Archaeology of the Eastern Woodlands David H. Dye, 2008 Patty Jo Watson's prolific career began in the early 1950s as an energetic graduate student at the University of Chicago and culminated with her induction into the National Academy of Sciences and subsequent retirement from Washington University in 2003. During that time her groundbreaking research impacted multiple fields within the discipline of archaeology but her astonishing research into the underground caves of the eastern United States recognizes her as one of the world's leading experts on cave archaeology. In honor of Dr. Watson and her monumental achievements in the field, twenty-two established scholars present in this volume new and insightful research into prehistoric and historic use of southeastern dark zones. *Cave Archaeology of the Eastern Woodlands*, edited by David H. Dye, explores how prehistoric and historic peoples utilized caves as a means to further their economic growth and represent cultural values within their societies. The essays range in topics from early gypsum mining to rare American Indian cave art from historic saltpeter extraction to current archaeobotanical and paleofecal research. Dye and the contributors contend that studies of deep zone caves reveal multiple insights into the values, beliefs, and cultural lifeways of ancient and historic peoples. In addition to presenting new research in the field, contributors also place particular emphasis on Dr. Watson's influential cave research and how it has molded their own work. The essays convey a sense of wonder at the unique and sometimes harrowing world of caves, and readers will get a sense of why Native Americans regarded the Underworld or Beneathworld as a supernatural realm to be tread upon with great respect and caution. This volume of uniformly excellent essays will no doubt be a lantern that sheds light onto the importance of studying and understanding the all too secret world of underground caves. David H. Dye is professor of archaeology in the Department of Earth Sciences at the University of Memphis and a former student of Patty Jo Watson's. He is author of *Cycles of Violence: An Archaeology of Peace and War in Native Eastern North America*, coeditor with Richard J. Chacon of *The Taking and Displaying of Human Body Parts as Trophies by Amerindians*, and with Cheryl Anne Cox of *Towns and Temples Along the Mississippi*. *Sacred Darkness* Holley Moyes, 2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman, deep caves were never used primarily as habitation sites for early humans. Rather, in both ancient and contemporary contexts, caves have served primarily as ritual spaces. In *Sacred Darkness*, contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice. Covering the ritual use of caves in Europe, Asia, Australia, Africa, Mesoamerica, and the US Southwest and Eastern woodlands, this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day. These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices. This state-of-the-art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion, sacred landscape, or cosmology and a must read for any archaeologist interested in caves. **North**

American Zooarchaeology Meagan Elizabeth Dennison, Jennifer Lynn Green, Samantha Upton, 2023-07-21 Walter E Klippel came to the University of Tennessee in 1977 as an assistant professor of anthropology. In the forty years that followed he supervised and mentored countless students in archaeology and biological anthropology, published more than fifty journal articles and book chapters, and assembled a zooarchaeological comparative collection of national significance. During his tenure Klippel's important contributions to the field of zooarchaeology would impact not only his students and colleagues but the development of zooarchaeological research as a whole. Even after his retirement in 2017 Klippel's influence is readily apparent in the studies of his contemporaries. *North American Zooarchaeology: Reflections on History and Continuity* is their tribute to his work. Developed by friends, students, and colleagues of Walter Klippel, *North American Zooarchaeology* presents a wide-ranging collection of essays through the lens of his remarkable career. Each chapter of the volume represents a prevailing theme notable in Klippel's research, including geological and landscape contexts, taphonomy, and the incorporation of actualistic methodologies and new technologies into zooarchaeological analyses. The diversity of topics represented across the ten chapters showcases just how extensive Klippel's research interests are and suggest how much contemporary zooarchaeology owes to his vision. The authors take up this broad palette to explore the various ways in which the framework of zooarchaeology can be used and applied in nontraditional settings. With a foreword by Bonnie Styles and Bruce McMillan, longtime friends and colleagues of Walter Klippel, this volume reflects on the history and continuity of zooarchaeology in North America and honors one of its most notable contemporary contributors. With its multifaceted approach, this volume is sure to appeal to a broad array of practitioners in the field of zooarchaeology.

Powhatan's Mantle Gregory A. Waselkov, Peter H. Wood, M. Thomas Hatley, 2006-12-01 Considered to be one of the all-time classic studies of southeastern Native peoples, *Powhatan's Mantle* proves more topical, comprehensive, and insightful than ever before in this revised edition for twenty-first-century scholars and students.

Archaeology of the Appalachian Highlands Lynne P. Sullivan, Susan C. Prezzano, 2001 This volume is a major synthesis of the archaeology of the Appalachian region and includes much material that was previously unpublished or underpublished. The information and interpretations presented will be very useful for archaeologists working in eastern North America who are interested in this diverse region.

C. Clifford Boyd Jr. Radford University *Archaeology of the Appalachian Highlands* reveals that every part of Appalachia yields archaeological evidence significant to understanding the broad prehistoric sweep of the American Indians. In this most welcome volume, editors Lynn Sullivan and Susan Prezzano have assembled the most current interpretations of archaeological theory, technology, and cultural history as these occur in the highlands of eastern North America. This volume shatters myths about Appalachian and its past.
