Sopra La Volta Del Mondo:

, On the Medieval Theory of Signs Umberto Eco, Costantino Marmo, 1989-01-01 In the course of the long debate on the nature and the classification of signs from Boethius to Ockham there are at least three lines of thought the Stoic heritage that influences Augustine Abelard Francis Bacon the Aristotelian tradition stemming from the commentaries on De Interpretatione the discussion of the grammarians from Priscian to the Modistae Modern interpreters are frequently misled by the fact that the various authors regularly used the same terms Such a homogeneous terminology however covers profound theoretical differences The aim of these essays is to show that the medieval theory of signs does not represent a unique body of semiotic notions there are diverse and frequently alternative semiotic theories This book thus represents an attempt to encourage further research on the still unrecognized variety of the semiotic approaches offered by the medieval philosophies of language The Cambridge Companion to Galileo Peter Machamer, 1998-08-13 Not only a hero of the scientific revolution but after his conflict with the church a hero of science Galileo is today rivalled in the popular imagination only by Newton and Einstein But what did Galileo actually do and what are the sources of the popular image we have of him This 1998 collection of specially commissioned essays is unparalleled in the depth of its coverage of all facets of Galileo's work A particular feature of the volume is the treatment of Galileo's relationship with the church It will be of interest to philosophers historians of science cultural historians and those in religious studies **It Could Have Been Otherwise** Hester Goodenough Gelber, 2004-01-01 This description of Dominicans at Oxford from 1300 1350 and the theology of Hugh of Lawton Arnold of Strelley William Crathorn and Robert Holcot reclaims the Dominicans as highly original contributors to theology and philosophy at a time of great innovation Metaphysical Themes in Thomas Aquinas II John F. Wippel, 2007-03 This volume contains eleven articles and book chapters written by John Wippel since the publication of his Metaphysical Themes in Thomas Aquinas in 1984 The Italian Academies 1525-1700 Jane E. Everson, Denis V Reidy, Lisa Sampson, 2016-04-14 The intellectual societies known as Academies played a vital role in the development of culture and scholarly debate throughout Italy between 1525 1700 They were fundamental in establishing the intellectual networks later defined as the *R publique des Lettres* and in the dissemination of ideas in early modern Europe through print manuscript oral debate and performance This volume surveys the social and cultural role of Academies challenging received ideas and incorporating recent archival findings on individuals networks and texts Ranging over Academies in both major and smaller or peripheral centres these collected studies explore the interrelationships of Academies with other cultural forums Individual essays examine the fluid nature of academies and their changing relationships to the political authorities their role in the promotion of literature the visual arts and theatre and the diverse membership recorded for many academies which included scientists writers printers artists political and religious thinkers and unusually a number of talented women Contributions by established international scholars together with studies by younger scholars active in this developing field

Against the Backdrop of Sovereignty and Absolutism Massimiliano Traversino Di Cristo, 2022-05-09 With a foreword by Diego Quaglioni This book attempts to determine the degree to which the modern fate of the Western legal tradition depends on one of the most long standing debates of the Middle Ages the distinction between *potentia Dei absoluta* and *ordinata* God's absolute and ordered power The mediaeval investigation into God's attributes was originally concerned with the problem of divine almightiness It underwent a slow but steady displacement from the territory of theology to the freshly emerging proceedings of legal analysis Here based on the distinction late mediaeval lawyers worked out a new terminology to define the extent of the power holder's authority This effort would give rise during the early modern era to the gradual establishment of the legal political framework represented by the concepts of the prince and sovereignty

On the Idea of Potency Emanuele Castrucci, 2016-08-04 Sweeping through the history of Western philosophy of law Emanuele Castrucci deals with the metaphysical idea of potency as defined by Spinoza and Nietzsche upsetting entrenched theories of jurisprudence From classical Greek philosophy to Jewish biblical exegesis via Christianity from Aristotle's *Metaphysics* to its Arabic interpretations from the genesis of natural law theory Augustine Aquinas Duns Scotus Ockham to Kant and Enlightenment natural law theory to Carl Schmitt Castrucci shows how philosophical rationalism has failed to contain absolute power in a juridical sense
