**Dangerous Adolescents, Model Adolescents** Roger J.R. Levesque,2005-12-27 Teachers make a difference As someone who grew up in one of the poorest and rural areas of a poor state and ended up attending elite graduate and professional schools I have much to credit my public school teachers My teachers sure struggled much to teach an amazingly wide variety of students from different backgrounds abilities and hopes Given that reality which undoubtedly repeats itself across the United States and globe one would think that I should be quite hesitant to criticize a system that produces countless grateful students and productive citizens I agree The pages that follow surely can be perceived as yet another attack on already much maligned schools that do produce impressive outcomes despite their limited resources increased obligations and the sustained barrage of attacks from competing interest groups Some may even view the text as an affront to the inalienable rights of parents to raise their children as they see fit Others surely could understand the analysis as another assault on our decentralized legal and school systems that should retain the right to balance the needs of communities parents schools and students I clearly did not intend and do not see the ultimate result as yet another diatribe on the manner teachers parents and communities treat students

**Evaluating Competencies** Thomas Grisso,2003 This second edition is a restatement of the theory a review of what happened to the field since the theory was first introduced 15 years ago and its application to a new generation of forensic assessment instruments that has evolved in that time p x

**Interrogations, Confessions, and Entrapment** G. Daniel Lassiter,2013-11-11 Coerced confessions have long been a staple of TV crime dramas and have also been the subject of recent news stories The complexity of such situations however is rarely explored even in the scientific literature Now in softcover Interrogations Confessions and Entrapment remains one of the best syntheses of the scientific legal and ethical findings in this area uncovering subtle yet powerful forces that often compromise the integrity of the

criminal justice system Editor G Daniel Lassiter identifies the exposure of psychological coercion as an emerging frontier in legal psychology citing its roots in the third degree approach of former times and noting that its techniques carry little scientific validity A team of psychologists criminologists and legal scholars asks and goes a long way toward answering important questions such as What forms of psychological coercion are involved in interrogation Are some people more susceptible to falsely confessing than others What are the effects of psychological manipulation on innocent suspects Are coercive tactics ever justified with minors Can jurors recognize psychological coercion and unreliable confessions Can entrapment techniques encourage people to commit crimes What steps can law enforcement take to minimize coercion Throughout this progressive volume readers will find important research based ideas for educating the courts changing policy and implementing reform from improving police interrogation skills to better methods of evaluating confession evidence For the expert witness legal consultant or student of forensic psychology this is material whose relevance will only increase with time

*Girls and Aggression* Marlene Marie Moretti, Candice Odgers, Margaret A. Jackson, 2004-03-31 Represents both sides of the problem of violence in the lives of girls girls as victims of violence and girls as perpetrators of violence To fully understand the problem of violence it is essential to consider both sides of the violence coin Provides perspectives from multiple disciplines using both quantitative and qualitative methodologies thereby providing a fuller understanding of the issues Provides a bridge from research on causal factors and developmental course to research on intervention

*Causality of Psychological Injury* Gerald Young, Andrew W. Kane, Keith Nicholson, 2007-05-31 This sequel to the authors *Psychological Knowledge in Court* offers a welcome expansion on key concepts terms and issues in causality bringing much needed clarity to psychological injury assessments and the legal contexts that employ them Focusing on PTSD traumatic brain injury and chronic pain and grounding readers in salient U S and Canadian case law Causality sets out a multifactorial causality framework to facilitate admissibility of psychological evidence in court Issues concerning malingering are examined in depth as are clinical gray areas that can jeopardize validity At the same time the book clearly explains what lawyers and clinicians need to understand about each other s work of crucial importance since the two sides often seem to speak at cross purposes The authors and six guest contributors Illustrate the roles of preexisting vulnerabilities traumatic events and post event occurrences in psychological impairment and disability Review the literature on PTSD TBI and chronic pain for legal relevance Identify current challenges and controversies in the field as well as emerging areas for research Recommend methods and instruments for conducting more courtworthy assessments Provide a detailed critical review of malingering and related phenomena Propose a more accurate shared terminology of causality Valid causality judgments are based on sound knowledge of research on large populations and careful testing of individuals at the same time they must conform to

stringent legal standards of relevance and reliability to be accepted for testimony Forensic practitioners and attorneys will turn to Causality of Psychological Injury as their professional paths increasingly cross in seeking comprehensive and state of the art information      **Capitalisms and Capitalism in the Twenty-First Century** Glenn Morgan,Richard

