Tales Of Tomorrow:

The Nature of Tomorrow Michael Rawson, 2021-11-16 An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon's New Atlantis the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress *Tales of Tomorrow (hardback)* Richard Irvin, 2023-10-19 About the series and episodes of Tales of Tomorrow Television's First Science Fiction Series for Adults

Trials of Tomorrow Alexter Albury, 2014-05-15 Man pushed the boundaries of science and technology too far This march to progress trampled and transformed Earth into an unrecognizable world This new world caters not to the humans who once conquered it but to the strange and powerful beings that spring from it This complete shift against the men of Earth causes them to seek refuge in the stars and into the very same sciences that set their perils in motion And as humans push beyond their mortal limitations to seize a new era of dominion they are being watched and manipulated by powers that extend far beyond the confines of Earth Man's relationship with these foreign beings drags them into a perilous time of secrecy violence and the abuse of knowledge Trials of Tomorrow shares the tales of the men women and creatures spawned from this era of unrestrained science and how their strange powers shape the future of Earth and the galaxy Tales of Tomorrow Richard Irvin, 2023-10-19 About the series and episodes of Tales of Tomorrow Television's First Science Fiction Series for Adults

Altars of Tomorrow Ken R. Abell, 2017-02-22 Set in and around the boomtown of Creede, Colorado, in 1892, *Altars of Tomorrow* is the final chapter of the Deacon Coburn narrative that began in *Days of Purgatory*. It is a poignant story that explores the triumph of hope and redemption in the context of human frailty. Worn down to a ragged frazzle, the River Brethren man from Conoy Creek arrives in town after being in the saddle for nearly eight months. He discovers his daughter now has two rough and tumble sons running along a thin line between shenanigans and delinquency. Coburn comes to the aid of a victim of their mischievous pranks, extending tender mercies to a soul-scarred man whose mind was broken at Chancellorsville. The mystery of Lucinda Enochelli is drawn to a surprising completion when she delivers Coburn a document from his past. The cast of characters is woven into reflective subplots imbued by the tension that comes from confronting questions about life and death and the contrast between the temporal and the eternal. The words of Sally TwoSongs serve as a ribbon wrapped around the ambiguities to provide a bedrock foundation on which to stand. The Creator's plans and purposes are beyond our ability to reason or comprehend. As it has always been and always shall be.

Visions of Tomorrow Tom Easton, Judith K. Dial, 2010-07-08 A fascinating collection of fiction-turned-reality tales. Long before movies like *Minority Report* and *The Matrix*, the world's writers have been recording the future as it might exist and as it turns out they were right. This bizarre anthology collects the most stunning predictions and imagined inventions here for the first time. *Visions of Tomorrow* includes *The Land Iron Clads* by H.G. Wells who described a military tank in 1903 long before it was ever a possibility. *The Yesterday House* by Fritz Leiber who writes about cloned humans. *Reason* by Isaac Asimov who predicted solar power could be harnessed by satellites and many more. In this stunning anthology of never-before-collected stories, our world's greatest science fiction writers demonstrate that the truth can be just as strange as fiction.
