Landmark Cases in EU Law, Volume 1 Paul Craig, Robert Schütze, 2025-05-29 From Van Gend en Loos and Costa v ENEL to Cassis de Dijon and Consten and Grundig Landmark Cases in EU Law explores the most important and well known EU law cases in two volumes These volumes show how the European Court of Justice has played a fundamental role in the construction of the European Union in the past 70 years Many EU landmark cases have been controversial yet no one can deny that they have been essential in defining the Union legal order as we find it today Volume 1 explores the constitutional cases that have come to define the legal nature and competences of the Union its judicial architecture as well as its fundamental rights system Each of the twenty cases within this volume is placed in its historical and doctrinal context and each chapter also presents the history of its reception by the Court and academia

How the EU Really Works Olivier Costa, Nathalie Brack, 2016-04-29 The European Union is facing a profound crisis and is confronted with multiple challenges Over the last two decades it has experienced a series of dramatic changes to its powers its institutional design its constitutional framework and its borders At the same time the uneasy relationship between European citizens and elites has complicated both the reform and the function of the Union While the Lisbon treaty provided some answers to crucial questions it did not clarify the nature of the EU which remains at the crossroads of federal and intergovernmental logic The current economic and financial crisis puts the EU's legitimacy further under pressure and creates the impression of a turning point This book provides a concise analysis of the EU and its dynamics by paying particular attention to its day to day operation It aims to help students and scholars understand its evolution its institutions its decision making and the interactions between the EU and various actors Avoiding abstract theorizing the authors propose an easy to read analysis of how the Union works while recognizing the complexity of the situation Throughout the book the key issues of European integration are addressed democratic deficit politicization the role of member states institutional crisis and citizen involvement

Taking Employment Discrimination Seriously: Chinese and European Perspectives Yuwen Li, Jenny Goldschmidt, 2009-06-02

Employment discrimination is present in any society However this severe social problem has escalated in the post Mao era in China The imbalance between supply and demand in the labour market combined with a lack of general consciousness regarding labour rights have contributed to the swift spread of discrimination This book contains the most recent research on

the reality of discrimination in China and advocates for effective employment equality protection through law and specialised equality institutions The study of equal treatment in the legal systems of the EU illustrates the important contribution law together with general policies can make to the improvement of equality in employment While both systems face a distinctive range and degree of problems employment discrimination ought to be taken seriously in China and the countries of the EU

The Impact of European Rights on National Legal Cultures Miriam Aziz, 2004-07-01 This book contributes to the debate about the impact of European Community Law on the national constitutional orders and cultures of the respective Member States The author examines the doctrine of sovereignty as a mechanism within which this impact may be best assessed and in particular how it underwrites the tension between European Union rights and the rights provided by the respective legal orders of the Member States In particular the book focuses on political social and civil rights drawing from T H Marshall s typology In endorsing an appropriate analytical framework the book challenges both existing law and secondary literature in order to argue that the terminology the concepts and the tools which are used to assess the impact of the EC law on the national constitutional orders are to be selected with great care This is particularly apposite given the complexity of constitutional diversity in terms of national constitutions and their reception of EC law It is also important because of the variety of approaches involved in the constitutional adjustment of the *acquis* of the Union within the context of the increasing drive to constitutionalisation of the Union on the one hand and enlargement on the other

Competitiveness in the European Economy Stefan Collignon, Piero Esposito, 2014-02-05 This book deals with the relationship between the competitiveness of countries in Europe and the analysis of macroeconomic imbalances It focuses mainly on a European analysis along with special studies of the German

economy which is rarely considered to be a cause for the current crisis The book also compares Germany with Italy providing a comparative perspective on structural reforms The first part of this book analyses macroeconomic imbalances based on a new framework from the analysis of the flow of funds rather than balance of payments and presents an alternative measure of unit labour cost comparisons to investigate the relationship between imbalances and competitiveness The second part is dedicated to the analysis of the trade performance of Germany and Italy and the sustainability of the German model in the EMU The third part describes the reform policies implemented by Germany and their effect on imbalances this includes wage moderation the labour market reforms and weak labour demand The final part explores the regional inequalities within Germany and Italy providing useful lessons regarding fiscal federalism and regional banking developments In conclusion a big part of the problems within the Euro Area are generated by the use of a wrong framework of analysis where the EMU is considered as a fixed exchange rate regime and not a single country This book provides an alternative view which holds at the core the relationship between sectors It is stressed throughout the book that the German behaviour has contributed to the rise of imbalances between countries due to its growth model not suitable for a big developed country in a currency union This book also finds that stressing banking integration within countries helps to reduce regional inequalities which has important implications for the management of Europe's future banking union and macroeconomic imbalances *Linkage*

aspects of anti dumping and anti subsidy investigations and emergency action against imports safeguards *A European Strategy for Jobs and Growth* Great Britain: Parliament: House of Lords: European Union Committee, 2006-03-16 This report by the European Union Committee examines the progress of the European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile **ECGBL 2022 16th European Conference on Game-Based Learning** Conceição Costa, 2022-10-06 **European 'Security' Governance** George Christou, Stuart Croft, 2014-06-11 This book argues that we can understand and explain the EU as a security and peace actor through a framework of an updated and deepened concept of security governance It elaborates and develops on the current literature on security governance in order to provide a more theoretically driven analysis of the EU in security Whilst the current literature on security governance in Europe is conceptually rich there still remains a gap between those that do security governance and those that focus on security per se A theoretical framework is constructed with the objective of creating a conversation between these two literatures and the utility of such a framework is demonstrated through its application to the geospatial dimensions of EU security as well as specific cases studies in varied fields of EU security This book was originally published as a special issue of European Security Climate change and biodiversity in the European Union overseas entities , **Serious Crime and the Requirement of Respect for Human Rights in European Democracies** Council of Europe. Secretariat, International Centre of Sociological, Penal, and Penitentiary Research and Studies, 1997-01-01 The Arab World Paris Public Liability in EU Law Pekka Aalto, 2011-11-01 Over the last two decades public law liability for breach of European Union law has been subject to remarkable developments This book examines the convergence between its two constituent systems the damages liability of the EU and that of its Member States for failing to comply with EU rules Member State liability based as it is on the Francovich case 1991 and Brasserie du P cheur and Factortame 1996 judgments of the European Court of Justice ECJ is

