The Price Of Access:

Access Points Sean D. Ehrlich, 2011-09-26 Access Points develops a new theory about how democratic institutions influence policy outcomes Access Point Theory argues that the more points of access that institutions provide to interest groups the cheaper lobbying will be and thus the more lobbying will occur This will lead to more complex policy as policymakers insert specific provisions to benefit special interests and if one side of the debate has a lobbying advantage to more biased policy as the advantaged side is able to better take advantage of the cheaper lobbying This book then uses Access Point Theory to explain why some countries have more protectionist and more complex trade policies than other why some countries have stronger environmental and banking regulations than others and why some countries have more complicated tax codes than others In policy area after policy area this book finds that more access points lead to more biased and more complex policy Access Points provides scholars with a powerful tool to explain how political institutions matter and why countries implement the policies they do Handbook of Industrial Organization Mark Armstrong, Robert H. Porter, 2007-10-05 This is Volume 3 of the Handbook of Industrial Organization series HIO Volumes 1 2 published simultaneously in 1989 and many of the chapters were widely cited and appeared on graduate reading lists Since the first volumes published the field of industrial organization has continued to evolve and this volume fills the gaps While the first two volumes of HIO contain much more discussion of the theoretical literature than of the empirical literature it was representative of the field at that time Since then the empirical literature has flourished while the theoretical literature has continued to grow and this new volume reflects that change of emphasis This volume is an excellent reference and teaching supplement for industrial organization or industrial economics the microeconomics field that focuses on business behavior and its implications for both market structures and processes and for related public policies Part of the renowned Handbooks in Economics series Chapters are contributed by some of the leading experts in their fields A source reference and teaching supplement for industrial organizations or industrial economists Implications of Ultra-Low-Cost Access to Space Todd Harrison, Andrew Hunter, Kaitlyn Johnson, Thomas Roberts, 2017-04-03 Since the advent of the space age a primary constraint on military commercial and civil space missions has been the cost of launch Launching objects into space requires substantial investments in launch systems and infrastructure which has restricted the market to only a handful of national governments and several large private companies This study explores the possibility of a space industry significantly less constrained by the cost of access to space **Universal Service** United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2000 Review of National Telecommunications Policy, 1990 *Regulation and Entry into Telecommunications Markets* Paul de Bijl, Martin Peitz, 2003-01-09 This book analyses telecommunications markets from early to mature competition filling the gap between the existing economic literature on competition and the real life application of theory to policy Paul De Bijl and Martin Peitz focus on both the transitory and the persistent asymmetries

between telephone companies investigating the extent to which access price and retail price regulation stimulate both short and long term competition They explore and compare various settings such as non linear versus linear pricing facilities based versus unbundling based or carrier select based competition non segmented versus segmented markets On the basis of their analysis De Bijl and Peitz then formulate guidelines for policy This book is a valuable resource for academics regulators and telecommunications professionals It is accompanied by simulation programs devised by the authors both to establish and to illustrate their results
