Competition Law in the ASEAN Countries Ploykaew Porananond, 2018-06-22 Amongst other regional organisations the Association of Southeast Asian Nations ASEAN stands out for the diversity of its ten Member States stemming from their respective economic and political heritage governance systems legal institutions stages of economic development and exposure to or reliance on foreign trade and investments As of 2017 however the regional bloc has formalised its focus on economic integration and development of a regional competition law Challenging this vision are the States very different national competition law systems ongoing problems with governmental intervention in the economy and lack of effective and efficient corruption free regulatory and juridical infrastructure This book the first detailed analysis of competition law in the ASEAN countries looks at the prospects of implementation for the regional law and compares the existing systems in each Member State Opening with a thorough description of the composition and organisation of the ASEAN the analysis proceeds to an in depth evaluation of such aspects as the following persistence of the ASEAN s traditional mode of dispute resolution often referred to as the ASEAN Way economic challenges posed by intra regional growth and globalisation the strong relationship between the business and government sectors and governmental interventions as cultural practices There is detailed reference throughout to case law legislation institutional announcements relevant treaties and literature on both the ASEAN and competition law As an important critical analysis of this major new regional competition law regime this book will be welcomed by competition law practitioners multinational corporation counsel and jurists officials and academics in a variety of legal fields Although the subject is specifically the ASEAN the analysis contributes to a better understanding of competition law regimes in developing economies and to the more general literature on global competition law

The Interplay Between Competition Law and Intellectual Property Gabriella Muscolo, Marina Tavassi, 2019-01-17 Although competition law and intellectual property are often interwoven until this book there has been little guidance on how they work together in practice As the intersection between the two fields continues to grow worldwide both in case law and in regulation the book s markets based approach focusing on sectors such as pharmaceuticals IT telecoms energy and agriculture in eleven of the world s most active jurisdictions provides a much needed in depth understanding of how this interplay reveals itself among the different legal systems Written by a range of authors including judges regulators academics economists and practitioners in both fields the book provides an international comparative perspective as well as detailed analysis of specific cases policies and proposals for change Among the issues and topics covered are the following free movement of goods and the protection of intellectual property rights standard essential patents intellectual property rights between technological development and consumer protection geo blocking online platforms and antitrust excessive prices In this context special attention is paid throughout to the increasing dialogue among Competition Authorities and between Judges and Competition Authorities around the world As matchless remedy for the lack of uniformity heretofore the

book's investigation of the nexus between competition law and intellectual property in different sectors and in various countries takes a giant step towards a more balanced approach and more levelled regulation and practices. It will be warmly appreciated by policy makers, decision makers, regulators, practitioners and academics in both competition law and intellectual property fields.

An Institutional Assessment of Antitrust Policy I. De Leon, 2009-04-20

Antitrust policy nominally plays an instrumental public interest role. The generally accepted notion is that it is a government instrument designed to intervene in relatively unregulated markets in order to preserve rivalry among independent buyers and sellers. Competition authorities are supposed to restrain business conduct that exercises monopoly power aimed at excluding competitors or exploiting consumers and clients. Thus it can be said although few pro-market theorists make the insight explicit that antitrust provisions reveal mistrust of the capacity of markets to promote social welfare. The inner logic, enforcement mechanisms and practical outcomes of antitrust provisions are all intrinsically contradictory to the natural dynamic course of market functioning. In Dr De Leon's challenging thesis, this mistrust of the market lies at the root of antitrust policy, giving rise always to a preference towards predicting the result of impersonal market forces rather than interpreting the entrepreneurial behaviour which creates those forces. And it is in Latin America that he finds the powerful evidence he needs to support his case. From the formative years of Latin American economic institutions during the Spanish Empire, economic regulations far from being driven by the pursuit of promoting free trade and economic freedom have been conceived, enacted and implemented in the context of deeply anti-market public policies: trade mercantilism and government dirigisme. The so-called neoliberal revolution of the 1990s, triggered by the Washington Consensus, did not really change the interventionist innuendo of these policies but merely restated the social welfare goal to be achieved: the pursuit of economic efficiency. Dr De Leon presents his case against the assumption that consumer welfare orientated policies such as antitrust do really promote entrepreneurship and market goals. Paradoxically, antitrust enforcement has undermined the transparency of market institutions in the name of promoting market competition. The author's provocative analysis marshals several sets of facts in support of his thesis, including the actual functioning of antitrust policy as reflected in case law in various Latin American countries; the preference of merger control over other less intrusive forms of market surveillance; the constrained role of competition advocacy against government acts; and the ineffective institutional structure created to apply the policy. Among the many specific topics treated are the following: government immunity; strategic industries; state-owned enterprises; politically influential groups; measurement of market concentration; the burden of proof of social welfare benefits; the role of joint trade associations and professional guilds; institutional arrangements that favour collusion; selective distribution; sector regulation; erosion of property rights; marginal role of courts in the antitrust system; leniency programs; and privatized public utilities. The growing significance of Latin America in the context of economic globalization endows this book with huge international interest. Written by a leading authority on the topic, this is the first book that presents a detailed description of

Latin American antitrust law and policy as it has been developed through numerous judicial opinions A wide variety of audiences around the world will find it of extraordinary value competition law specialists scholars and students of the subject policymakers and politicians in Latin America as well as all interested lawyers jurists and economists

