Developing Tools for Effective Learning and Personalisation of Education Manpreet Kaur Bagga, Laura Sara Agrati, 2024-08-20 Technology driven trends in the modern society have transformed the ways humans think and communicate. The latest technological artefacts and devices have a profound impact on the forms of interaction between individuals and also significantly influence the process of co-construction of knowledge. The COVID pandemic induced experience of remote teaching has significantly contributed to the widespread use of digital technologies in teaching learning processes, faculty communications, research collaborations, conferences and workshops. The crisis also led to an understanding of the uncertainty of returning to conventional normal and paved way for a new normal ushered by the COVID pandemic. Such transformations create a need for Institutions to prioritize identification of perspective models of digitalization in education. Salmon 2013 Teachers, teacher educators and policymakers need to collaborate for co-constructing the technology assisted classroom that will gradually evolve from teaching supplements to pivotal support for creating a personal learning environment. Dabbagh et al 2021 This article collection aims at examining teachers' experience in implementation of computer technologies and exploring gaps and challenges in the current academic educational practice with regard to use of digital tools. Various elements of digital environment including online courses, e-resources, virtual and augmented reality, artificial intelligence and robotics have become an integral component of learning and fostering students' skills, practical teaching experience and effective professional training. It is imperative that aspects of e-education are discussed at the global level in order to stimulate creation of personal learning environments, meet inclusive learning needs, support life-long education and identify relevant digital technologies for upgradation of pedagogical methods and teacher strategies in education.
