Skeleton In The Closet 1st Edition:

The Making of the Modern Body Catherine Gallagher, Thomas Laqueur, 1987-02-06 Scholars have only recently discovered that the human body itself has a history Not only has it been perceived interpreted and represented differently in different epochs but it has also been lived differently brought into being within widely dissimilar material cultures subjected to various technologies and means of control and incorporated into different rhythms of production and consumption pleasure and pain The eight articles in this volume support supplement and explore the significance of these insights They belong to a new historical endeavor that derives partly from the crossing of historical with anthropological investigations partly from social historians deepening interest in culture partly from the thematization of the body in modern philosophy especially phenomenology and partly from the emphasis on gender sexuality and women s history that large numbers of feminist scholars have brought to all disciplines *Household News* ,1894 **Catalog of Copyright Entries. Montaigne Philippe Desan,2019-01-29 A definitive biography of the great French essayist and thinker One of the most important writers and thinkers of the Renaissance Michel de Montaigne 1533-92 helped invent a literary genre that seemed more modern than anything that had come before But did he do it as he suggests in his *Essays* by retreating to his chateau and stoically detaching himself from his violent times Philippe Desan overturns this long standing myth by showing that Montaigne was constantly connected to and concerned with realizing his political ambitions and that the literary and philosophical character of the *Essays* largely depends on them Desan shows how Montaigne conceived of each edition of the *Essays* as an indispensable prerequisite to the next stage of his public career It was only after his political failure that Montaigne took refuge in literature and even then it was his political experience that enabled him to find the right tone for his genre The most comprehensive and authoritative biography of Montaigne yet written this sweeping narrative offers a fascinating new picture of his life and work

Materializing Gender in Eighteenth-Century Europe HeidiA. Strobel,2017-07-05 Art history has

enriched the study of material culture as a scholarly field This interdisciplinary volume enhances this literature through the contributors engagement with gender as the conceptual locus of analysis in terms of femininity masculinity and the spaces in between Collectively these essays by art historians and museum professionals argue for a more complex understanding of the relationship between objects and subjects in gendered terms The objects under consideration range from the quotidian to the exotic including beds guns fans needle paintings prints drawings mantillas almanacs reticules silver punch bowls and collage These material goods may have been intended to enforce and affirm gendered norms however as the essays demonstrate their use by subjects frequently put normative formations of gender into question revealing the impossibility of permanently fixing gender in relation to material goods concepts or bodies This book will appeal to art historians museum professionals women s and gender studies specialists students and all those interested in the history of objects in everyday life
