Excerpt from Carpenter s Geographical Reader Europe This book aims to give the children a plain and simple de scription of the countries of Europe as they are to day The method is by taking the little ones on a personally conducted tour over the continent It is the children themselves who cross the Atlantic Ocean steam over the Baltic and the Mediterranean seas and down the historic Rhine and the Danube It is they who Climb the Alps and stand on the North Cape watching the sun shine at midnight It is they who go from city to city from farm to farm and factory to factory seeing how the various peoples live and what they are doing in the work of the world It is they who are admitted to the palaces parliaments and public offices where they learn how each nation is governed and something as to its civilization commerce and trade It is not intended that these travels should take the place Of the school geographies but that they should be used with such books as supplementary reading As in the volumes describing similar tours in North America South America and Asia the text books on geography may be regarded as the skeleton and this reader as the esh and blood which will clothe the dry bones and make the countries

a living whole in the minds of the pupils A glance at the table of contents will give some idea of the scope and character of the work The children having crossed the Atlantic on one of the big ocean greyhounds begin their tour in the United Kingdom Landing at Queenstown they explore Ireland visiting Cork Killarney Limerick and Galway They cross the bog lands and plains to Dublin and thence go to the Giant s Causeway and Belfast where they learn how linen is made From Belfast they sail to Glasgow and after spending a while in the Lowlands or Industrial Scotland go to Edinburgh by the Trossachs They make a hunting trip to the Highlands and visit the homes Of Robert Burns and Walter Scott before crossing the border to England About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Words and Places Isaac Taylor, 1978 **Words and Places** Isaac Taylor, 1921 **Ptolemy's Geography** Ptolemy, 2000 Ptolemy s Geography is the only book on cartography to have survived from the classical period and one of the most influential scientific works of all time Written in the second century AD for more than fifteen centuries it was the most detailed topography of Europe and Asia available and the best reference on how to gather data and draw maps Ptolemy championed the use of astronomical observation and applied mathematics in determining geographical locations But more importantly he introduced the practice of writing down coordinates of latitude and longitude for every feature drawn on a world map so that someone else possessing only the text of the Geography could reproduce Ptolemy s map at any time in whole or in part at any scale Here Berggren and Jones render an exemplary translation of the Geography and provide a thorough introduction which treats the historical and technical background of Ptolemy s work the contents of the Geography and the later history of the

work Also included here are unique color reproductions of maps from manuscripts and early printed editions of the text representative of the beautiful and practical cartographic artistry that flowed from Ptolemy s work Historians of science classicists and anyone who enjoys beautiful maps or map making will find this work an indispensable addition to their library
