Earth That Modernism Built Kenny Cupers, 2024-11-26 Rewrites the history of architectural modernism for an age of environmental crisis and enduring colonialism      *Red Saxony* James Retallack, 2017-04-14 Red Saxony throws new light on the reciprocal relationship between political modernization and authoritarianism in Germany over the span of six decades Election battles were fought so fiercely in Imperial Germany because they reflected two kinds of democratization Social democratization could not be stopped but political democratization was opposed by many members of the German bourgeoisie Frightened by the electoral success of the Social Democrats after 1871 anti democrats deployed many strategies that flew in the face of electoral fairness They battled socialists liberals and Jews at election time but they also strove to rewrite the electoral rules of the game Using a regional lens to rethink older assumptions about Germany's changing political culture this volume focuses as much on contemporary Germans perceptions of electoral fairness as on their experiences of voting It devotes special attention to various semi democratic voting systems whereby a general and equal suffrage for the Reichstag was combined with limited and unequal ones for local and regional parliaments For the first time democratization at all three tiers of governance and their reciprocal effects are considered together Although the bourgeois face of German authoritarianism was nowhere more evident than in the Kingdom of Saxony Red Saxony illustrates how other Germans grew to fear the spectre of democracy Certainly twists and turns lay ahead yet that fear made it easier for Hitler and the Nazis to win elections in the 1920s and to entomb German democracy in 1933      **Frugal Innovation and Its Implementation**

**Changing Heritage** Francesco Bandarin, 2024-04-09

Changing Heritage presents the most comprehensive analysis of heritage issues available today. Critically analysing the complexity of the current and forthcoming issues faced by heritage, it presents insightful directions for the future. Drawing on the author's many years of experience working in senior positions at UNESCO, the book presents discussions of heritage sites all around the world. Today, our cultural and natural legacies face significant threats due to social and economic developments, political pressures, and unresolved historical issues. This book delves into these threats from two distinct perspectives: internal tensions and external pressures. The internal tensions include the disregard for human rights and gender equality, the increasing exploitation of heritage for political purposes, the development of post-colonial perspectives, and the necessity to reassess the established notion of universal value. External pressures stem from global processes: unsustainable tourism, political conflicts, ethnic clashes, and religious strife that are causing destruction in numerous parts of the world. Examining the dynamics between heritage and these internal tensions and external pressures, Bandarin offers insights into the challenges faced and emphasises the imperative role of civil society in safeguarding the value of heritage for present and future generations. Changing Heritage explores a wide range of issues surrounding the crisis in heritage management on an international level. It will be essential reading for heritage scholars, students, and professionals.

*The Bloomsbury Handbook of World Theory* Jeffrey R. Di Leo, Christian Moraru, 2021-11-18

Disciplines from literary studies to environmentalism have recently undergone a spectacular reorientation that has refocused entire fields, methodologies, and vocabularies on the world and its sister terms such as globe, planet, and earth. The Bloomsbury Handbook of World Theory examines what world means and what it accomplishes in different zones of academic study. The contributors raise questions such as: What happens when world is appended to a particular form of humanistic or scientific inquiry? How exactly does worlding bear on the theoretical operating system and the history of that field? What is the theory or theoretical model that allows world to function in a meaningful way in coordination with that knowledge domain? With contributions from 38 leading theorists from a vast range of fields including queer studies, religion, and pop culture, this is the first large reference work to consider the profound effect both within and outside the academy of the worlding of discourse in the 21st century.

**The Hamburg Dramaturgy by G.E. Lessing** Natalya Baldyga, 2018-10-26

While eighteenth-century playwright and critic Gotthold Ephraim Lessing made numerous contributions in his lifetime to the theater, the text that best documents his dynamic and shifting views on dramatic theory is also that which continues to resonate with later generations: the Hamburg Dramaturgy (*Hamburgische Dramaturgie*, 1767-69). This collection of 104 short essays represents one of the eighteenth century's most important critical engagements with the theater and its potential to promote humanistic discourse. Lessing's essays

are an immensely erudite deeply engaged witty ironic and occasionally scathing investigation of European theatrical culture bolstered by deep analysis of Aristotelian dramatic theory and utopian visions of theater as a vehicle for human connection This is the first complete English translation of Lessing s text with extensive annotations that place the work in its historical context For the first time English language readers can trace primary source references and link Lessing s observations on drama theory and performance not only to the plays he discusses but also to dramatic criticism and acting theory This volume also includes three introductory essays that situate Lessing s work both within his historical time period and in terms of his influence on Enlightenment and post Enlightenment theater and criticism The newly translated Hamburg Dramaturgy will speak to dramaturgs directors and humanities scholars who see theater not only for entertainment but also for philosophical and political debate
