Serengeti Story Anthony Sinclair,2012-11-22 For more than 40 years Anthony Sinclair has researched the world's most famous conservation area Serengeti He understands its complex ecology grasslands birds insects and animals as well as anyone on earth Here he shares his deep knowledge plus stories of dealing with civil war bandits poachers and politicians

Bowker's Complete Video Directory,2000 Patterns,1995 Tears of the Cheetah Stephen J. O'Brien,2015-10-27 The history of life on Earth is dominated by extinction events so numerous that over 99.9% of the species ever to have existed are gone forever If animals could talk we would ask them to recall their own ancestries in particular the secrets as to how they avoided almost inevitable annihilation in the face of daily assaults by predators climactic cataclysms deadly infections and innate diseases In *Tears of the Cheetah* medical geneticist and conservationist Stephen J O'Brien narrates fast moving science adventure stories that explore the mysteries of survival among the earth's most endangered and beloved wildlife Here we uncover the secret histories of exotic species such as Indonesian orangutans humpback whales and the imperiled cheetah the world's fastest animal which nonetheless cannot escape its own genetic weaknesses Among these genetic detective stories we also discover how the Serengeti lions have lived with FIV the feline version of HIV where giant pandas really come from how bold genetic action pulled the Florida panther from the edge of extinction how the survivors of the medieval Black Death passed on a genetic gift to their descendents and how mapping the genome of the domestic cat solved a murder case in Canada With each riveting account of animal resilience and adaptation a remarkable parallel in human medicine is drawn adding yet another rationale for species conservation mining their genomes for cures to our own fatal diseases *Tears of the Cheetah* offers a fascinating glimpse of the insight gained when geneticists venture into the wild

Shadow of Oz Wayne D. Rossiter,2015-10-21 In the century and a half since Darwin s Origin of Species there has been an ongoing and often vociferously argued conversation about our species place in creation and its relationship to a Creator A growing number of academic professionals see no conflict between Darwin s view of life and the Christian faith Dubbed theistic evolution this brand of Christianity holds that God has used processes like Darwinian evolution to achieve his creation But is that true Can Darwin s mechanism of natural selection acting on chance mutations be reconciled with God s intentionality in producing particular outcomes Does humanity represent the apex of his creation or just an erasable and ephemeral signpost along a path still being revealed Does theistic evolution permit God to intervene supernaturally in the workings of his creation Can we as humans be made in the image of God if we are just one of the millions of products of evolution Can we salvage concepts like freewill meaning purpose or an eternal soul within theistic evolution In this book

Wayne Rossiter assess theistic evolution and whether or not it is consistent with Christianity and secular science His conclusion is that it bears little resemblance to classical Christianity and promotes a century old understanding of evolutionary theory Theistic evolution renders God a passive player in creation so far removed and undetectable that he resembles a mere shadow of the Creator described in Christianity [National Geographic Treasures](#) , [The Modern Ark](#) Vicki Croke, 2014-09-09 An in depth look at the radical changes occurring in our nation s zoos from cement paved mazes to simulated rain forests to completely natural landscapes as well as the history behind the actual idea of the zoo Following the lead of private menageries in Europe public zoos began to proliferate throughout America What once started as symbols of prestige and power are now educational centers developing advanced technologies in the race to conserve all that remains of the natural world With DNA fingerprinting artificial insemination embryo transfers and egg harvesting zoos play a critical role in the fight to save endangered species

Behaviour and Conservation L. Morris Gosling, William J. Sutherland, 2000-02-24 Shows how an understanding of behaviour is essential in the conservation of animals [The Ultimate Collection](#) Ruth Margie Holmes, 2024-10-01 The Ultimate Collection 500 Bedtime Stories for Children Aged 9 12 is a magical treasury of adventures that will spark the imagination and inspire dreams Packed with 500 enchanting tales this book takes young readers on epic journeys through mythical lands brave quests and fantastical worlds where heroes legends and creatures come to life From daring dragon riders and courageous explorers to mischievous sprites and powerful wizards every story is crafted to captivate children aged 9 12 and provide the perfect wind down before bedtime Each tale offers valuable lessons of courage kindness and creativity making it not just a book of stories but a companion for growing minds Whether it s a quick adventure to wrap up the day or a longer tale to get lost in this collection has something for every young reader Parents and children can revisit favorite stories together or create new ones inspired by these imaginative worlds Let this book become part of your bedtime routine where every night is a new adventure and every dream is fueled by the power of storytelling

Wright, 2009-02-02 A middle aged father has a secret His son was raised to believe his dad served honorably in the Army as a Military Policeman in Vietnam Now his son is 18 years old and it is time to tell him the truth about how his dad had spent a year in Canada as a draft resistor before finally succumbing to the draft and serving in Vietnam The father had struggled with how to explain his actions since the day a family member spilled the beans about his days as a draft dodger in Canada several years ago Back then he promised to explain it all to his son when he turned 18 Now that his son turned 18 it is time to keep his promise and try and explain the sequence of events that led to his decision to go to Canada and then return to the USA to face the consequences of resisting the draft The father hoped his explanation would help his son understand the world better and not make some of the same mistakes he had made Moreover his son had always been a responsible young man and the father did not want this to change He was concerned that somehow the sins of the father might be visited on the son by revealing the truth about his past The father spends months preparing himself and then tells the story to his son while they are visiting his old Army buddy and taking a skiing vacation in Vermont The story he tells traces the major events in the father's life from the time when the brother of a close neighborhood friend was killed in Vietnam in 1965 to the time when the father was released from the Army in 1973 The son takes it all in but the father has no way of knowing what impact if any his story will ultimately have on his son **Wild Cats of the World** Mel Sunquist, Fiona Sunquist, 2017-05-15 Did you know that

European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow Wild Cats of the World is a treasure trove of answers to questions like these and many others for anyone who's interested in learning more about the world's felids including the ones with whom we share our homes Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source many of them quite difficult to find including scientific papers descriptions of hunts archeological findings observations by naturalists and travelers reports from government agencies and

newsletters from a wide variety of organizations Weaving information from these sources together with their own experiences observing wild cats around the world the Sunquist's have created the most comprehensive reference on felids available Each of their accounts of the 36 species of cat contains a description of the cat including human interactions with it as well as detailed data on its distribution ecology and behavior status in the wild and efforts to conserve it Numerous photographs including more than 40 in full color illustrate these accounts Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia Wild Cats of the World will fascinate and educate felid fans of any stripe or spot
