Taking Shelter From The Storm Building A Safe Room Inside Your House

Zhe Xu

Taking Shelter From The Storm Building A Safe Room Inside Your House:

Taking Shelter From the Storm Federal Emergency Management Agency, 2014-08-19 Every year tornadoes hurricanes and other extreme windstorms injure and kill people and damage millions of dollars worth of property in the United States Even so more and more people build houses in tornado and hurricane prone areas each year possibly putting themselves into the path of such storms Having a shelter or a safe room built into your house can help you protect yourself and your family from injury or death caused by the dangerous forces of extreme winds It can also relieve some of the anxiety created by the threat of an oncoming tornado or hurricane Should you consider building a shelter in your house to protect yourself and your family during a tornado or hurricane The answer depends on your answers to many questions including Do you live in a high risk area How quickly can you reach safe shelter during extreme winds What level of safety do you want to provide What is the cost of a shelter This guide will help you answer these and other questions so you can decide how best to protect yourself and your family It includes the results of research that has been underway for more than 20 years by Texas Tech University's Wind Engineering Research Center WERC and other wind engineering research facilities on the effects of extreme winds on buildings The guide also provides shelter designs that will show you and your builder contractor how to construct a shelter underneath a new house in the basement of a new house or in an interior room of a new house or how to modify an existing house to add a shelter in one of these areas These shelters are designed to protect you and your family from the high winds expected during tornadoes and hurricanes and from flying debris such as wood studs that tornadoes and hurricanes usually create The National Association of Home Builders NAHB Research Center has evaluated these designs for construction methods materials and costs Engineers at Texas Tech University have confirmed the design requirements for the expected forces from wind pressure and the impact of typical flying debris The shelters are designed with life safety as the primary consideration *Taking Shelter from the Storm*, 1999 *Taking Shelter from the Storm* Paul Tertell, 1999-10 Every year tornadoes hurricanes other extreme windstorms injure kill people damage millions of dollars worth of property in the U S Having a shelter or safe room built into your house can help you protect yourself your family from injury or death caused by the dangerous forces of extreme winds This report answers questions about your living conditions so you can decide how best to protect yourself your family Also provides shelter designs that will show your builder contractor how to construct a shelter underneath in the basement of or in an interior room of a new house or how to modify an existing house to add a shelter *Taking Shelter from the Storm* Texas Tech University. Wind Engineering Research Center, 2004 **Taking Shelter from the Storm: Building a Safe Room for Your Home or Small Business**, 2008 **Taking Shelter from the Storm** Federal Emergency Management Agency, 2021 When safe room designers implement FEMA's safe room guidance in their projects they can be confident they are using the best available information to guide the design and construction of a residential safe room FEMA safe rooms provide near absolute protection from the

deadly winds and wind borne debris associated with extreme wind events *Taking Shelter from the Storm* ,2005

Taking Shelter from the Storm ,2006 **Taking Shelter from the Storm** ,1999 Risk Management Series: Safe Rooms and Shelters - Protecting People Against Terrorist Attacks Federal Emergency Agency,U. S. Department Security,2013-01-26 This manual is intended to provide guidance for engineers architects building officials and property owners to design shelters and safe rooms in buildings It presents information about the design and construction of shelters in the work place home or community building that will provide protection in response to manmade hazards The information contained herein will assist in the planning and design of shelters that may be constructed outside or within dwellings or public buildings These safe rooms will protect occupants from a variety of hazards including debris impact accidental or intentional explosive detonation and the accidental or intentional release of a toxic substance into the air Safe rooms may also be designed to protect individuals from assaults and attempted kidnapping which requires design features to resist forced entry and ballistic impact This covers a range of protective options from low cost expedient protection what is commonly referred to as sheltering in place to safe rooms ventilated and pressurized with air purified by ultra high efficiency filters These safe rooms protect against toxic gases vapors and aerosols The contents of this manual supplement the information provided in FEMA 361 Design and Construction Guidance for Community Shelters and FEMA 320 Taking Shelter From the Storm Building a Safe Room Inside Your House In conjunction with FEMA 361 and FEMA 320 this publication can be used for the protection of shelters against natural disasters This guidance focuses on safe rooms as standby systems ones that do not provide protection on a continuous basis To employ a standby system requires warning based on knowledge that a hazardous condition exists or is imminent Protection is initiated as a result of warnings from civil authorities about a release of hazardous materials visible or audible indications of a release e g explosion or fire the odor of a chemical agent or observed symptoms of exposure in people Although there are automatic detectors for chemical agents such detectors are expensive and limited in the number of agents that can be reliably detected Furthermore at this point in time these detectors take too long to identify the agent to be useful in making decisions in response to an attack Similarly an explosive vehicle or suicide bomber attack rarely provides advance warning therefore the shelter is most likely to be used after the fact to protect occupants until it is safe to evacuate the building Two different types of shelters may be considered for emergency use standalone shelters and internal shelters A standalone shelter is a separate building i e not within or attached to any other building that is designed and constructed to withstand the range of natural and manmade hazards An internal shelter is a specially designed and constructed room or area within or attached to a larger building that is structurally independent of the larger building and is able to withstand the range of natural and manmade hazards Both standalone and internal shelters are intended to provide emergency refuge for occupants of commercial office buildings school buildings hospitals apartment buildings and private homes from the hazards resulting from a wide variety of extreme events The shelters may be used

