Taking Responsibility, Law and the Changing Family Mr Craig Lind, Ms Heather Keating, Ms Jo Bridgeman, 2013-02-28 This volume considers the impact that changing family norms have had on the responsibilities that the law allocates to people in family relationships Contributions are drawn from a wide variety of jurisdictions in which scholars lawyers judges and policy makers have been trying to discern what the appropriate correlation should be between the responsibilities that people undertake in family settings and the law that regulates family responsibilities Part I looks at the changes that have occurred in adult relationships and what they have done for our sense of the family responsibilities that adults take for one another Part II reflects on the changing nature of the parental relationship in order to reconsider the way in which changing family structures affect the responsibilities we think people raising children should have The third part brings the rights discourse that has dominated jurisprudence for much of the last fifty years into the discussion of family transformation and the responsibilities to which it gives rise In the final section the authors reflect on the difficulties of trying to resolve the meaning of responsibility in a world of changing families The collection brings together some of the most eminent and imaginative scholars and judges working in this area It will be a valuable resource for all those interested in the legal regulation of the transforming family

Taking Responsibility for Climate Change Sade Hormio, 2024-02-20 This book proposes that it is not only states and international bodies that have a responsibility to take action toward mitigating climate change Other collective agents such as corporations need to also come onboard Additionally the book argues that climate change is not solely a problem for collective agents but also for individuals as they are members of collectives and groups of several kinds Therefore framing climate change responsibility exclusively from either the collective or the individual perspective leaves out something crucial how we all are influenced by the collectives we belong to and how in turn collectives are influenced by individuals The focus of the book is on areas of climate change responsibility that are often left out of the picture or get too little attention in climate ethics such as carbon inequality within countries But why should any theoretical arguments about normative issues matter when we have a real life climate crisis on our hands S de Hormio argues that ethical arguments have an important role in setting climate policy they can highlight what values are at stake and help ground normative arguments in public deliberations

Baptism as an Event of Taking Responsibility Pontien Ndagijimana Batibuka, 2022-11-07 For those whose context is rich with cultural and communal rites of passage how does the church ensure that baptism is not just another ritual but is understood to be a deliberate participation of a Christian in an event that brings decisive change into the new life that Christ brings In this in depth study Dr Pontien Ndagijimana Batibuka explores afresh Paul s teaching on baptism demonstrating that it encompasses both divine intervention and human action rather than simply being about an action of Christ Readers are invited to re examine Romans 5 12 6 23 through a socio religious lens rather than the christological reading that has historically prevailed Through Dr Batibuka s skilful exploration of the stages of initiation in antiquity he argues the importance of Christians actively taking responsibility for their baptism while further shedding light on the interaction of both the divine and human roles Baptism is more than a ritual done to a passive candidate it is an event in

responsibility and its relations to desert culpability excuse blame and punishment It links responsibility with the reactive attitudes but makes the justification of the reactive attitudes depend on a prior and independent conception of responsibility Responsibility and excuse are inversely related an agent is responsible for misconduct if and only if it is not excused As a result we can study responsibility by understanding excuses We excuse misconduct when an agent's capacities or opportunities are significantly impaired because these capacities and opportunities are essential if agents are to have a fair opportunity to avoid wrongdoing This conception of excuse tells us that responsibility itself consists in agents having suitable cognitive and volitional capacities normative competence and a fair opportunity to exercise these capacities free from undue interference situational control Because our reactive attitudes and practices presuppose the fair opportunity conception of responsibility this supports a predominantly retributive conception of blame and punishment that treats culpable wrongdoing as the desert basis of blame and punishment We can then apply the fair opportunity framework to assessing responsibility and excuse in circumstances of structural injustice situational influences in ordinary circumstances and in wartime insanity and psychopathy immaturity addiction and crimes of passion Though fair opportunity has important implications for each issue treating them together allows us to explore common themes and appreciate the need to take partial responsibility and excuse seriously in our practices of blame and punishment

Against Moral Responsibility Bruce N. Waller, 2024-12-10 A vigorous attack on moral responsibility in all its forms argues that the abolition of moral responsibility will be liberating and beneficial In *Against Moral Responsibility* Bruce Waller launches a spirited attack on a system that is profoundly entrenched in our society and its institutions deeply rooted in our emotions and vigorously defended by philosophers from ancient times to the present Waller argues that despite the creative defenses of it by contemporary thinkers moral responsibility cannot survive in our naturalistic scientific system The scientific understanding of human behavior and the causes that shape human character he contends leaves no room for moral responsibility Waller argues that moral responsibility in all its forms including criminal justice distributive justice and all claims of just deserts is fundamentally unfair and harmful and that its abolition will be liberating and beneficial What we really want natural human free will moral judgments meaningful human relationships creative abilities would survive and flourish without moral responsibility In the course of his argument Waller examines the origins of the basic belief in moral responsibility proposes a naturalistic understanding of free will offers a detailed argument against moral responsibility and critiques arguments in favor of it gives a general account of what a world without moral responsibility would look like and examines the social and psychological aspects of abolishing moral responsibility Waller not only mounts a vigorous and philosophically rigorous attack on the moral responsibility system but also celebrates the benefits that would result from its total abolition
