Assembling cultures Jack

Saunders, 2019-05-10 In British political discourse, the idea that in the 1970s trade unions ran the country has become a truism, a folk mythology invoked against the twin perils of socialism and strikes. But who exactly wielded power in Britain's workplaces, and on what terms? *Assembling cultures* takes a fine-grained look at factory activism in the motor industry between 1945 and 1982, using car manufacturing as a key case for unpicking important narratives around affluence, declinism, and class. It traces the development of the militant car worker stereotype and looks at the real social relations that lay behind

car manufacturing's reputation for conflict. In doing so, this book reveals a changing complex world of social practices, cultural norms, and shared values and expectations. From relatively meagre interwar trade union traditions during the post-war period, car workers developed shop floor organisations of considerable authority, enabling some to make new demands of their working lives but constraining others in their more radical political aims. *Assembling Cultures* documents in detail a historic process where, from the 1950s, groups and individuals set about creating and reproducing collective power and asks what that meant for their lives. This is a story of workers and their place in the power relations of post-war Britain. This book will be invaluable to lecturers and students studying the history, sociology, and politics of post-war Britain, particularly those with an interest in power, rationality, class, labour, gender, and race. The detailed analysis of just how solidarity, organisation, and collective action were generated will also prove useful to trade union activists.

Forging Modernity Martin

Hutchinson, 2023-03-30. The Industrial Revolution provided the greatest increase in living standards the world has ever known while propelling Britain to dominance on the global stage. In *Forging Modernity*, Martin Hutchinson looks at how and why Britain gained this prize ahead of its European competitors. After comparing their endowments and political structures as far back as 1600, he then traces how Britain, through better policies primarily from the political Tory party, diverged from other European countries. Hutchinson's Harvard MBA allows a unique perspective on the early industrial enterprises; many successes resulted from marketing, control systems, and logistics rather than from production technology alone. While on a national scale, the scientific method and commercial competition were as important as physical infrastructure. By 1830, through ever-improving policies, Britain had built a staggering industrial lead, half a century ahead of its rivals. Then the Tories lost power, and policy changed forever. In his conclusion, Hutchinson shows how changes welcomed by conventional historians caused the decline of Industrial Britain. Nevertheless, the policies that drove growth, ingenuity, and rising living standards are still available for those bold enough to adopt them.
