The Predatory Behavior Of Wild Chimpanzees:

The Predatory Behavior of Wild Chimpanzees Geza Teleki, 1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania. He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968. Illustrated **Chimpanzee Behavior in the Wild** Toshisada Nishida, Koichiro Zamma, Takahisa Matsusaka, Agumi Inaba, William C. McGrew, 2010-09-15 Where We Stand Field workers/scientists of animal behavior including human behavior in nature have long been fascinated by wild chimpanzees. A person who once has studied wild chimpanzees will be eager to observe them again. A person who has studied them twice will make every effort to continue the study unless prevented from doing so. In short, behavioral primatology is addictive. Many people among them Jane Goodall, Richard Wrangham, and I do not regret that they have dedicated their whole lives to the study of wild chimpanzees. This is because the apes' behavior is always challenging. Chimpanzees are cheerful, charming, playful, curious, beautiful, easygoing, generous, tolerant, and trustworthy most of the time but also are cautious, cunning, ugly, violent, ferocious, bloated, thirsty, greedy, and disloyal at other times. We human beings share both the light and dark sides with our closest living relatives. For decades we have documented huge across-population variation in behavior as well as within-population variation. Cultural biology, now called cultural primatology as proposed 60 years ago by Kinji Imanishi, recently has flourished. *Wild Chimpanzees* Adam Clark Arcadi, 2018-06-21 An introduction to chimpanzee behavior and conservation synthesizing findings from long-term field studies in the African rainforest belt. [The Chimpanzees of the Taï Forest](#) Christophe Boesch, Hedwige Boesch-Achermann, 2000 The chimpanzees are the closest living evolutionary relatives to our own species, *Homo sapiens*. As such, they have long exerted a fascination over those with an interest in human evolution and what makes humans unique. Christophe Boesch and Hedwige Boesch-Achermann undertook an incredible observational study of a group of wild chimpanzees of the Tai forest in Côte d'Ivoire, spending some fifteen years in the West African jungle with them. This fascinating book is the result of these years of painstaking research. Chimpanzee behavior is documented here in all its impressive diversity and variety. Aggression, territoriality, social structure, and relationships, reproductive strategies, hunting, tool use—each of these is given its own chapter along with topics such as chimpanzee intelligence, life histories, and demography. The authors take care to place their observations within the broader context of research in behavioral ecology and to compare and contrast their findings with other important work on chimpanzee groups such as that by Jane Goodall. The book concludes with a summary chapter relating the chimpanzee findings to our understanding of human evolution. Combining careful scientific observation with a store of entertaining anecdotes, this is a lively and readable book. It also succeeds in shedding light on some of the central questions around the evolutionary relationships between the primates and, in particular, the affinity between chimpanzees and humans. This is a major contribution to the study of the great apes.

and a significant addition to debates about human ape evolution It has all the makings of a classic monograph

Chimpanzees of the Lakeshore Toshisada Nishida, 2011-12-01 Chimpanzees are humanity's closest living relations and are of enduring interest to a range of sciences from anthropology to zoology In the West many know of the pioneering work of Jane Goodall whose studies of these apes at Gombe in Tanzania are justly famous Less well known but equally important are the studies carried out by Toshisada Nishida on the eastern shore of Lake Tanganyika Comparison between the two sites yields both notable similarities and startling contrasts Nishida has written a comprehensive synthesis of his work on the behaviour and ecology of the chimpanzees of the Mahale Mountains With topics ranging from individual development to population specific behavioural patterns it reveals the complexity of social life from male struggles for dominant status to female travails in raising offspring Richly illustrated the author blends anecdotes with powerful data to explore the fascinating world of the chimpanzees of the lakeshore
