Veröffentlichung ,1966 **National Military Establishments and the Advancement of Science and Technology** P. Forman,José M. Sánchez-Ron,2001-11-30 To some philosophers seeking to understand the human condition technology is a necessary guide But to think through the complex human phenomenon of technology we must tackle philosophy of science philosophy of culture moral issues comparative civilizational studies and the economics of specific industrial and military technologies in their historical contexts The philosopher wants to grasp the technological factor in this troubled world even as we see it is only one factor and that it does not speak openly for itself Put directly our human troubles to a considerable extent have been transformed exaggerated distorted even degraded perhaps transcended by what engineers and scientists entrepreneurs and politicians have wrought But our problems are ancient problems of dominations struggles survival values in conflict greed and insane sadisms To get some conceptual light on the social reality which seems immediately to be so complicated a philosopher will need to learn from the historians of technology A few years ago the philosopher Elisabeth Straker concluded that a historical philosophy of technology is required since history and history alone provides all those concepts that form part of the repertoire of the philosophical analysis of technology And she added that this goes far beyond the triviality that like other cultural achievements technology has its historical development Now historical comprehension is no substitute for a logical methodology in the analysis of technological problems **Geographers** T. W. Freeman,2016-01-28 An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought Subjects are drawn from all periods and from all parts of the world and include famous names as well as those less well known explorers independent thinkers and scholars Each paper describes the geographer s

education life and work and discusses their influence and spread of academic ideas Each study includes a select bibliography and brief chronology The work includes a general index and a cumulative index of geographers listed in volumes published to date In Search of New Zealand's Scientific Heritage Michael Edward Hoare,Linda G. the History of Science Arne Hessenbruch,2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

The University at War, 1914-25 T. Yearbook of Education 1966 George Z. F. Bereday,Joseph A. Lauwerys,2018-10-24 First published in 2005 Broadly speaking church state relations in education turn nowadays upon two chief issues 1 Should religion be taught in state schools And if so may the state interfere with the teaching 2 In countries where separate schools under church control exist should they have a share of public funds Church and state issues flare up anew whenever there appears a repressive government action or a dynamic drive of the churches for a larger share of privileges Both occur frequently enough to make this World Year Book a lively read **Historical Epistemology and European Philosophy of Science** Fabio Minazzi,2022-04-01

This book offers a comprehensive analysis on the evolution of philosophy of science with a special emphasis on the European tradition of the twentieth century At first it shows how the epistemological problem of the objectivity of knowledge and axiomatic knowledge have been previously tackled by transcendentalism critical rationalism and hermeneutics In turn it analyses the axiological dimension of scientific research moving from traditional model of science and of scientific methods to the construction of a new image of knowledge that leverages the philosophical tradition of the Milan School Using this historical epistemological approach the author rethinks the Kantian Transcendental showing how it could be better integrated in the current philosophy of science to answer important questions such as the relationship between science and history scientific and social perspectives and philosophy and technology among others Not only this book provides a comprehensive study of the evolution of European Philosophy of Science in the twentieth century yet it offers a new historical

and epistemological based approach that could be used to answers many urgent questions of contemporary societies **The Heritage of Soviet Oriental Studies** Michael Kemper,Stephan Conermann,2011-02 The Western field of oriental studies and orientalism criticised by Edward Said among others for encouraging the orient to be viewed in a particular way has a counterpart in Russia and the Soviet Union This book examines this Russian Soviet intellectual tradition of oriental scholarship covering Islamic history and Muslim literatures of the USSR republics of Central Asia and the Caucasus
