The Politics Of Global Borderlines:

The Politics of the Global Himadeep Muppidi, 2004 Though presented often as an objective process globalization is frequently analyzed from subjective perspectives that are closed to their own historical and geographical specificity Refusing the false choice between objectivity and subjectivity Himadeep Muppidi considers the production of the global as an intersubjective process involving the interplay of meanings identities and practices from historically different locations Muppidi illustrates how the politics of globalization are played out in two multicultural democracies India and the United States particularly rich examples given the increasing interactions between them in the areas of global economy and security Although they differ in their approaches to worldwide regulation of weapons of mass destruction India and the United States cooperate in opposing terrorism Treating globalization as an intersubjective process reveals the different political possibilities e g colonial coercion postcolonial ambivalence and postcolonial co option that are opened by global relays of meanings identities and power Muppidi concludes by exploring a variety of spaces and strategies for resisting the colonization of the global

Border Politics in a Global Era Kathleen Staudt, 2017-06-16 Initially research in border studies relied mainly on generalizations from cases in the US Mexico borderlands before subsequently burgeoning in Europe Border Politics in a Global Era seeks to expand the study further to include the post colonial South in response to the major challenge of interdisciplinary border studies to explore borderlands in many contexts with and across a variety of states including the so called developing post colonial states Culled from decades of firsthand observations of borders from around the world and written with a critical and gender lens the text is framed with attention to history geography and the power of films and travelogues to represent people as others Professor Kathleen Staudt advances border concepts categories and theories to focus on trade migration and security highlighting the importance of states their length of time since independence and border bureaucrats discretionary practices Drawing on her Border Inequalities Database for a global perspective Staudt calls for reducing inequalities and building institutions in the common grounds of borderlands The book features maps and other visuals with lists of links at the close of most chapters Broadly comparative in nature Border Politics in a Global Era will appeal not only to students of border studies it will also stimulate attention in comparative politics international studies and political geography

Border Politics Cengiz Günay, Nina Witjes, 2016-12-09 In the light of mass migration the rise of nationalism and the resurgence of global terrorism this timely volume brings the debate on border protection security and control to the centre stage of international relations research Rather than analysing borders as mere lines of territorial demarcation in a geopolitical sense it sheds new light on their changing role in defining and negotiating identity authority security and social and economic differences Bringing together innovative and interdisciplinary perspectives the book examines the nexus of authority society technology and culture while also providing in depth analyses of current international conflicts Regional case studies comprise the Ukraine crisis Nagorno Karabakh the emergence of new

territorial entities such as ISIS and maritime disputes in the South China Sea as well as the contestation and re construction of borders in the context of transnational movements Bringing together theoretical empirical and conceptual contributions by international scholars this Yearbook of the Austrian Institute for International Affairs offers novel perspectives on hotly debated issues in contemporary politics and will be of interest to researchers graduate students and political decision makers alike

The Politics of Decolonial Investigations Walter D. Mignolo,2021-07-09 In *The Politics of Decolonial Investigations* Walter D Mignolo provides a sweeping examination of how coloniality has operated around the world in its myriad forms from the sixteenth century to the twenty first Decolonial border thinking allows Mignolo to outline how the combination of the self fashioned narratives of Western civilization and the hegemony of Eurocentric thought served to eradicate all knowledges in non European languages and praxes of living and being Mignolo also traces the geopolitical origins of racialized and gendered classifications modernity globalization and cosmopolitanism placing them all within the framework of coloniality Drawing on the work of theorists and decolonial practitioners from the Global South and the Global East Mignolo shows how coloniality has provoked the emergence of decolonial politics initiated by delinking from all forms of Western knowledge and subjectivities The urgent task Mignolo stresses is the epistemic reconstitution of categories of thought and praxes of living destituted in the very process of building Western civilization and the idea of modernity The overcoming of the long lasting hegemony of the West and its distorted legacies is already underway in all areas of human existence Mignolo underscores the relevance of the politics of decolonial investigations in and outside the academy to liberate ourselves from canonized knowledge ways of knowing and praxes of living

