed knowledge of the operation. It looks at the political situation before the outbreak of war on 1 September 1939 as well as examining in some detail German military developments up to the start of the war. The Polish military situation is included together with the actual German plans for the invasion. Operations are reported in great detail accompanied by maps. Operations by Army Groups North and South receive separate treatment but are always linked at the strategic level. There is a chronological treatment of the first battles and of the subsequent destruction of the Polish Armed Forces as well as the intervention by Russian forces under the terms of the Ribbentrop-Molotov agreement of August 1939 which freed Hitler from the fear of a two-front war. There are ten maps of the developing military campaign. As the campaign which started the Second World War, Poland in 1939 deserves study especially the German reactions to the lessons learned during the campaign, the solutions to which were in effect by May 1940 when the invasion of France and the Low Countries took place.

"The" German Campaign in Poland 1939 Robert M. Kennedy, 1956 *The German Campaign in Poland, 1939* Robert M. Kennedy, 1956 The German attack on Poland precipitated World War II making the Polish campaign one of particular significance to the student of the 1939-45 conflict. The lessons learned by the German Army in its operations in Poland were put to use in the later campaigns against the western Allies, the Balkan states and the Soviet Union. Poland also formed the testing ground for new theories on the use of armored forces and close air support of ground troops. The complete destruction of the Polish state and the removal of Poland from the map of eastern Europe were grim portents of the fate of the vanquished in the new concept of total war. The purpose of this campaign study is to provide the United States Army with a factual account of German military operations against Poland based on source material from captured records currently in the custody of The Adjutant General Department of the Army, monographs prepared by a number of former German officers for the Historical Division, United States Army Europe and such Polish accounts as were available.

Abstract **German Campaign In Poland (1939) [Illustrated Edition]** Major Robert M. Kennedy, 2014-06-13 Includes 6 maps and over 20 other illustrations. The German attack on Poland precipitated World War II making the Polish campaign one of particular significance to the student of the 1939-45 conflict. The lessons learned by the German Army in its operations in Poland were put to use in the later campaigns against the western Allies, the Balkan states and the Soviet Union. Poland also formed the testing ground for new theories on the use of armored forces and close air support of ground troops. The complete destruction of the Polish state and the removal of Poland from the map of eastern Europe were grim portents of the fate of the vanquished in the new concept of total war. The purpose of this campaign study is to provide the United States Army with a factual account of German military operations against Poland.

Citino, 2005-11-17 For Frederick the Great the prescription for warfare was simple kurz und vives short and lively wars that relied upon swift powerful and decisive military operations Robert Citino takes us on a dramatic march through Prussian and German military history to show how that primal theme played out time and time again Citino focuses on operational warfare to demonstrate continuity in German military campaigns from the time of Elector Frederick Wilhelm and his great sleigh drive against the Swedes to the age of Adolf Hitler and the blitzkrieg to the gates of Moscow Along the way he underscores the role played by the Prussian army in elevating a small vulnerable state to the ranks of the European powers describes how nineteenth century victories over Austria and France made the German army the most respected in Europe and reviews the lessons learned from the trenches of World War I Through this long view Citino reveals an essential recurrent pattern characterized by rapid troop movements and surprise attacks maneuvers to outflank the enemy and a determination to annihilate the opposition that made it possible for the Germans to fight armies often larger than their own He highlights the aggressiveness of Prussian and German commanders trained simply to find the enemy and keep attacking and destroys the myth of Auftragstaktik flexible command replacing it with the independence of subordinate commanders He also brings new interpretations to well known operations such as Moltke's 1866 campaign and the opening campaign in 1914 while introducing readers to less familiar but important battles like Langensalza and the Annaberg The German way of war as Citino shows was fostered by the development of a widely accepted and deeply embedded military culture that supported and rewarded aggression His book offers a fresh look at one of the most remarkable respected and reviled militaries of the past half millennium and marks another sterling contribution to the history of operational warfare *The German Campaign in Poland September 1 to October 5, 1939* United States Army Chief of Staff, 1942 *Poland 1939* Steven J. Zaloga, 2022-12-10

A detailed study of the first major conflict of the Second World War comparing the German Blitzkrieg offensive to the small but formidable Polish defense. The German invasion of Poland on 1 September 1939 began World War II in Europe pitting the newly modernized army of Europe's great industrial power against the much smaller Polish army and introducing the world to a new style of warfare. Blitzkrieg Panzer divisions spearheaded the German assault with Stuka dive bombers prowling ahead spreading terror and mayhem. This book demonstrates how the Polish army was not as backward as it is often portrayed and fielded a tank force larger than that of the contemporary US Army. Its stubborn defence did give the Germans some surprises and German casualties were relatively heavy for such a short campaign.

