The American University in a Postsecular Age Douglas Jacobsen, Rhonda Jacobsen, 2008-02-27 For much of the twentieth century it was assumed that higher education was and ought to be a secular enterprise but that approach no longer suffices The culture has shifted and contemporary college and university students are increasingly bringing religious and spiritual questions to campus In response college and university leaders are exploring anew the relationship between religion and higher education The American University in a Postsecular Age grapples with key questions How religious or irreligious are faculty and students today What level of religious literacy should be expected from students Can religion be allowed into the classroom without being disruptive Should colleges and universities help students reflect on their own faith Is religion antithetical to critical inquiry Can religion have a positive role to play in higher education This is a state of the art introduction to the national discussion about religion and higher education Leading scholars and top educators express a wide spectrum of opinions that reflect the best current thinking Introductory and concluding essays by the editors describe the postsecular character of our age and propose a comprehensive framework intended to facilitate ongoing conversation

The Handbook of Technology and Innovation Management Scott Shane, 2009-07-07 This timely handbook represents the latest thinking in the field of technology and innovation management with an up to date overview of the key developments in the field The editor provides with a critical introductory essay that establishes the theoretical framework for studying technology and innovation management The book will include 15-20 original essays by leading authors chosen for their key contribution to the field These chapters chart the important debates and theoretical issues under 3 or 4 thematic headings The handbook concludes with an essay by the Editor highlighting the emergent issues for research The book is targeted as a handbook for academics as well as a text for graduate courses in technology and innovation management

Chinese Student Migration and Selective Citizenship Lisong Liu, 2015-08-20 Since China began its open door and reform policies in 1978 more than three million Chinese students have migrated to study abroad and the United States has been their top destination The recent surge of students following this pattern along with the rising tide of Chinese middle and upper classes emigration out of China have aroused wide public and scholarly attention in both China and the US This book examines the four waves of Chinese student migration to the US since the late 1970s showing how they were shaped by the

profound changes in both nations and by US China relations It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations The book suggests that the rise of China has not negated the deeply rooted American dream that has been constantly reinvented in contemporary China It also addresses the theme of selective citizenship a way in which migrants seek to claim their autonomy proposing that this notion captures the selective nature on both ends of the negotiations between nation states and migrants It cautions against a universal or idealized dual citizenship model which has often been celebrated as a reflection of eroding national boundaries under globalization This book draws on a wide variety of sources in Chinese and English as well as extensive fieldwork in both China and the US and its historical perspective sheds new light on contemporary Chinese student migration and post 1965 Chinese American community Bridging the gap between Asian and Asian American studies the book also integrates the studies of migration education and international relations Therefore it will be of interest to students of these fields as well as Chinese history and Asian American history more generally

All to One Another Andrew A. Sorensen, 2008 This book presents visionary perspectives on the changing roles of teaching research and outreach in higher education during our trying times *All to One Another* collects some of the most compelling recent articles and speeches of Andrew A Sorensen twenty seventh president of the University of South Carolina on the evolving place of institutions of higher learning at the local and global levels as good stewards of existing resources and as entrepreneurial innovators Informed by the varied experiences of his distinguished career as a university educator and administrator Sorensen stresses in this concise volume the importance of building partnerships both on and off campus to foster the vitality of the university of pursuing new avenues in diversity technology and research to secure the investments of a dynamic base of constituents and of effectively managing the interconnected responsibilities needed more than ever by university leaders The specific subjects and occasions of these pieces vary greatly as do the duties and audiences of a modern university president but these statements are unified by a common vision of empowering hope for our future in the yet unfulfilled potential of teaching research and outreach of higher education

Regional Intelligence Eric Vaz, 2020-03-16 Regional Intelligence is an emerging field that leverages the lessons learned through decades of regional science By merging spatial analysis with quantitative analytical techniques in the Anthropocene this book contributes to the multidisciplinary understanding of regional issues The locational aspects of regional paradigms are explored through various empirical studies that promote a rich and diversified understanding of regional issues concerning policy governance land use and territorial decisions Given its scope the book will appeal to scholars and students of regional and spatial sciences and geography as well as practitioners and decision makers engaged in regional planning and policymaking looking for new methodological approaches that offer insights into sustainable development regional prosperity and livability As a unique contribution this book challenges the status quo on how complex spatial problems at an international level and at multiple scales can be

comprehended *What You Don't Know About Schools* J. Kincheloe, S. Steinberg, 2006-02-06 We live in an era where our view of school is reduced by a superficial public conversation In this context the complexity of the educational process and the debate over the purpose of schooling is lost This book brings together leading scholars of education to analyze these issues and engage the public in different ways of looking at school

Dynamics of the Contemporary University Neil J. Smelser, 2013-03-15 This book is an expanded version of the Clark Kerr Lectures of 2012 delivered by Neil Smelser at the University of California at Berkeley in January and February of that year The initial exposition is of a theory of change labeled structural accretion that has characterized the history of American higher education mainly but not exclusively of universities The essence of the theory is that institutions of higher education progressively add functions structures and constituencies as they grow but seldom shed them yielding increasingly complex structures The first two lectures trace the multiple ramifications of this principle into other arenas including the essence of complexity in the academic setting the solidification of academic disciplines and departments changes in faculty roles and the academic community the growth of political constituencies academic administration and governance and academic stratification by prestige In closing Smelser analyzes a number of contemporary trends and problems that are superimposed on the already complex structures of higher education such as the diminishing public support without alterations of governance and accountability the increasing pattern of commercialization in higher education the growth of distance learning and for profit institutions and the spectacular growth of temporary and part time faculty