during natural disasters following the warning that an explosive device may be activated the discovery of an explosive device or until safe evacuation is established following the detonation of an explosive device or the release of a toxic substance via an intentional aerosol attack or an industrial accident Standalone community shelters may be constructed in neighborhoods where existing homes lack shelters Community shelters may be intended for use by the occupants of buildings they are constructed within or near or they may be intended for use by the residents of surrounding or nearby neighborhoods or designated areas *Safe Rooms and Shelters* ,2006 Safe rooms and shelters: Protecting People Against Terrorist Attacks , NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price while supplies last This manual is intended to provide guidance for engineers architects building officials building and home inspectors and property owners to design shelters and safe rooms in buildings It presents information about the design and construction of shelters in the work place home or community building that will provide protection in response to manmade hazards Included is information to assist in planning and design of shelters that may be constructed outside or within dwellings or public buildings designed to protect individuals from assaults and attempted kidnapping which requires design features to resist forced entry and ballistic impact Protective options from low cost expedient protection such as sheltering in place to safe rooms ventilated and pressurized with purified air by ultra high efficiency filters and more Related products Taking Shelter From the Storm Building a Safe Room for Your Home or Small Business Includes Construction Plans CD can be found here <https://bookstore.gpo.gov/products/sku/064-000-00069-1> ctid 138 A Study of Active Shooter Incidents in the United States Between 2000 and 2013 can be found here <https://bookstore.gpo.gov/products/sku/027-001-00101-3> Incremental Protection for Existing Commercial Buildings From Terrorist Attack Providing Protection to People and Buildings can be found here <https://bookstore.gpo.gov/products/sku/064-000-00043-8> Reference Manual to Mitigate Potential Terrorist Attacks Against Buildings Providing Protection to People and Buildings is available here <https://bookstore.gpo.gov/products/sku/064-000-00038-1> World Trade Center Building Performance Study Data Collection Preliminary Observations and Recommendations is available here <https://bookstore.gpo.gov/products/sku/064-000-00029-2> Other products produced by U S Federal Emergency Management Agency FEMA can be found here <https://bookstore.gpo.gov/agency/528> *Taking Shelter from the Storm* ,2006 **Taking Shelter from the Storm** United States. Federal Emergency Management Agency. Mitigation Directorate,1998 **Taking Shelter From the Storm** U. S. Department Security,Federal Emergency Agency,2013-02 Every year tornadoes hurricanes and other extreme windstorms injure and kill people and cause millions of dollars worth of property damage in the United States Even so more and more people build homes in tornado and hurricane prone areas possibly putting themselves into the path of such storms Having a safe room built for your home or small business can help provide near absolute protection for you and your family or employees from injury or death caused by the dangerous forces of extreme winds Near absolute protection means that based on our current knowledge of tornadoes and

hurricanes the occupants of a safe room built according to this guidance will have a very high probability of being protected from injury or death Our knowledge of tornadoes and hurricanes is based on substantial meteorological records as well as extensive investigations of damage to buildings from extreme winds It can also relieve some of the anxiety created by the threat of an oncoming tornado or hurricane All information contained in this publication is applicable to safe rooms for use in homes as well as in small businesses Should you consider building a safe room in your home or small business to provide near absolute protection for you your family or employees during a tornado or hurricane The answer depends on your answers to many questions including Do you live in a high risk area How quickly can you reach safe shelter during extreme winds What level of safety do you want to provide What is the cost of a safe room This publication will help you answer these and other questions so you can decide how best to provide near absolute protection for you and your family or employees It includes the results of research that has been underway for more than 30 years by Texas Tech University's Wind Science and Engineering WISE formerly known as the Wind Engineering Research Center or WERC Research Center and other wind engineering research facilities on the effects of extreme winds on buildings This publication provides safe room designs that will show you and your builder contractor how to construct a safe room for your home or small business Design options include safe rooms located underneath in the basement in the garage or in an interior room of a new home or small business Other options also provide guidance on how to modify an existing home or small business to add a safe room in one of these areas These safe rooms are designed to provide near absolute protection for you your family or employees from the extreme winds expected during tornadoes and hurricanes and from flying debris such as wood studs that tornadoes and hurricanes usually create In August 2008 the International Code Council ICC with the support of the National Storm Shelter Association NSSA released a consensus standard on the design and construction of storm shelters This standard the ICC NSSA Standard for the Design and Construction of Storm Shelters ICC 500 codifies much of the extreme wind shelter recommendations of the early editions of FEMA 320 and FEMA 361 Design and Construction Guidance for Community Safe Rooms first edition July 2000 FEMA 361 contains detailed guidance for the design and construction of community safe rooms which also provide near absolute protection the level of protection provided in the residential safe rooms of this publication It is important that those involved in the design construction and maintenance of storm shelters be knowledgeable of both FEMA guidance and ICC standards that pertain to sheltering from extreme winds The safe room designs presented in this publication meet or exceed all tornado and hurricane design criteria of the ICC 500 for both the tornado and hurricane hazards The safe rooms in this publication have been designed with life safety as the primary consideration

Design and Construction Guidance for Community Safe Rooms, 2008 **Coastal Construction Manual, Principles and Practices of Planning, Siting, Designing, Constructing, and Maintaining Residential Buildings in Coastal Areas, Volume 1: Introduction Historical Perspective, Etc.**, June 2000, 2000 **Survival** Don V. Richey, 2008-10

TERRORISM Middle East School

Massachusetts Natural *Coastal Construction Manual* Christopher Jones, 2001-04 This manual will help individuals communities states and others create sustainable disaster resistant communities Describes the best practices in hazard identification planning siting design and construction that can be used in coastal residential construction Coastal areas offer significant natural resources and continue to draw an increasing population for recreation working and living These areas can also pose significant natural hazards from winds flooding earthquakes and tsunamis This manual describes the best practices in residential construction in coastal areas that can be used to help create sustainable and livable coastal communities Illustrated **Coastal Construction Manual** , 2005
