Making Transportation Pay Henry H. Norris,1927 *The Science of Consequences* Susan M. Schneider,2012-12-11
Actions have consequences and the ability to learn from them revolutionized life on earth While it s easy enough to see that
consequences are important where would we be without positive reinforcement few have heard there s a science of
consequences with principles that affect us every day Despite their variety consequences appear to follow a common set of
scientific principles and share some similar effects in the brain such as the pleasure centers Nature and nurture always work
together and scientists have demonstrated that learning from consequences predictably activates genes and restructures the
brain Applications are everywhere at home at work and at school and that s just for starters Individually and societally for
example self control pits short term against long term consequences Ten years in the making this award winning book tells a
tale ranging from genetics to neurotransmitters from emotion to language from parenting to politics taking an inclusive
interdisciplinary approach to show how something so deceptively simple can help make sense of so much *Inaugural*