Whitley,2012-04-26 This interdisciplinary book examines comparative business systems institutions and practices by looking at current developments between firms nations and markets in an increasingly globalized world and in the context of the recent financial crises      *Stocks for All: People's Capitalism in the Twenty-First Century* Petri Mäntysaari,2021-12-31 Public stock markets are too small This book is an effort to rescue public stock markets in the EU and the US There should be more companies with publicly traded shares and more direct share ownership Anchored in a broad historical study of the regulation of stock markets and companies in Europe and the US the book proposes ways to create a new regulatory regime designed to help firms and facilitate people s capitalism Through its comparative and historical study of regulation and legal practices the book helps to understand the evolution of public stock markets from the nineteenth century to the present day The book identifies design principles that reflect prior regulation While continental European company law has produced many enduring design principles the recent regulation of stock markets in the EU and the US has failed to serve the needs of both firms and retail investors The book therefore proposes a new set of design principles to serve contemporary societal needs      **The Ambivalence of Power in the Twenty-First Century Economy** Vadim Radaev,Zoya Kotelnikova,2022-07-07

The Ambivalence of Power in the Twenty First Century Economy contributes to the understanding of the ambivalent nature of power oscillating between conflict and cooperation public and private global and local formal and informal and does so from an empirical perspective It offers a collection of country based cases as well as critically assesses the existing conceptions of power from a cross disciplinary perspective The diverse analyses of power at the macro meso or micro levels allow the volume to highlight the complexity of political economy in the twenty first century Each chapter addresses key elements of that political economy from the ambivalence of the cases of former communist countries that do not conform with the grand narratives about democracy and markets to the dual utility of new technologies such as face recognition thus providing mounting evidence for the centrality of an understanding of ambivalence in the analysis of power especially in the modern state power driven capitalism Anchored in economic sociology and political economy this volume aims to make visible the dimensions of power embedded in economic practices The chapters are predominantly based on post communist practices but this divergent experience is relevant to comparative studies of how power and economy are interrelated

**Military Alliances in the Twenty-First Century** Alexander Lanoszka,2022-01-10 Alliance politics is a regular headline grabber When a possible military crisis involving Russia North Korea or China rears its head leaders and citizens alike raise concerns over the willingness of US allies to stand together As rival powers have tightened their security cooperation the United States has stepped up demands that its allies increase their defense spending and contribute more to military

operations in the Middle East and elsewhere The prospect of former President Donald Trump unilaterally ending alliances alarmed longstanding partners even as NATO was welcoming new members into its ranks *Military Alliances in the Twenty First Century* is the first book to explore fully the politics that shape these security arrangements from their initial formation through the various challenges that test them and sometimes lead to their demise Across six thematic chapters Alexander Lanoszka challenges conventional wisdom that has dominated our understanding of how military alliances have operated historically and into the present Although military alliances today may seem uniquely hobbled by their internal difficulties Lanoszka argues that they are in fact by their very nature prone to dysfunction

Sellers, 2011-06-29 In three parts this volume in the AP LS series explores the phenomena of captivity and risk management guided and informed by the theory method and policy of psychological jurisprudence The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent conditions of control These conditions impose barriers to justice and set limits on citizenship for one and all Situated at the nexus of political social theory mental health law and jurisprudential ethics the book examines and critiques constructs such as offenders and victims self and society therapeutic and restorative health harm and community So too are three total confinement case law data sets on which this analysis is based The volume stands alone in its efforts to systematically diagnose the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting 1 the rights of juveniles found competent to stand criminal trial the mentally ill placed in long term disciplinary isolation and sex offenders subjected to civil detention and community re entry monitoring 2 the often unmet needs of victims and 3 the demands of an ordered society Carefully balancing sophisticated insights with concrete and cutting edge applications the book concludes with a series of provocative yet practical recommendations for future research and meaningful reform within institutional practice programming and policy The Ethics of Total Confinement is a thought provoking and timely must read for anyone interested in the ethical and legal issues regarding madness citizenship and social justice It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us Instead the path forward must run through a return to the ethical and psychological roots of security and justice The Ethics of Total Confinement is a quantum step forward in defining and advancing that path Jonathan Simon Adrian A Kragen Professor of Law Jurisprudence and Social Policy Program UC Berkeley School of Law This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness It focuses on three outcast groups juveniles tried as adults people with mental illness subjected to hospitalization and sex offenders committed as dangerous and based on an innovative analysis of the relevant caselaw and empirics shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest most uninformed fears Relying on Aristotelian philosophy therapeutic and restorative principles and commonsense justice the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing Christopher Slobogin Milton Underwood Professor of Law Vanderbilt University Law School The Ethics of Total Confinement A Critique of Madness Citizenship and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines By bridging gaps among relevant disciplines the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological ethical or justice based standards The book s provocative
