Tales of Terror Bethami A. Dobkin, 1992-04-20 Conventional research suggests that news coverage of terrorism is a tool of the terrorist to gain public support and recognition Based on an analysis of more than 200 evening newscasts aired during the first six years of the Reagan administration *Tales of Terror* offers a detailed account of the ways in which news media escalate public panic about terrorism and encourage support for specific U S policy objectives rather than build sympathy for terrorists Bethami Dobkin explores similarities between news media and government portrayals of terrorism combining textual criticism with an interpretation of official U S policy statements and argues that government depictions and news presentations of terrorism reproduce an ideology that supports military strength and intervention Dobkin examines several specific features of news coverage the dramatic format of television news and the political interests that this format serves the narrative construction of enemies by television journalists and public officials and the political significance of the terrorist label the use and significance of testimony particularly that of people affected by crisis the mutual exploitation of political crisis by both television news producers and public officials the function of journalism in shaping the conduct of public diplomacy and public perceptions of foreign conflict and the creation of consensus about the need for military responses to political violence This revealing study will be of particular interest to scholars of communications and political science

Reimagining the Promised Land Rodney Wallis, 2020-09-17 While Israel has seemingly been a minor presence in Hollywood cinema Reimagining the Promised Land argues that there is a long history of Hollywood deploying images of Israel as a means of articulating an idealized notion of American national identity This argument is developed through readings of The Ten Commandments Cecil B DeMille 1956 Ben Hur A Tale of the Christ William Wyler 1959 Exodus Otto Preminger 1960 Cast a Giant Shadow Melville Shavelson 1966 Black Sunday John Frankenheimer 1977 The Delta Force

Menahem Golan 1986 and Munich Steven Spielberg 2005 The mobilization of Israel that pervades this eclectic group of films effectively demonstrates one of the more surreptitious ways in which Hollywood has historically constructed and circulated dominant notions of American national identity Moreover in examining the most notable Hollywood representations of the Jewish state the book offers an informed historical overview of the cultural forces that have contributed to popular understandings within the United States of the state of Israel Israel s Arab neighbours and also the Arab Israeli conflict

Winkler, 2012-02-16 Winner of the 2008 Outstanding Book Award presented by the Political Communication Division of the National Communication Association The topic of terrorism has evolved into an ideological marker of American culture one that has fundamentally altered the relationship between the three branches of government between the government and the people and between America and countries abroad In the Name of Terrorism describes and analyzes the public communication strategies presidents have deployed to discuss terrorism since the end of World War II Drawing upon internal administration documents memoirs and public papers Carol K Winkler uncovers how presidents have capitalized on public perceptions of the terrorist threat misrepresented actual terrorist events and used the term terrorism to influence electoral outcomes both at home and abroad Perhaps more importantly she explains their motivations for doing so and critically discusses the moral and political implications of the present range of narratives used to present terrorism to the public

Muffled Echoes Amy Fried, 1997 Ten years ago the Iran Contra affair swept the headlines as the nation watched an indignant Lt Col Oliver North testify before a congressional committee Although polls showed that most Americans were critical of North s actions and ambivalent toward the man himself media coverage left the opposite impression with its broadcasts of Ollie for president rallies and stories of congressional aides overwhelmed by a torrent of pro North mail In this book public opinion is more than the sum of a pollster s tally instead Amy Fried defines it as a political tool integral to the political process where vested interests compete to legitimize their interpretation of the public voice Fried explores the construction interpretation and uses of public opinion raising important questions about the media and the role of special interest groups in determining policy

Targeted Transnationals Jenna Hennebry, Bessma Momani, 2013-04-01 Following 9 11 the securitization of state practices and policies has chipped away at the citizenship and personal rights of all Canadians particularly those of Arab descent This book argues that in a securitized global context and through racialized immigration and security policies Arab Canadians have become targeted transnationals Media representations have further legitimized their homogenization and racialization The contributors to this book examine state practices towards and media representations of Arab Canadians They also present voices that counter the dominant discourse and trace forms of community resistance to the racialization of Arab Canadians

Bélair-Gagnon, Nikki Usher, 2021 It is now well established that the long time economic model on which the news industry has relied is no longer sustainable Facebook Google and declining levels of popular trust in the media have been major contributors to this situation Simultaneously the closure of local media outlets across the country has left many areas without access to regional news compounded the distance between media and publics and further eroded civic engagement Despite the looming crisis in journalism a research practice gap plagues the news industry This book argues that an underappreciated factor in the news crisis is a potentially symbiotic relationship between journalism studies and the industry that it researches As this book contends scholars must think about their work in a public context and journalists too need to listen to media scholars and take the research that they do seriously Including contributions from journalists and academics Journalism Research That Matters offers journalists a guide on what they need to know and journalism scholars a call to action for what kind of research they can do to best help the news industry reckon with disruption The book looks at new research developments surrounding audience behavior social networks and journalism business models the challenges that scholars face in making their research available to the public and to journalists the financial survival of quality news and information and blind spots in the way that researchers and journalists do their work especially around race diversity and inequality A final section includes contributions from journalists about how researchers can better engage on the ground with newsrooms and media professionals