Riders of the Apocalypse David R Dorondo, 2012-05-15. Despite the enduring popular image of the blitzkrieg of World War II the German Army always depended on horses. It could not have waged war without them. While the Army's reliance on draft horses to pull artillery supply wagons and field kitchens is now generally acknowledged D R Dorondo's *Riders of the Apocalypse* examines the history of the German cavalry a combat arm that not only survived World War I but also rode to war again in 1939. Though concentrating on the period between 1939 and 1945 the book places that history firmly within the larger context of the mounted arm's development from the Franco Prussian War of 1870 to the Third Reich's surrender. Driven by both internal and external constraints to retain mounted forces after 1918 the German Army effectively did nothing to reduce much less eliminate the preponderance of non mechanized formations during its breakneck expansion under the Nazis after 1933. Instead politicized command decisions technical insufficiency industrial bottlenecks and finally wartime attrition meant that Army leaders were compelled to rely on a steadily growing number of combat horsemen throughout World War II. These horsemen were best represented by the 1st Cavalry Brigade later Division which saw combat in Poland the Netherlands France Russia and Hungary. Their service however came to be cruelly dishonored by the horsemen of the 8th Waffen SS Cavalry Division a unit whose troopers spent more time killing civilians than fighting enemy soldiers. Throughout the story of these formations and drawing extensively on both primary and secondary sources Dorondo shows how the cavalry's tradition carried on in a German and European world undergoing rapid military industrialization after the mid nineteenth century. And though *Riders of the Apocalypse* focuses on the German element of this tradition it also notes other countries continuing and in the case of Russia much more extensive use of combat horsemen after 1900. However precisely because the Nazi regime devoted so much effort to portray Germany's armed forces as fully modern and mechanized the combat effectiveness of so many German horsemen on the battlefields of Europe until 1945 remains a story that deserves to be more widely known. Dorondo's work does much to tell that story.

Case White Robert Forczyk, 2019-10-31. This fascinating title from renowned World War II historian Robert Forczyk tells the story of Case White. The German invasion of Poland on 1 September 1939 designated as Fall Weiss Case White was the event that sparked the outbreak of World War II in Europe. The campaign has widely been described as a textbook example of Blitzkrieg but it was actually a fairly conventional campaign as the

Wehrmacht was still learning how to use its new Panzers and dive bombers The Polish military is often misrepresented as hopelessly obsolete and outclassed by the Wehrmacht when in fact it was well equipped with modern weapons and armour Indeed the Polish possessed more tanks than the British and had cracked the German Enigma machine cipher Though the combined assault from Germany and the Soviet Union defeated Poland it could not crush the Polish fighting spirit and thousands of soldiers and airmen escaped to fight on other fronts The result of Case White was a brutal occupation as Polish Slavs found themselves marginalized and later eliminated paving the way for Hitler s vision of Lebensraum living space and his later betrayal and invasion of the Soviet Union in 1941 Using a wide array of sources Robert Forczyk challenges the myths of Case White to tell the full story of the invasion that sparked history s greatest conflict *Campaign in Poland 1939* United States Army Military Academy, Aleksandra Miesak Rohde, 2014-12-06 This previously classified military analysis of the German Invasion of Poland was conducted by the United States War Department in 1941 Included are six maps that were part of the original analysis terrain communications and permanent fortifications map 1 dispositions of opposing forces on August 31 and German Plan map 2 situation at dark on September 5 map 3 situation at dark on September 8 map 4 situation at dark on September 14 map 5 and situation at dark on September 20 map 6 The German campaign plan is reviewed as well as what was known of the Polish plan at the time There is also an analysis of comparative fighting strengths and a list of the principal commanders and their units This is a rare book and a valuable reference for every student and scholar of military history