well established But it is yet to be closely scrutinised by reference to the detailed rules on the liability of the European Union The focus of the book is on the two key legal criteria that are common to both systems namely the grant of rights to individuals by EU law and the notion of sufficiently serious breach of such rights The analysis concentrates on developments in the case law of the ECJ and the General Court since the Bergaderm judgment 2000 which consolidated the convergence of the two liability systems that was first indicated in Brasserie du P cheur and Factortame These two criteria are set side by side to evaluate the extent in real terms of the convergence of Member State and EU institutional damages liability and to determine the extent to which one has influenced the other This book shows that although full convergence between the two liability systems is not likely each stream of case law should look to the other more actively as this important element of EU remedial law develops Convergence in EU law public liability is supported by developments in adjacent areas most notably European tort law and European administrative law This study also illustrates how convergence in the EU liability systems to date has had spill over effects into national public liability law

EU Data Privacy Law and Serious Crime Nora Ni Loideain, 2025-07-22 This book provides the first comprehensive doctrinal and comparative study to examine the influence of the fundamental human right to respect for private life on data retention within EU law specifically communications data and passenger name record data for the purpose of countering serious crime First it is the only academic publication that offers a complete picture of the EU s institutions not just the Court of Justice of the EU at work in a legally and politically sensitive field from a variety of perspectives thereby contributing to a scholarly understanding of topics which tend to attract generalized opinions not based on detailed analysis of law and practice in specific areas Secondly this original analysis of EU data retention law casts a spotlight on the real and actual extent of the weight now being given in the mainstreaming of fundamental rights within the EU policymaking process providing a more complete picture of the role and impact of human rights on this area of law and policymaking Thirdly this book is the only work to outline and examine in detail the impact of the tensions and dialogue between the EU and European Convention on Human Rights ECHR legal systems within the case law of both courts on data privacy and serious crime In addition this book also sets out the implications of the above analysis and recent landmark jurisprudence on Article 8 ECHR and Articles 7 and 8 of the EU Charter of Fundamental Rights for new related EU legislation including Directive 2016 680 on data processing for the purposes of the prevention investigation detection or prosecution of criminal offences and relevant provisions of the forthcoming E Privacy Regulation

UK Public Law and European Law Gordon Anthony, 2002-05-11 Academic attention has in recent years increasingly focused upon the Europeanization of national legal orders The interaction of domestic and supranational standards while often presented as

problematic enables national courts to use European law as a reference point against which to develop domestic principle and practice The effects of such borrowing can be far reaching Courts may assume an enhanced institutional role relative to other branches of the State and individuals may benefit from the introduction of new remedies and principles of judicial review This book examines the dynamics of the process whereby UK courts borrow principle and practice from European law It argues that recent internal developments in UK law notably the passage of the Human Rights Act present new possibilities for legal integration Although UK courts have already demonstrated a willingness to use European law creatively the book suggests that integration has been unduly constrained by the previously unincorporated status of the ECHR and by the courts justification for the reception of EU law Focusing in particular on the principles of administrative law applied by courts in judicial review proceedings the book highlights how the emergence of new principles of review has been frustrated by the courts inability to view EU law and the ECHR as part of an interlocking whole The book s central argument therefore is that the Human Rights Act coupled with the more general programme of constitutional reform introduced by New Labour now offers the courts the opportunity to reassess the nature of the interactive relationship that domestic law has with European law UK Public Law and European Law The Dynamics of Legal Integration will be of interest to public lawyers European lawyers and political scientists alike It offers a comprehensive overview of existing jurisprudence dealing with the reception of European law into the domestic order More significantly it places that jurisprudence within the wider context of legal and political change ongoing within and without the United Kingdom China and EU Jing Men, Annika

Linck, 2017-05-12 Reform and governance are of vital interest to both the People s Republic of China and the European Union EU China is facing demographic and environmental challenges and has been experiencing a rapid economic transition The social tensions arising from these challenges call for a governance system that will allow the Chinese leadership to alleviate social tensions without putting at risk their leadership A society which is becoming more diverse and facing problems of a global scale that also cause turmoil at the grass roots may be difficult to govern top down Notwithstanding the Communist Party of China s CPC grip on Chinese society there may be ways to integrate public opinion and civil society organisations in governmental decision making through reforms that do not challenge the current leadership The EU on the other hand faces the same global challenges with a very different and complex governance system EU foreign and security policy thus including EU policy towards China are governed by the EU s foreign policy principles which contain among others the promotion of democracy the rule of law and the universality and indivisibility of human rights and fundamental freedoms How successful can the EU be in advancing these principles when engaging with China while respecting the Chinese political system How can the EU and China find common grounds in their governance systems so as to enhance their strategic partnership in order to tackle global issues that need a coordinated approach
