Talk Never Dies Laurence Goldman,1983-01-01 **20 Difficult Things to Accomplish in this World**

Osho,2012-09-30 The Sutra of Forty Two Chapters is a succinct summary doctrine by which Buddhism was introduced to China Each of the 42 sutras begins with the Buddha said This particular sutra deals with 20 Difficult Things to Accomplish in this World and Osho takes us through each verse and dissects it line by line never omitting to explain in clear modern terms the real meaning of the verses Language and the Law John Peter Gibbons,2014-09-25 Explains and describes the ways

that language use in the legal system can create inequality and disadvantage It examines the three main areas where the two intersect the central issue of the language of the law the disadvantage which language can impose before the law and forensic linguistics the use of linguistic evidence in legal processes Each section of the book is preceded by an introduction by the editor which sets the paper within a conceptual framework Lawyer s opinions are not neglected even though the collection is written mainly by linguists The section concludes with a lawyer s response in which a prominent lawyer with a particular interest in the content of the section responds to the papers *Property and Equality* Thomas Widlok,Wolde

Gossa Tadesse,2005 The ethnography of egalitarian social systems was first met with sheer disbelief Today it is still hotly debated in a number of fields and has gained sophistication as well as momentum This collection of essays on property and equality acknowledges this diversification by presenting research results in two complementary volumes They bring together a wide range of authoritative researchers most of whom have worked with hunter gatherer groups These two volumes cover existing ethnographic and theoretical ground while maintaining a clear focus on the relation between property and equality The book consists of the most recent work of prominent members of the original group of researchers in hunter gatherer studies among them James Woodburn and Richard Lee and very recent ethnography on hunter gatherers and other egalitarian systems **Language Ideologies** Bambi B. Schieffelin,Kathryn A. Woolard,Paul V. Kroskrity,1998-05-28

Language ideologies are cultural representations whether explicit or implicit of the intersection of language and human beings in a social world Mediating between social structures and forms of talk such ideologies are not only about language Rather they link language to identity power aesthetics morality and epistemology Through such linkages language ideologies underpin not only linguistic form and use but also significant social institutions and fundamental notions of person and community The essays in this new volume examine definitions and conceptions of language in a wide range of societies around the world Contributors focus on how such defining activity organizes language use as well as institutions such as religious ritual gender relations the nation state schooling and law Beginning with an introductory survey of language ideology as a field of inquiry the volume is organized in three parts Part I Scope and Force of Dominant Conceptions of Language focus on the propensity of cultural models of language developed in one social domain to affect linguistic and social behavior across domains Part II Language Ideology in Institutions of Power continues the examination of the force of

specific language beliefs but narrows the scope to the central role that language ideologies play in the functioning of particular institutions of power such as schooling the law or mass media Part III Multiplicity and Contention among Ideologies emphasizes the existence of variability contradiction and struggles among ideologies within any given society This will be the first collection of work to appear in this rapidly growing field which bridges linguistic and social theory It will greatly interest linguistic anthropologists social and cultural anthropologists sociolinguists historians cultural studies communications and folklore scholars

Gossip and the Everyday Production of Politics Niko Besnier, 2009-07-08

Although gossip is disapproved of across the world's societies it is a prominent feature of sociality whose role in the construction of society and culture cannot be overestimated In particular gossip is central to the enactment of politics through it people transform difference into inequality and enact or challenge power structures Based on the author's intimate ethnographic knowledge of Nukulaelae Atoll Tuvalu this work uses an analysis of gossip as political action to develop a holistic understanding of a number of disparate themes including conflict power agency morality emotion locality belief and gender It brings together two methodological traditions the microscopic analysis of unelicited interaction and the macroscopic interpretation of social practice that are rarely wedded successfully Drawing on a broad range of theoretical resources Niko Besnier approaches gossip from several angles A detailed analysis of how Nukulaelae's people structure their gossip interactions demonstrates that this structure reflects and contributes to the atoll's political ideology which wavers between a staunch egalitarianism and a need for hierarchy His discussion then turns to narratives of specific events in which gossip played an important role in either enacting egalitarianism or reinforcing inequality Embedding gossip in a broad range of communicative practices enables Besnier to develop a nuanced analysis of how gossip operates demonstrating how it allows some to gain power while others suffer because of it Throughout he is particularly attentive to the ways in which anthropologists themselves are the subject and object of gossip making his work a notable contribution to reflexive social science Written in an engaging and accessible style *Gossip and the Everyday Production of Politics* will appeal to students and scholars of political legal linguistic and psychological anthropology social science methodology communication conflict gender and globalization studies and Pacific Islands studies

Ku Waru Francesca Merlan, Alan Rumsey, 1991-03-29 The highlanders of New Guinea are renowned for their elaborate systems of ceremonial exchange Although much has been written about them previous accounts have concentrated far less on the conduct of exchange events than on the structure of exchange systems This 1991 book deals centrally with the conduct of particular exchange events and shows through examination of them how larger social structures are reproduced and transformed As part of the emphasis on exchange as social action the book closely examines the oratory that plays a crucial part in the events Basing their study on original fieldwork carried out in the Nebilyer Valley Francesca Merlan and Alan Rumsey focus on an interrelated set of large scale compensation payments which arose out of an episode of warfare This book furthers our understanding of the interaction

between social structures and historical events and particularly of the crucial role of talk It will be of special interest to anthropologists and linguists

Crossing Boundaries Sandy Toussaint, 2004 Ever since the 1992 Mabo decision put an end to the legal fiction that Australia was without owners before the arrival of the British colonisers the work associated with resolving native title claims has developed as a significant but often difficult arena of professional practice Increasingly anthropologists linguists historians and lawyers have been encouraged to work collaboratively often in the context of highly charged public controversy about who owns the land In *Crossing Boundaries* editor Sandy Toussaint and her contributors have created a cross disciplinary exploration of native title work In all twenty professionals share their experience and expertise As Toussaint concludes Chapters in this volume reveal the extent to which native title workers need to communicate more cogently and in some cases to redefine their practice