The EU Leniency Policy Baskaran Balasingham, 2016-04-24 The European Union EU leniency programme is a key weapon in the Commission's fight against hard core cartels Much of the success of EU cartel enforcement depends on the continued effectiveness of the leniency policy and is especially critical in response to the growth of private enforcement This book offers a comprehensive description of the development of the policy along with a normative framework that promises to ensure the full legitimacy of the leniency programme the Commission's policy should pursue not only effectiveness but also fairness It is the first work to extensively analyse the effectiveness and fairness in the EU leniency policy Proceeding systematically from clarifying the concepts of effectiveness and fairness to addressing the tension between leniency and private actions for damages the author discusses the nature of and interrelations among such aspects as the following the theoretical model of the EU fining policy the compatibility of the EU enforcement system with fundamental rights protection the gathering and evaluation of evidence at the preliminary investigation stage the severity and foreseeability of the EU cartel fines judicial review by the EU Courts in competition matters to what extent the current policy is effective and fair and reforms brought about by the 2002 and 2006 Leniency Notices and the leniency related amendments by the 2014 Antitrust Damages Directive A key feature is the author's presentation of a normative framework to test the effectiveness deterrence and substantive fairness retribution of the EU leniency policy As a clear demonstration of how to forestall the danger of focusing on effectiveness of leniency at the expense of fairness both in a substantive and in a procedural sense this book is a major contribution to the literature of competition law It will prove to be of great value to competition authorities antitrust practitioners and interested academics not only in Europe but also throughout the world

Free Trade Agreements Robert K. Schaeffer, 1993 *International Statebuilding in West Africa* Abu Bakarr Bah, Nikolas Emmanuel, 2024-08-06 At the turn of the twenty first century manipulation of the democratic process coupled with preexisting political and economic grievances led to years long civil wars in Sierra Leone Liberia and Cote d'Ivoire During and after these conflicts international peacekeeping efforts and humanitarian intervention became the dominant paths for restoring stability by rebuilding the state Using these three countries as case studies this manuscript sheds light on internationally driven state building in war torn West African nations the problematic nature of the postcolonial state and the difficulties of securing its people's wellbeing Connecting peace and conflict democracy and international development studies Bah and Emmanuel argue that there is a clear nexus between the concepts and practices of peace building and statebuilding that peace building and statebuilding are not domestic matters alone but also matters of global intervention and that civil wars can be viewed as opportunities for state building through creative postwar partnerships and organization This study goes beyond the familiar concepts of failed states R2P peacekeeping and peace

mediation and introduces and enhances the concepts of state decay new humanitarianism people centered liberalism and institutional design In doing so it provides critical lessons that local and international actors can draw on as they try to figure out practical solutions to the political economic and social problems that impede the development of peaceful and democratic multiethnic postcolonial states in Africa and beyond Applying comparative historical methods and theory to archival materials and expert interviews International Statebuilding in West Africa seeks to shift the discourse on civil wars from their causes and implications to the opportunities they provide to rework failed states and to shift the discourse on African states from their colonial and neocolonial legacies to their shared moral and security interests with the rest of the world

Exclusionary Abuse after the Post Danmark I case Anders Jessen, 2017-07-01 Article 102 TFEU constitutes that a firm holding a dominant position in its market is not allowed to abuse this dominant market power through unilateral conduct Although this provision is clearly of great importance in curbing the adverse effects of market power it remains far from clear when dominant firms exclusionary conduct is in breach of this provision This book presents an in depth analysis of the limited case law soft law and theory in the field of law and economics on the matter confronting the complex issues raised by the effects based approach used to determine whether competition law has been breached and clarifying how this approach can best be applied in future cases Among the issues and topics covered are the following relevant case law notably Post Danmark I Tomra and Intel analyses and discussions of when and how to apply the effect based approach including by object restrictions economic theories in the context of Article 102 TFEU and predation versus exclusion While the book is grounded in the legal framework it also applies a law and economics based approach with the aim of supporting the legal arguments and conclusions and thereby providing more robust arguments for the reached conclusions As the first study to offer a much needed clarification of the assessment relating to exclusionary conduct within Article 102 TFEU after the Post Danmark I case this book provides suggestions on how to structure the approach thus creating greater legal certainty for dominant firms and their competitors and providing a sound basis for both practice and research in this area It is sure to be read and studied widely by practitioners and academics concerned with the application of Article 102 TFEU

Competition Law

Eugène Buttigieg, 2009-01-01 Although it is commonly assumed that consumers benefit from the application of competition law this is not necessarily always the case Economic efficiency is paramount thus competition law in Europe and antitrust law in the United States are designed primarily to protect business competitors and in Europe to promote market integration and it is only incidentally that such law may also serve to protect consumers That is the essential starting point of this penetrating critique The author explores the extent to which US antitrust law and EC competition law adequately safeguard consumer interests Specifically he shows how the two jurisdictions have gone about evaluating collusive practices abusive conduct by dominant firms and merger activity and how the policies thus formed have impacted upon the promotion of consumer interests He argues that unless consumer interests are directly and specifically addressed in the assessment

process maximization of consumer welfare is not sufficiently achieved Using rigorous analysis he develops legal arguments that can accomplish such goals as the following replace the economic theory of consumer welfare with a principle of consumer well being build consumer benefits into specific areas of competition policy assess competition cases so that income distribution effects are more beneficial to consumers and control mergers in such a way that efficiencies are passed directly to consumers The author argues that in the last analysis the promotion of consumer well being should be the sole or at least the primary goal of any antitrust regime Lawyers and scholars interested in the application and development and reform of competition law and policy will welcome this book They will find not only a fresh approach to interpretation and practice in their field comparing and contrasting two major systems of competition law but also an extremely lucid analysis of the various economic arguments used to highlight the consumer welfare enhancing or welfare reducing effects of business practices
