Tales In Pursuit Of Quality In Health Ca:

Success Stories in Rural Health Care Delivery United States. Congress. Senate. Committee on Agriculture and Forestry. Subcommittee on Rural Development, 1976 **The Doctors' Tale - Professionalism and Public Trust** Donald

Irvine, 2024-11-01 Sir Donald Irvine asks what further changes have to be made to the culture and regulation of medicine to make it as trustworthy as the public today expects As President of the General Medical Council between 1995 and 2002 Sir Donald helped shape the changes that followed disasters like the deaths of babies at Bristol and the murders of Dr Harold Shipman In this frenetic period a new ethos of professionalism emerged embodying the concept of the autonomous patient and more robust transparent professional regulation founded on a partnership between the public and doctors Sir Donald discusses candidly the struggles in the profession and with successive Governments over the key issues He provides perspectives that are both startling and enlightening He criticises the British Medical Association for its past resistance to accept the need for change and explains why its role in the future must be radically different He calls for specific fundamental changes to the National Health Service and for Government to be separated from managing the provision of healthcare And he outlines the qualities that the bodies regulating doctors in the future must have to succeed In part a personal testimony in part a clarion call for doctors to secure the new culture and re establish public confidence **The Doctors Tale** is gripping and essential reading for everyone who cares about health **Tale of Two Sisters** Pasquale De Marco,

Return of Compassion to Healthcare & Mary Tellis-Nayak, RN, MSN, MPh, 2016-12-13

While advances in medical science and disease treatments are always welcome, real transformation of healthcare requires us to focus on whole persons, not just maladies. Our responsibilities to ill people and frail elders, including those with dementia, are not merely obligations but also response abilities. Beyond relieving suffering and meeting their basic biological needs, we can nurture each individual as a whole person and promote his or her wellbeing. The benefits are tangible and mutual. Helping professionals are rewarded through the deep and meaningful connections they form with the remarkable people they serve.

In **Return of Compassion to Healthcare**, the Tellis Nayaks offer blueprints for person-centered care that can guide leaders of healthcare, aging services, government, and business in building enlightened clinical programs and assisted living communities for medically ill and otherwise vulnerable people. As Vivian and Mary Tellis Nayak so clearly show, solutions are available. Evidence-based treatments are valuable; however, the best care is also tender and loving.

The Other Invisible Hand Julian Le Grand,2009-01-10 How can we ensure high quality public services such as health care and education Governments spend huge amounts of public money on public services such as health education and social care and yet the services that are actually delivered are often low quality inefficiently run unresponsive to their users and inequitable in their distribution In this book Julian Le Grand argues that the best solution is to offer choice to users and to encourage competition among providers Le Grand has just completed a period as policy advisor working within the British government at the highest levels and from this he has gained evidence to support his earlier theoretical work and has experienced the political reality of putting public policy theory into practice He examines four ways of delivering public services trust targets and performance management voice and choice and competition He argues that although all of these have their merits in most situations policies that rely on extending choice and competition among providers have the most potential for delivering high quality efficient responsive and equitable services But it is important that the relevant policies be appropriately designed and this book provides a detailed discussion of the principal features that these policies should have in the context of health care and education It concludes with a discussion of the politics of choice *Congressional Record* United States. Congress,1999
