Selected Writings Sir Thomas Browne, 1995 Browne's elaborate wit engages us by its reflective at times outrageous tone He can parody himself if elegancy still proceedeth we shall within few years be fain to learn Latin to understand English He was rich in various knowledge exuberant in conceptions and conceits contemplative imaginative often truly great and magnificent in his style Coleridge said His work has marked generations of English writers Sir Thomas Browne Gavin Francis, 2023-04-15 In this book Gavin Francis writes about the resonance for him as a medic in reading the work of early modern polymath Sir Thomas Browne Sir Thomas Browne 1605-1682 was an English physician wordsmith and polymath who contributed hundreds of words to the English language such as medical electricity migrant and computer After studying medicine in Montpellier Padua and Leiden he settled in Norwich where he practised as a doctor and wrote some of the greatest books of the seventeenth century still read for their accessibility and eloquence In *Sir Thomas Browne The Opium of Time* Dr Gavin Francis examines Browne's work through a variety of themes ambiguity curiosity vitality piety humility misogyny mobility and mortality He argues that the work has lost little of its power and wisdom and none of its beauty *Religio Medici* Religion of the Doctor examined the vexed question of faith in a God who to a physician seemed indifferent to suffering *Pseudodoxia Epidemica* *Vulgar Errors* gave free rein to an agile curiosity and sought to debunk notions then commonly believed such as that dead kingfishers indicate the direction of the wind or that a woman could get pregnant from

sharing a bath with a man Urne Buriall was Browne's meditation on mortality occasioned by a find of funerary urns while Museum Clausum Hidden Museum sets out a series of thought experiments and counterfactuals such as how history might have been different had Alexander the Great marched west instead of east Gavin Francis draws on his own experiences as a twenty first century writer and doctor to discover that although many centuries separate him from Browne they share a fundamental curiosity about the world and about people

Thomas Browne and the Writing of Early Modern Science Claire Preston, 2005-02-17 Claire Preston argues that Thomas Browne's work can be fully understood only within the range of disciplines and practices associated with natural philosophy and early modern empiricism Early modern methods of cataloguing collecting experimentation and observation organised his writing on many subjects from medicine and botany to archaeology and antiquarianism Browne framed philosophical concerns in the terms of civil behaviour with collaborative networks of intellectual exchange investigative selflessness courtesy modesty and ultimately the generosity of the natural world itself all characterising the return to innocent knowledge which for Browne is the proper end of human enquiry In this major evaluation of Browne's oeuvre Preston examines how the developing essay form the discourse of scientific experiment and above all Bacon's model of intellectual progress and cooperation determined the unique character of Browne's contributions to early modern literature science and philosophy
