The Prediction of Corporate Earnings Michael F. Van Breda, 1979 *Global Competitiveness: Business Transformation in the Digital Era* Ade Gafar Abdullah, Isma Widiaty, Cep Abdullah, 2019-07-09 The proceedings of the Economics and Business Competitiveness International Conference EBCICON provides a selection of papers either research results or literature reviews on business transformation in the digital era Nine major subject areas comprising accounting and governance customer relations entrepreneurship environmental issues finance and investment human capital industrial revolution 4.0 international issues and operations and supply chain management are presented in the proceedings These papers will provide new insights into the knowledge and practice of business and economics in the digital era Therefore parties involved in business and economics such as academics practitioners business leaders and others will be interested in the contents of the proceedings **The Utility of Financial Ratios** Keith A. Houghton, D. Woodliff, 1984 **The End of Accounting and the Path Forward for Investors and Managers** Baruch Lev, Feng Gu, 2016-06-02 An innovative new valuation framework with truly useful economic indicators The End of Accounting and the Path Forward for Investors and Managers shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable alternative Based on a comprehensive large sample empirical analysis this book reports financial documents continuous deterioration in relevance to investors decisions An enlightening discussion details the reasons why accounting is losing relevance in today's market backed by numerous examples with real world impact Beyond simply identifying the problem this report offers a solution the Value Creation Report and demonstrates its utility in key industries New indicators focus on strategy and execution to identify and evaluate a company's true value creating resources for a more up to date approach to critical investment decision making While entire industries have come to rely on financial reports for vital information these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate This book demonstrates an alternative giving you a new framework for more informed decision making Discover a new comprehensive system of economic indicators Focus on strategic value creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable up to date information Major corporate decisions such as restructuring and M A are predicated on financial indicators of profitability and asset liabilities values These documents move mountains so what happens if they're based on faulty indicators that fail to show the true value of the company The End of Accounting and the Path Forward for Investors and Managers shows you the reality and offers a new blueprint for more accurate valuation Application of Intelligent Systems in Multi-modal Information Analytics Vijayan Sugumaran, A. G. Sreedevi, Zheng Xu, 2022-05-07 This book provides comprehensive coverage of the latest advances and trends in information technology science and engineering Specifically it addresses a number of broad themes including multimodal informatics data mining agent based and multi agent systems for health and education informatics

which inspire the development of intelligent information technologies The contributions cover a wide range of topics such as AI applications and innovations in health and education informatics data and knowledge management multimodal application management and web social media mining for multimodal informatics Outlining promising future research directions the book is a valuable resource for students researchers and professionals and a useful reference guide for newcomers to the field This book is a compilation of the papers presented in the 4th International Conference on Multi modal Information Analytics held online on April 23 2022 *Fintech with Artificial Intelligence, Big Data, and Blockchain* Paul Moon Sub Choi, Seth H. Huang, 2021-03-08 This book introduces readers to recent advancements in financial technologies The contents cover some of the state of the art fields in financial technology practice and research associated with artificial intelligence big data and blockchain all of which are transforming the nature of how products and services are designed and delivered making less adaptable institutions fast become obsolete The book provides the fundamental framework research insights and empirical evidence in the efficacy of these new technologies employing practical and academic approaches to help professionals and academics reach innovative solutions and grow competitive strengths **Investment Valuation** Aswath Damodaran, 2002-01-31 Valuation is a topic that is extensively covered in business degree programs throughout the country Damodaran's revisions to Investment Valuation are an addition to the needs of these programs *Company Valuation and Information in Analyst Forecasts* Daniel Kreutzmann, 2010 This thesis focuses on the three primitive value drivers of each company valuation model that is based on fundamental analysis the discount rate the expected future payoffs during the explicit forecasting period and the terminal value at the end of the explicit forecasting period While the first factor is analyzed theoretically by incorporating the government into the classical valuation framework this thesis studies the other two factors by investigating forecasts made by professional investors i.e. financial analysts In the first part we show that the government's and the shareholders discount rate usually differ and analyze how the government's and shareholders different objectives lead to conflicts in the context of capital budgeting The empirical part of this thesis shows that macroeconomic information is frequently used by financial analysts when updating their earnings expectations and that target price forecasts made by financial analysts can be used to predict abnormal returns **Financial Analysis and the Predictability of Important Economic Events** Ahmed Riahi-Belkaoui, 1998-07-28 Financial analysis based on ratio analysis has been used as a tool for analyzing the financial strength of corporations Although ratio analysis is generally used as a univariate strategy the accounting and finance literature has evolved to include multivariate based models in financial analysis and these models can be used to explain important economic events and often predict them Thus in an exhaustive coverage of the economic events to which they can be applied Riahi Belkaoui discusses these models in a way that will have special value to corporate management financial planners and to their colleagues in the academic community who specialize in business and economic analysis *Multicriteria Decision Aid Methods for the Prediction of Business Failure* Constantin Zopounidis, Dimitra

Paraschou,1998-01-31 This book provides a new point of view on the subject of business failure prediction through the application of multicriteria analysis methods The aim of the book is to provide a review of the research in the area and to explore the adequacy of these methods to one of the most complex problems in the area of financial management In addition the book explores the applications of the methods so that it can become a very useful tool for researchers and practitioners The analysis of the modeling and the results in these applications provides the background for further employment of the methods
