The Present Relevance Of The Primitive In Architecture:

Die Aktualität Des Primitiven in Der Architektur Nold Egenter, 1992 **Architectural anthropology** Nold Egenter, 1992 **Encyclopedia of Anthropology** H. James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories Cities in Transition Tasleem Shakur, 2005 **Architecture and Mathematics from Antiquity to the Future** Kim Williams, Michael J. Ostwald, 2015-02-09 Every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order Mathematics is also central to the production of architecture to its methods of measurement fabrication and analysis This two volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected Over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics Contributors of these chapters come from a wide range of disciplines and backgrounds architects mathematicians historians theoreticians scientists and educators Through this work architecture may be seen and understood in a new light by professionals as well as non professionals Volume I covers architecture from antiquity through Egyptian Mayan Greek Roman Medieval Inkan Gothic and early Renaissance eras and styles The themes that are covered range from symbolism and proportion to measurement and structural stability From Europe to Africa Asia and South America the chapters span different countries cultures and practices **Intentions in Architecture** Christian Norberg-Schulz, 1968-09-15 The chief focus of the book is on the symbolic and linguistic The purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art Norberg Schulz is a practicing architect his buildings stand in several countries and he elucidates the nature of architectural reality with a practiced eye and from a practical viewpoint Although the methods and theory that his book develops are uncompromisingly rigorous and tightly formed they are everywhere related to actual building through specific examples and through the use of over 100 photographs The structure that Norberg Schulz has fashioned is surely one of the most impressive intellectual edifices that any architect has ever produced The materials that are organically worked into it include Gestalt psychology the mechanics of perception information theory modern analytic philosophy and in particular linguistic analysis and the general theory of signs and symbols The result however is not an eclectic hodge podge all these materials have their place and purpose none is applied extraneously for show or purely decorative effect And all this divergent material had to be joined according to plan within formal bounds in order to produce a theory with equally divergent applications one that can treat not only of the aesthetics of architecture but equally well of its social psychological and cultural effects The chief focus of the book is on the symbolic and linguistic The purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the

designer insofar as architecture is an art The American Architect and Building News ,1892 **Modern Architecture and Climate** Daniel A. Barber,2023-04-11 How climate influenced the design strategies of modernist architects Modern Architecture and Climate explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well known architects such as Richard Neutra Le Corbusier Lcio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today s zero carbon design **History of Architectural Theory** Hanno-Walter Kruft,1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive *Domestic Architecture: containing a history of the science, and the principles of designing public buildings, private dwelling-houses ... With observations on rural residences ... and instructions on the art of laying out and embellishing grounds. With a portrait* Richard Brown (Architect),1852
