**Counterrevolution** Melinda Cooper, 2024-03-26 A thorough investigation of the current combination of austerity and extravagance that characterizes government spending and central bank monetary policy At the close of the 1970s government treasuries and central banks took a vow of perpetual self restraint To this day fiscal authorities fret over soaring public debt burdens while central bankers wring their hands at the slightest sign of rising wages As the brief reprieve of coronavirus spending made clear no departure from government austerity will be tolerated without a corresponding act of penance Yet we misunderstand the scope of neoliberal public finance if we assume austerity to be its sole setting Beyond the zero sum game of direct claims on state budgets lies a realm of indirect government spending that escapes the naked eye Capital gains are multiply subsidized by a tax system that reserves its greatest rewards for financial asset holders And for all its airs of haughty asceticism the Federal Reserve has become adept at facilitating the inflation of asset values while ruthlessly suppressing wages Neoliberalism is as extravagant as it is austere and this paradox needs to be grasped if we are to challenge its core modus operandi Melinda Cooper examines the major schools of thought that have shaped neoliberal common sense around public finance Focusing in particular on Virginia school public choice theory and supply side economics she shows how these currents produced distinct but ultimately complementary responses to the capitalist crisis of the 1970s With its intellectual roots in the conservative Southern Democratic tradition Virginia school public choice theory espoused an austere doctrine of budget balance The supply side movement by contrast advocated tax cuts without spending restraint and debt issuance without guilt in an apparent repudiation of austerity Yet for all their differences the two schools converged around the need to rein in the redistributive uses of public spending Together they

drove a counterrevolution in public finance that deepened the divide between rich and poor and revived the fortunes of dynastic wealth Far reaching as the neoliberal counterrevolution has been Cooper still identifies a counterfactual history of unrealized possibilities in the capitalist crisis of the 1970s She concludes by inviting us to rethink the concept of revolution and raises the question Is another politics of extravagance possible

**Putting Skill to Work** Nichola Lowe,2023-05-09 An argument for reimagining skill in a way that can extend economic opportunity to workers at the bottom of the labor market The United States has a jobs problem not enough well paying jobs to go around and not enough clear pathways leading to them Skill development is critical for addressing this employment crisis but there are many unresolved questions about who has skill how it is attained and whose responsibility it is to build skills over time In this book Nichola Lowe tells the stories of pioneering workforce intermediaries nonprofits unions community colleges that harness this ambiguity around skill to extend economic opportunity to workers at the bottom of the labor market Skill development confers shared value to both workers and employers because it lies at the intersection of their respective interests Connecting skill to economic inequality Lowe calls for solutions that push employers to accept greater responsibility for skill development She examines real world examples of workplace intermediaries throughout the United States exploring in detail the work of manufacturing focused organizations in Chicago and Milwaukee and a network of community colleges in North Carolina that coordinates training for biopharmaceutical manufacturers As workforce intermediaries help employers reinterpret skill they also convince them to implement inclusive work based systems that extend family sustaining wages and better working conditions across the entire workforce With renewed policy emphasis on skill development these opportunity rich solutions can be further expanded ensuring workers across the entire educational spectrum contribute skills that drive innovation forward and share the gains they generate for the twenty first century workplace