The Politics of South American Boundaries Carlos Parodi,2002-04-30 Parodi shows that boundary disputes have and continue to play a major role in creating tensions in South America Of the 25 international territorial boundaries that exist in South America eight were marked with major wars eight with lesser wars and five with some level of violence As recently as 1995 the armies of Ecuador and Peru were at war to define a boundary In 1982 Argentina went to war inspired by the call to restore a piece of its mutilated national territory Venezuela and Guyana Guyana and Suriname and Suriname and French Guiana have not completed boundary demarcation agreements Bolivia s insistence on its right for sovereign access to the Pacific Ocean is a source of tension with Chile and Peru Colombia and Venezuela have unresolved boundary issues in the Gulf of Venezuela Clearly boundary disputes have and continue to play a major role in creating larger conflicts within South America Territorial boundaries are marks on the ground but as Parodi shows their staying power or stability depends on their grip on consciousness By examining the boundary theory of South American states and its implementation he also explains how the

symbolic system of South American boundaries is used to instill national identity mobilize people to war and control population and territory This text will be of particular interest to scholars students and researchers involved with Latin American politics diplomacy and international relations Psychoanalysis and the Future of Global Politics Robert Samuels,2023-08-31 This book offers a unique approach by using psychoanalytic theory to explain how we can resolve the most important issues facing the world today and in the future One of my main arguments is that we need to move beyond national politics in order to provide global solutions to global problems However there is a misplaced fear concerning global governance and much of this phobia is derived from a misunderstanding of history and human psychology Not only do we have to learn to give up our idealized investment in nations and nationalism but we also have to move beyond seeing the world from the perspective of a victim fantasy Since we often repress real signs of global progress we experience the global present and the future in negative ways To reverse this perspective we need to first understand the incredible progress humans have made in the last two hundred years but we also should not ignore the real threats we face **The Politics of International Environmental Management** A. Underdal,2012-12-06 Many of the major environmental challenges facing governments and societies today are collective problems calling for joint solutions However even when effective solutions can be found only through joint efforts international cooperation is often hard to establish and maintain This makes it all the more important to understand the conditions for success and the causes of failure This book examines some of the political mechanisms at work in the formation and operation of international environmental regimes What are the major factors that shape the national positions that governments bring to the negotiating table How do the international institutions and negotiation processes through which these preferences and positions are adjusted and aggregated affect outcomes What are the main mechanisms determining whether or not international environmental agreements are successfully implemented at the domestic level The Politics of International Environmental Management is published in cooperation with the European Science Foundation *The Politics of Dialogue* Ranabir Samaddar,2017-07-05 Offering a detailed analysis of post colonial South Asia The Politics of Dialogue discusses the creation and impact of borders and the pervasive tension between the new nations Neither all out war nor complete peace this fragile condition makes political leaders and strategists feel claustrophobic a war produces an end result but peace allows the rulers to carry out their policies for governing along their preferred path of development The book shows how cartographic communal and political lines are not only dividing countries but that they are being replicated within countries creating new visible and invisible internal frontiers It argues that in a situation where geopolitics constrains democracy the political class becomes incapable of coping with the tension between the inside outside eg democracy appears as an internal problem and geopolitics appears as a problem related to the outside **The Politics of Gender** Yoke-Lian Lee,2010-10-18 This new title in the Politics of series addresses the major theme of the politics of gender Chapters on a variety of issues contributed by experts in the field of gender include Human Trafficking

and EU Law Gender in International Relations the Gender Politics of Philosophy Political Theory the Construction of Masculinity in Hollywood Movies the Politics of Law and the Politics of Mainstreaming Gender in the Peace and Security Agenda of the African Union An A Z glossary offers supplementary information on key terms with entries including abortion Commission on the Status of Women ecofeminism equal access human rights migration population control and sex tourism
