American society Most boys Albert s age did not encounter the peculiar situations or problems that confronted Albert The streets of New York were Albert s playground during his formative years as it was for most boys living in ethnic enclaves throughout the city Living through the Depression and prewar years gave Albert a unique perspective on the rapid change in American society The American landscape looked quite different prior to the nineteenth century there were no electric illumination of homes no telephones radios TVs automobiles or central heating of homes The importance of the twentieth century cannot be overestimated The folks who lived through the twentieth century witnessed more technological advancements inventions and discoveries than the entire past history of mankind Along with scientific discoveries was the fight for civil rights for women as well as minorities two world wars the development of nuclear energy and the atomic bomb the Korean and Vietnam wars and the conquest of outer space by landing a man on the moon It would take many volumes to describe that which has advanced the cause of civilization during the past one hundred years and it would stagger the imagination to ponder the vicissitudes of technology for the next one hundred years if we don t destroy ourselves in the process
