**From a Rational Point of View** Tim Henning, 2018-05-10 When discussing normative reasons oughts requirements of rationality motivating reasons and so on we often have to use verbs like believe and want to capture a relevant subject's perspective According to the received view about sentences involving these verbs what they do is describe the subject's mental states Many puzzles concerning normative discourse have to do with the role that mental states consequently appear to play in normative discourse Tim Henning uses tools from semantics and the philosophy of language to develop an alternative account of sentences involving these verbs According to this view which is called parentheticalism

we very commonly use these verbs in a parenthetical sense These verbs themselves express backgrounded side remarks on the contents they embed and these latter embedded contents constitute the at issue contents This means that instead of speaking about the subject's mental states we often use sentences involving believe and want to speak about the world from her point of view Henning makes this notion precise and uses it to solve various puzzles concerning normative discourse The final result is a new unified understanding of normative discourse which gets by without postulating conceptual breaks between objective and subjective normative reasons or normative reasons and rationality or indeed between the reasons we ascribe to an agent and the reasons she herself can be expected to cite Instead of being connected to either subjective mental states or objective facts all of these normative statuses are can be adequately articulated by citing worldly considerations from a subject's point of view

Looking Back at the Jazz Age Nancy von Rosk, 2016-09-23 From Britain's Downton Abbey and Dancing on the Edge to Woody Allen's *Midnight in Paris* and Baz Luhrmann's *The Great Gatsby* the Jazz Age's presence in recent popular culture has been striking and pervasive This volume not only deepens the reader's knowledge of this iconic
