influential philosopher and theologian in the tradition of scholasticism within which he is also known as the Doctor Angelicus Doctor Communis and Doctor Universalis He was the foremost classical proponent of natural theology and the father of Thomism His influence on Western thought is considerable and much of modern philosophy was conceived in development or refutation of his ideas particularly in the areas of ethics natural law metaphysics and political theory Developing Large Structural Parts for Railway Application Using a Fibre Reinforced Polymer Design Jan Prockat,2005 Where are you? Self- and body part localization using virtual reality setups Albert van der Veer ,2019-09-19 This volume presents a line of original experimental studies on the bodily self investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts So far it was not well known whether people locate themselves in one or more specific regions of their bodies On the other hand some systematic distortions in indicating bodily locations were already documented In the present studies participants were therefore asked to indicate their self locations as well as the locations of several of their body parts using a self directed first person perspective pointing paradigm in various virtual reality VR setups different head mounted displays and a large screen immersive display Overall participants were found to locate themselves mainly in the upper face and the upper torso However striking differences in self localization were found when testing in different VR setups Upon further investigation these differences were found to be foremost due to inaccuracies in body part localization When taking these inaccuracies into account differences between setups and also with self localization outside of VR largely disappear Another striking finding was that providing participants in between pointing phases with information about their bodies in the form of a real time animated self avatar did not make them more accurate at locating their own body parts While manipulating their viewpoint to chest height of their self avatar did shift the afterwards indicated locations of their own body parts upwards towards where they were seen on the avatar Potential explanations for the various new findings also from tasks outside of VR are discussed Taken together this volume suggests a differential involvement of multi sensory information processing in experienced self location within the body and the ability to locate body parts Self localization seems to be less flexible possibly because it is strongly grounded in the bodily senses while body part localization appears more adaptable to the manipulation of sensory stimuli at least in the visual modality *The Part Taken by Essex County in the Organization and Settlement of the Northwest Territory* Essex Institute,1889 Special Regulations United States.
